INDEX OF AUTHORS.

A.

Abadie, Jean. See J. Sellier.
Abati, Gino, influence of the position of the ethylene linking on the electro-affinity and characters of unsaturated alicyclic acids, 1906, A., i, 958.

hydrophthalic acids. II. Affinity constants of two new anhydrides, 1906, A., i, 950.
hydrophthalic acids. IV. \( \Delta_{2.5} \)-cyclo-Hexadiene-1:2-dicarboxylic acid; constitution of the \( \Delta_{2.5} \) and \( \Delta_{1.3} \) acids, 1907, A., i, 419.
the addition of bromine to unsaturated compounds. I. Allyl and propenyl derivatives of benzene, 1910, A., i, 732.
Abati, Gino, and Luigi de Bernardinis, hydrophthalic acids. I. Two new hydrophthalic anhydrides, 1905, A., i, 599.
Abati, Gino, and Andrea Contaldi, hydrophthalic acids. III. Transformation by heat of the new dihydrophthalic anhydrides; characters of the p-methoxyphenylhydrophthalimides, 1906, A., i, 959.
Abati, Gino, and Paolo Gallo, action of phenylcarbamide on certain phenylaminc acids, 1906, A., i, 944.
Abati, Gino, and Cesare de Horatiis, hydrophthalic acids. VII. Resolution of the racemic form of the fumaroid A-tetrahydrophthalic acid, 1909, A., i, 386.
Abati, Gino, and Salvatore Minerva, hydrophthalic acids. V. Reduction of phthalic acid by means of sodium amalgam, 1907, A., i, 420.
Abati, Gino, and F. de Notaris, relations between the chemical and physical characters and the constitution of isomeric amino-derivatives of camphoric acid, 1909, A., i, 783.

Abati, Gino, and Mauro Solimene, hydrophthalic acids. VI. Velocity of addition of bromine to the tetrahydrophthalic anhydrides, 1909, A., i, 104.
Abati, Gino, and Ernesto Vergari, hydrophthalic acids. VIII. Influence of presence and position of the ethylene grouping on the refraction and dispersion of hydrophthalic anhydrides, 1909, A., i, 386.
Abati, Gino. See also Arnaldo Piutti.
Abbott, Howe, electrolytic preparation of iodoform from acetone, 1903, A., i, 305.
Abbott, James Francis, and Andrew Crammore Life, galvanotropism in bacteria, 1908, A., ii, 614.
Abderhalden, Emil, hydrolysis of crystallised oxyhaemoglobin from horses' blood, 1903, A., i, 587.
hydrolysis of crystallised serum-albumin from horses' blood, 1903, A., i, 588.
hydrolysis of edestin, 1903, A., i, 588; 1904, A., i, 211.
formation of carbamide by the oxidation of albumin with permanganate according to Jolles, 1903, A., i, 588, 779.
the blood in high altitudes, 1903, A., ii, 161.
cystin diathesis in families, 1903, A., ii, 564.
monoamino-acids from salmine, 1904, A., i, 463.
protein chemistry and physiology, 1905, A., i, 498; 1908, A., ii, 490.

the importance of the digestion of proteins for their assimilation, 1905, A., ii, 334.

cystine occurring in urinary calculi, 1907, A., i, 476.

proteoses in blood, 1908, A., ii, 305.

monoamino-acids of byssus, 1908, A., ii, 517.

the degradation of 2:5-diketopiperazines in the organism of the rabbit, 1908, A., ii, 521.

albumose in the blood, 1908, A., ii, 605.

the nutritive value of protein cleavage products, 1908, A., ii, 1051; 1909, A., ii, 817.

composition of different silks, 1909, A., i, 275; 1911, A., i, 1050.

polypeptides containing \( \ell \)-tryptophan, 1909, A., i, 603.

protein metabolism, 1909, A., ii, 413.

partial hydrolysis of proteins, 1909, A., i, 278, 559; 1910, A., i, 211, 447; 1911, A., i, 589.

the amino-acids obtainable by the total hydrolysis of proteins, 1910, A., i, 792.

do the detection of peptolytic enzymes in animal and vegetable tissues, 1910, A., ii, 666.

\( \alpha \)-aminobutyric acid, 1911, A., i, 955.

cholesterol obtained from the skull contents of an Egyptian mummy, 1911, A., ii, 1006.

peptolytic enzymes in parasitic worms, 1911, A., ii, 1009.

free amino-acids in the intestinal contents of certain mammals, 1911, A., ii, 1011.

preparation and estimation of tyrosine and glutamic acid, 1912, A., i, 261.

melting point of 3:5-diiodotyrosine, 1912, A., i, 261.

notes: [tryptophan; selective absorption; nomenclature], 1912, A., i, 521.

feeding investigation with completely digested nutriment; solution of the problem of the artificial preparation of nutritive material, 1912, A., ii, 363.

estimation of tyrosine and glutamic acid, 1912, A., ii, 395.

the fate of protein cleavage products in the intestine; the occurrence of individual amino-acids in different parts of the intestinal canal, 1912, A., ii, 574.

Abderhalden, Emil, feeding experiments with the amino-acids derived from protein, and with ammonium salts, 1912, A., ii, 575.

the occurrence of peptolytic enzymes, 1912, A., ii, 576.

formation of homogentisic acid after the administration of large quantities of \( \ell \)-tyrosine by the mouth, 1912, A., ii, 585.

isolation of glycy1-1-phenylalanine from the chyme of small intestine; biological studies with the help of different protein cleavage products and synthetically prepared polypeptides, 1912, A., ii, 1190.

anaphylaxis, 1912, A., ii, 1194.

Abderhalden, Emil, and Boris P. Babkin, the monoamino-acids of eggumin, 1906, A., i, 546.

the fate of leucylglycine in the organism of the dog, 1906, A., ii, 464.

Abderhalden, Emil, and Louis Baumann, the monoamino-acids of crystallised oxyhaemoglobin, 1907, A., i, 572.

tryptophan, 1908, A., i, 488.

dlerpolypeptides containing tryptophan, 1908, A., i, 932.

derivatives of amino-acids. IV. Compounds with glyceral, 1911, A., i, 543.

Abderhalden, Emil, Louis Baumann, and Efim Semen London, normal protein digestion in the dog’s alimentary canal, 1907, A., ii, 489.

Abderhalden, Emil, and Lotte Behrend, composition of different silks. II. The monoamino-acids of Canton silk, 1909, A., i, 343.

Abderhalden, Emil, and Peter Bergell, degradation of peptides in the organism, 1903, A., ii, 666.

occurrence of monoamino-acids in the rabbit’s urine after phosphorus poisoning, 1903, A., ii, 742.

adrenaline, 1904, A., i, 791.

Abderhalden, Emil, Peter Bergell, and Theodor Dörpinghaus, the carbohydrate group in serum-globulin, serum-albumin, and egg-albumin, 1904, A., i, 640.

condition of the body protein in inanition, 1904, A., ii, 272.

Abderhalden, Emil, and Oscar Berghausen, monoamino-acids of the crystalline protein from pumpkin seeds, 1906, A., i, 998.
Abderhalden, Emil, and Bruno Bloch, metabolism in alcaptonuria, 1908, A., ii, 54.

Abderhalden, Emil, Bruno Bloch, and Peter Rona, the cleavage of certain dipeptides derived from tyrosine and phenylalanine during a case of alcaptonuria, 1907, A., ii, 800.

Abderhalden, Emil, and Carl Brahms, fermentative cleavage of polypeptides. VI., 1909, A., i, 73.

Abderhalden, Emil, and Hsing Lang Chang, poly peptides containing D-amino-butyric acid, 1912, A., i, 338.

Abderhalden, Emil, Hsing Lang Chang, and Erich Wurm, synthesis of poly peptides; derivatives of a-amino-butyric acid and their behaviour towards pepsyltic ferment hems, 1911, A., i, 526.

Abderhalden, Emil, and Karl Damm hahn, peptolytic ferments in germinating and ungerminated seeds of various plants, 1908, A., ii, 1065.

Abderhalden, Emil, and Heinrich Dee tjen, the cleavage of polypeptides by the red corpuscles and platelets of the horse, 1907, A., ii, 486, 889.

Abderhalden, Emil, and Hans Einbeck, the cleavage of histidine in the dog's organism, 1909, A., ii, 906.

Abderhalden, Emil, and Oskar Emmerling, cleavage of gladiin by Bacillus mesentericus vulgarus, 1907, A., ii, 497.

Abderhalden, Emil, and Wilhelm Fahl, the blood proteins in a case of alcaptonur ia, 1908, A., ii, 663.

Abderhalden, Emil, and Andor Fodor, the possible isomeric tripeptides from the three monoaminocarboxylic acids : glycine, \(d\)-alanine, and \(l\)-leucine, 1912, A., i, 950.

Abderhalden, Emil, and Oskar Frank, the nutritive value of protein cleavage products. XII., 1910, A., ii, 322.

Abderhalden, Emil, and Dennes Fuchs, glutamic acid in various keratins, 1908, A., i, 1029.

Abderhalden, Emil, and Casimir Funk, the products obtained by boiling casein with 25% sulphuric or concentrated hydrochloric acid, 1907, A., i, 1095.

Abderhalden, Emil, and Dennes Fuchs, the new formation of amino-acids in the animal organism, 1909, A., ii, 634.

Abderhalden, Emil, and Casimir Funk, and Efim Semen London, assimilation of protein in animals, 1907, A., ii, 487.

Abderhalden, Emil, Alberto Furno, Erich Goebel, and Paul Strübel, the value of different amino-acids in the organism of the dog under different circumstances, 1911, A., ii, 1002.

Abderhalden, Emil, and Heinrich Geddert, preparation of optically active polypeptides from racemic compounds, 1911, A., i, 842.
Abderhalden, Emil, and Alfred Gigon, fermentative cleavage of polypeptides, 1907, A., ii, 892.
the cleavage of edestin (from hemp seed) by pancreatic juice alone, and by gastric and pancreatic juices, 1907, A., ii, 893.
Abderhalden, Emil, Alfred Gigon, and Ephraim Semen London, the behaviour of d-alanine in the organism of the dog, 1907, A., ii, 891.
Abderhalden, Emil, Alfred Gigon, and Eduard Strauss, the part played by certain amino-acids in different animals, 1907, A., ii, 488.
Abderhalden, Emil, and Fidel Glamser, the value of protein cleavage products in the animal organism. XIII., 1910, A., ii, 521.
Abderhalden, Emil, and Emil Gressel, the behaviour of iodo-fat derivatives of cholesterol in the dog’s body, 1911, A., ii, 1015.
Abderhalden, Emil, and Markus Guggenheim, the action of tyrosinase from Russula delica on tyrosine, tyrosine-containing polypeptides, and other compounds, 1908, A., i, 237.
synthesis of polypeptides; derivatives of 2:5-di-iodo-l-tyrosine, 1908, A., i, 420, 886.
synthesis of polypeptides, 1908, A., i, 535.
the action of tyrosinase from Russula delica on polypeptides which contain tyrosine and on suprarenine, 1908, A., i, 1080.
detection of glycine, 1909, A., ii, 448.
Abderhalden, Emil, and Juh0 Hämäläinen, monoamino-acids from avenine, 1907, A., i, 831.
Abderhalden, Emil, and Paul Hahn, comparative investigations on the rotatory properties of the plasma and serum of dog’s blood under varying conditions. II., 1910, A., ii, 1081.
Abderhalden, Emil, and Rudolf Hanslian, the use of the ester method for the detection of monoamino-acids in the presence of polypeptides, 1912, A., ii, 500.
behaviour of inorganic constituents of nutriments in the alimentary canal. I. The behaviour of the iron and calcium of flesh in digestion, 1912, A., ii, 956.
Abderhalden, Emil, and Rudolf Hanslian, composition of bladder stones in the natives of Asia Minor, 1912, A., ii, 962.
the behaviour of a-pyrdrolidonecarbonylic acid in the animal organism, 1912, A., ii, 1196.
Abderhalden, Emil, and Robert Heise, the occurrence of peptolytic enzymes in invertebrates, 1908, A., ii, 907.
Abderhalden, Emil, and James Bryan Herrick, composition of conglutin from lupin seeds, 1905, A., i, 846.
[physiological action of iodo-fatty acid derivatives], 1911, A., ii, 1119.
the formation of glycine in the animal organism, 1912, A., ii, 579.
synthetic capacity of cells in mammals; protein need in dogs fed on ammonium salts and single amino-acids, 1912, A., ii, 957.
feeding experiments with gelatin, ammonium salts, completely hydrolysed flesh, and a mixture of amino-acids on young dogs, 1912, A., ii, 1189.
synthetic powers of animal cells; the value of nitrogen from different sources in the dog’s organism, 1912, A., ii, 1190.
Abderhalden, Emil, Paul Hirsch, and Markus Guggenheim, preparation of iodo-fatty acid compounds and their behaviour in the animal, 1911, A., i, 954.
Abderhalden, Emil, and Alfred Hirschowski, synthesis of polypeptides. XXVIII. Derivatives of glycine, d-alanine, l-1eucine, and l-tyrosine, 1908, A., i, 887.
Abderhalden, Emil, and Andrew Hunter, the amount of glycine in milk proteins, 1906, A., i, 545.
hydrolysis of vitellin, 1906, A., i, 912.
action of peptolytic ferments of the animal organism, 1906, A., ii, 782.
Abderhalden, Emil, and Ryuo Inouye, composition of different kinds of silk. XIV. Total and partial hydrolysis of the cocoon of the Ailanthus spinner and of Tailing silk, 1912, A., i, 751.

Abderhalden, Emil, and Arthur Isræl, serological studies by the help of the optical method. VI., 1910, A., ii, 319.

Abderhalden, Emil, and Ernst Kämpf, serological studies by the help of the optical method. XVI., 1911, A., ii, 566.

Abderhalden, Emil, and Georg Kapferer, serological studies by the help of the optical method. XI. Parenteral administration of carbohydrates, 1910, A., ii, 1093.

Abderhalden, Emil, and T. Kashiwado, the nuclein of the thymus, and anaphylaxis studies with nuclear materials (nucleo-proteins, nucleins, and nucleic acids), 1912, A., ii, 1192.

comparative investigations on the elimination of iodine after administration of potassium iodide and saïdion, 1908, A., ii, 611.

glutamic acid and pyrrolidonecarboxylic acid, 1910, A., i, 239.

methionylglycine and pyrrolidonecarboxylic acid, 1912, A., ii, 768.

methylation of polypeptides, 1911, A., i, 528.

methylation of polypeptides; betaine of diglycylglycine, 1911, A., i, 954.

detection of l-proline as a primary product of protein hydrolysis, 1912, A., i, 492.

esterification of the monoamino-acids by means of ethyl iodide; separation of pyrrolidonecarboxylic acid from glutamic acid, 1912, A., i, 492.

Abderhalden, Emil, and Martin Kempe, synthesis of polypeptides. XX. Derivatives of tryptophan, 1907, A., i, 652.

tryptophan and its derivatives, 1907, A., i, 808.

tyrosine, glycine, and glutamic acid in different developmental periods in the fertilised hen’s egg, 1907, A., ii, 895.

Abderhalden, Emil, and Karl Kieselwetter, the use of elastin for the detection of proteolytic enzymes, 1911, A., ii, 999.

Abderhalden, Emil, Wilhelm Klingemann, and Theodor Pappenhusen, the cleavage of proteins in the alimentary canal of different kinds of animals, 1911, A., ii, 508.

Abderhalden, Emil, and Arthur Heinrich Koelker, the use of optically active polypeptides for estimating the activity of proteolytic enzymes, 1907, A., ii, 488.

the course of the fermentative degradation of polypeptides, 1908, A., i, 238, 488.

Abderhalden, Emil, Arthur Heinrich Koelker, and Florentin Medigreceanu, the peptolytic enzymes in different forms of cancer and other tumours. II., 1909, A., ii, 915.

Abderhalden, Emil, and Friedrich Kramm, the cleavage of the milk proteins by gastric juice under various conditions, 1912, A., ii, 573.

the cleavage of proteins in the intestinal canal, 1912, A., ii, 574.

Abderhalden, Emil, and Arno Ed. Lämpé, the fat-splitting properties of blood and plasma under various conditions, 1912, A., ii, 572.

Abderhalden, Emil, and Franz Müller, effect on blood-pressure of \( \alpha \), \( \beta \), and \( \delta \)-suprarenine (adrenaline), 1909, A., ii, 159.

the action of choline on blood-pressure, 1910, A., ii, 530, 725; 1911, A., ii, 994.

Abderhalden, Emil, and Josef Olinger, the value of protein cleavage products in the animal organism. VII., 1908, A., ii, 961.

Abderhalden, Emil, and Berthold Oppler, the value of protein cleavage products in the dog's organism, 1907, A., ii, 369.

the behaviour of the blood-plasma and serum of the horse towards certain polypeptides, 1907, A., ii, 889.

Abderhalden, Emil, and Chauncey J. Valtette Pettibone, the influence of the physical condition of proteins on the rapidity of their cleavage by enzymes; the importance of peptic digestion on the further cleavage of proteins by trypsin; the degree of cleavage of proteins by enzymes, 1912, A., i, 1040.

Abderhalden, Emil, and Ludwig Pincussohn, the amount of peptolytic ferments in rabbits' and dogs' plasma [and in the red blood corpuscles of these animals] under various conditions, 1909, A., ii, 816.

the amount of peptolytic enzymes in dog's blood-serum under various conditions. III., 1909, A., ii, 904.

serological studies by the help of the optical method, 1910, A., ii, 318, 319, 736; 1911, A., ii, 410.

peptolytic enzymes in cancer and other tumours. IV., 1910, A., ii, 636.

Abderhalden, Emil, Ludwig Pincussohn, and Adolf R. Walther, the enzymes in different bacteria, 1910, A., ii, 989.

the monoamino-acids of crystallised egg-albumin, 1906, A., i, 53.

Abderhalden, Emil, and Hugo Pribram, monoamino-acids of lactalbumin, 1907, A., i, 570.

Abderhalden, Emil, and Oscar Prym, liver autolysis, 1909, A., ii, 897.

Abderhalden, Emil, and E. Rathmann, serological studies by the help of the optical method. XIV., 1911, A., ii, 505.

Abderhalden, Emil, and Béla Reinbold, monoamino-acids from the edestin of sunflower seeds, 1905, A., i, 620.

action of pancreatic juice on edestin from cotton seeds, 1905, A., ii, 838.

Abderhalden, Emil, and Auguste Rilliet, action of the juice of Psalliota campestris on polypeptides, 1908, A., i, 489.

Abderhalden, Emil, and Peter Rona, decomposition products of thymus-histon, 1904, A., i, 540.

formation of sugar from fat, 1904, A., ii, 423.

feeding experiments with hydrolysed casein, 1904, A., ii, 749.

the composition of the protein of Aspergillus niger, 1905, A., i, 954.

the value of the cleavage products of casein in the animal organism, 1905, A., ii, 467.

behaviour of glycyl-L-tyrosine in the dog's organism after subcutaneous injection, 1905, A., ii, 839.

the proteolytic ferments of the pyloric and duodenal juices, 1906, A., ii, 462.

the behaviour of leucylphenylalanine, leucylglycylglycine, and alanylglycylglycine toward the liver-juice of the ox, 1906, A., ii, 873.

the behaviour of blood-serum and urine towards glycyl-L-tyrosine, 1907, A., ii, 890.

the value in the dog of protein cleavage products, 1907, A., ii, 892.

utilisation in the animal organism of protein cleavage products, 1910, A., ii, 877.

the fat-splitting properties of the blood and serum of the dog under different conditions, 1911, A., ii, 1108.
Abderhalden, Emil, and Otto Rostoski, monoamino-acids of edestin from cotton seeds and their behaviour with gastric juice, 1905, A., i, 619. the Bence-Jones protein, 1905, A., i, 954.

Abderhalden, Emil, and Ernst Ruehl, the influence of large quantities of water on the optical properties of blood-plasma and serum, 1910, A., ii, 1081.

metabolism experiments with elastin, 1910, A., ii, 1084.

Abderhalden, Emil, and Franz Samuely, composition of gliadin from wheat, 1905, A., i, 620.

behaviour of cystine, dialanylcystine, and dilaenylcystine in the organism of the dog, 1905, A., ii, 839.

assimilation of protein in animals, 1905, A., ii, 840.

fate of leucine and lenecyl-leucine in the organism of the dog, 1906, A., ii, 464.

Abderhalden, Emil, and Takaoki Sasaki, monoamino-acids from synotonin prepared from ox-flesh, 1907, A., i, 573.

Abderhalden, Emil, and Benomar Schilling, serological studies by the help of the optical method. XV., 1911, A., ii, 513.

Abderhalden, Emil, and Alfred Schittenhelm, decomposition products of elastin, 1904, A., i, 539.

excretion of leucine and tyrosine in a case of cystinuria, 1905, A., ii, 741.

comparison of the caseinogen of various milks, 1906, A., ii, 467.

the amount of amino-acids in normal human urine, 1906, A., ii, 470.

phosphorus poisoning, 1906, A., ii, 878.

the action of proteolytic ferment of germinating seeds of wheat and lupins on polypeptides, 1907, A., i, 104.

the decomposition of racemic amino-acids in the dog's organism, 1907, A., ii, 489.

peptolytic enzymes in the stomach. II., 1909, A., ii, 414.

detection of peptolytic enzymes, 1909, A., ii, 840.

Abderhalden, Emil, and Julius Schmid, comparative investigations on the composition and cleavage of different kinds of silk. VIII. The monoamino-acids from Tai-Tsao-Tsam silk (China), 1910, A., i, 289.

Abderhalden, Emil, and Hubert Schmidt, the use of triketohydrindene hydrazine for the detection of proteins and their cleavage products, 1911, A., ii, 674.

Abderhalden, Emil, and Josef Schuler, synthesis of polypeptides; derivatives of isoleucine. II., 1910, A., i, 304.

Abderhalden, Emil, and James Sington, composition of different silks. IV. Monoamino-acids from Bengal silk, 1909, A., i, 750.

Abderhalden, Emil, and Gr. Slavu, the serum proteins of different animals, 1909, A., i, 340.

excretion of iodine from the dog's organism, when given in the form of 3,5-di-iodo-L-tyrosine, 3,5-di-iodoglycyl-L-tyrosine, 3,5-di-iodopropionyl-L-tyrosine, and 3,5-di-iodopalmityl-L-tyrosine, 1909, A., ii, 820.

Abderhalden, Emil, and J. G. Siegeswyk, serological studies by the help of the optical method. VII., 1910, A., ii, 319.

Abderhalden, Emil, and Wladimir Spack, composition of different silks. VI. Monoamino-acids from Indian tus sore silk, 1909, A., ii, 859.

Abderhalden, Emil, and Eugen Steinbeck, action of pepsin and hydrochloric acid, 1910, A., i, 795.

further investigations on the use of silk peptone for the detection of peptolytic enzymes, 1910, A., ii, 980.

Abderhalden, Emil, and Friedrich Wilhelm Strauch, action of the enzymes of gastric juice. II., 1911, A., i, 511.

Abderhalden, Emil, and Eduard Strauss, the cleavage products of spongine with acids, 1906, A., i, 547.

monoamino-acids of keratin from the eggs of Testudo graeca, 1906, A., ii, 781.

Abderhalden, Emil, and Akikazu Suwa, cleavage products obtained by the partial hydrolysis of proteins, 1910, A., i, 529.
INDEX OF AUTHORS.

Abderhalden, Emil, and Akikazu Suwa, synthesis of polypeptides; derivatives of pyrrolidonecarboxylic acid, 1910, A., i, 637.

Abderhalden, Emil, and Yutaka Teruuchi, composition of protein from pine seeds, 1905, A., i, 846.

preparation of tyrosine from silk, 1906, A., i, 852.
the fate of certain amino-acids and peptides in the organism of the dog, 1906, A., ii, 293.
the behaviour of certain peptides towards organ-extracts, 1906, A., ii, 464.
culture researches with Aspergillus niger and certain amino-acids and peptides, 1906, A., ii, 479.
proteolytic action of animal tissue juices and of intestinal juice, 1906, A., ii, 873.
comparative investigations of vegetable proteolytic ferment, 1907, A., i, 104.

Abderhalden, Emil, and Friedrich Thies, physiological actions of L, D, and dl-adrenaline. II., 1909, A., ii, 333.

Abderhalden, Emil, and Carl Voegtlin, the cleavage of casein by pancreatic juice, 1907, A., ii, 893.

Abderhalden, Emil, and Arthur Voitinnovici, hydrolysis of ichthyloepidin and fibrin, 1907, A., i, 805.
hydrolysis of keratin from horn and wool, 1907, A., i, 807.

Abderhalden, Emil, and Franz Wachsmuth, action of pepsin and hydrochloric acid on elastin and other proteins. III., 1911, A., i, 511.

Abderhalden, Emil, and Leonhard Wacker, the cleavage of 2:5-diketopiperazinines in the organism of the rabbit. II., 1908, A., i, 1052.

Abderhalden, Emil, and Wolfgang Weichard, formation of silk, 1909, A., ii, 418.

the amount of peptolytic enzymes in rabbit's serum under varying conditions. II., 1909, A., ii, 903.

Abderhalden, Emil, and Ernst Welde, IX. The mono-amino-acids from Chefoo silk, 1910, A., i, 289.

Abderhalden, Emil, and Harry Gideon Wells, the mono-amino-acids of keratin from horse-hair, 1906, A., i, 55.

Abderhalden, Emil, and Vladimir W. Worms, composition of different silks. VII. Mono-amino-acids from the gelatin (leim) of Canton silk, 1909, A., i, 859.

INDEX OF AUTHORS.

Alder, Wilhelm, preparation of salicylarsenic acid (1-carboxy-6-hydroxyphenyl-3-arsinie acid), 1910, A., i, 346.

Adlung, Alfred. See Ernest Schmidt.

Administration der Minen von Buchsweiler, preparation of sodium ferrocyanide from calcium ferrocyanide, 1905, A., i, 123.

preparation of esters of organic acids with the exception of those of formic acid, 1911, A., i, 601.

Adolph, G., Bell process of electrolyzing aqueous solutions of alkali chlorides, 1904, A., ii, 615.

Adorjan, Josef, assimilation in wheat, 1903, A., ii, 94.

Adrian, Louis Alphonse, function of alcohol in preserving chloroform, 1903, A., i, 566.

Agamennone, Basil. See Telenachos Komnenos.

Aerde, Maurice von, 77 dimethylallylcarbinol, 1909, A., i, 79.

Aeuer, Ernst. See Paul Köthner.

Afanasieff, B. P. See Leo A. Tschugaeff.

Affelder, Oscar I. See Harry Edward Walters.

Agatschianian, K., effect of adrenaline on the hepatic and muscular glycogen, 1907, A., i, 111.

Agafonoff, A. A., electrical conductivity of solutions of vanadyl trichloride in water, 1904, A., ii, 156.

Agamennone, Giovanni. See Federico Giolitti.

Ageewa, M., reversible isomeric process taking place between γ-phenylpropylene and s-phenylmethylmaleylene [α-phenylpropylene] on heating with anhydrous alkali hydroxides, 1905, A., i, 776.

Ageno, Fernando, partition of sodium oxide between boric acid and carbonic acid, 1912, A., ii, 339.

Ageno, Fernando, and E. Barzetti, colloidal boric acid, 1910, A., ii, 500.

Ageno, Fernando, and G. Donini, velocity of electrolytic oxidation of certain organic acids, 1910, A., i, 357.

Ageno, Fernando. See also Mario Giacomo Levi and Raffaele Nasini.

Ageno, I. See Raffaele Nasini.

Agazzotti, Alberto, diminution of carbon dioxide in the pulmonary alveoli of man on returning from rarefied air to the normal barometric pressure, 1904, A., ii, 746.

influence of the barometric pressure on the partial pressures of the carbon dioxide and oxygen in the pulmonary alveoli, 1904, A., ii, 746.

action of oxygen on the sickness produced by rarefaction of the air; experiments on an orang-outang, 1905, A., ii, 835.

simultaneous action of oxygen and carbon dioxide on the sickness produced by rarefaction of the air; experiments on an orang-outang, 1905, A., ii, 835.

experiments on a man breathing carbon dioxide and oxygen together under a barometric pressure of 122 mm., corresponding with an altitude of 14,582 metres, 1905, A., ii, 835.

reaction of the blood in rarefied air as determined by titration and by the electrometric method, 1907, A., ii, 37.

Agazzotti, Alberto. See also Carlo Foà.

Agnew, James Watson, and Robin B. Croad, constituents of oil of savin, 1912, A., i, 636.

Agnew, James Watson. See also George Gerald Henderson.

Agostinelli, Claudio. See Riccardo Ciussa.

Agulhon, Henri, influence of boric acid on diastatic actions, 1909, A., i, 621.

influence of reaction of the medium on the formation of melamins by diastatic oxidation, 1910, A., i, 449.

use of boron as a catalytic manure, 1910, A., ii, 296.

tolerance of maize to boron, 1911, A., ii, 142.

action of ultra-violet light on diastases, 1911, A., ii, 243.

colorimetric detection of alcohol in presence of acetone, colour reactions of certain groups of organic compounds in presence of mineral acids and potassium dichromate, 1911, A., ii, 1140.
INDEX OF AUTHORS.

Ahrens, *Henri*. See also Gabriel Bertrand.

Ahler, O. See Alfred Wohl.

Ahlqvist, Alfred. See Thor Ekcrantz.

Ahlström, Bertel, and Ossian Aschan, the pinene fractions of French and American turpentine oils, 1906, A., i, 442.

Ahlum, Charles Chester, a modification of the volumetric estimation of free acid in the presence of iron salts, 1906, T., 470; P., 63.

estimation of the sodium phosphates, 1906, A., i, 303.

Ahrens, Felix Benjamin, 4-methylpyridine, 1905, A., i, 232.

hydroxysparteine, 1905, A., i, 917.

new constituents of coal tar, 1906, A., i, 473.
	octanes from rock-oil, 1907, A., i, 269.

the colloidal nature of caoutchouc, 1912, A., i, 481.

Ahrens, Felix Benjamin, and Waldemar Blümel, some by-products from the manufacture of aniline, 1903, A., i, 813.

Ahrens, Felix Benjamin, and Richard Gorkow, lutidines from coal tar, 1903, A., i, 515; 1904, A., i, 615.

Ahrens, Felix Benjamin, and August Luther, 2'- and 4'-nitro-6'methyl-a-stilbazole, 1907, A., i 965.

Ahrens, Felix Benjamin, and Leo von Mozdzeński, occurrence of nono-naphthene in coal tar, 1908, A., i, 618.

Ahrens, Felix Benjamin, and Johannes Riemer, Hanoverian petroleum, 1907, A., i, 813.

Ahrens, Felix Benjamin, and H. SoUmann, piperylhydrazine, 1903, A., i, 513.

Ahrens, Felix Benjamin, and Adolf Stapler, Grignard's reaction with dialcohols, 1905, A., i, 423, 868.

Ahrle, Hermann, synthesis and formula of Caro's acid (monopersulfuric acid), 1909, A., ii, 395.

Ahrle, Hermann, Caro's acid, 1909, A., ii, 804.

Ahrle, Hermann. See also Adalbert Kolb.

Aiazz-Mancini, M. See Angelo Angeli.

Aichel, Oswald. See Ludwig Weiss.

Aickelin, Hans. See Adolf von Baeyer, and Otto Dimroth.

Aktien-Gesellschaft für Anilin-Fabrikation, 4-nitro-4-phenylenediamine, 1903, A., i, 54.

preparation of mixed aminoazo-compounds, 1903, A., i, 373.

[mercuric derivatives of sodium β-naphtholsulphonates], 1904, A., i, 132.

[p-phenetidine- and p-anisidine-o-sulphonic acid], 1904, A., i, 310.

[azo-dyes from 4-chloro-2-aminophenol], 1904, A., i, 353.

[4-chloro-2-aminophenolsulphonic acid], 1904, A., i, 399.

phenyl ether-o-carboxylic [arboxybenzoic] acids, 1904, A., i, 499; 1905, A., i, 780.

[iodochlorides of oleic acid and its analogues], 1904, A., i, 614.

[azo-compounds from 2-hydroxy-3-naphthioic acid], 1904, A., i, 700.

glycollic acid derivatives of pyrogallol and its alkyl ethers, 1905, A., i, 135.

dyes of the cyanine series, 1905, A., i, 149.

preparation of bromoceloolinithin, 1905, A., i, 163.

preparation of indophenols, 1905, A., i, 468.

naphthaphenazines, 1905, A., i, 552.

nitration of aromatic alyxysulphonamides, 1905, A., i, 639.

preparation of 1-phenyl- and -p-tolyl-naphthylamine-8-sulphonic acid, 1905, A., i, 717.

preparation of α-phenyl- and -p-tolyl-naphthylamine-6- and -7-sulphonic acids, 1905, A., i, 770.

yellow sulphur dye, 1905, A., i, 913.

indophenols containing the sulphamino-group, 1905, A., i, 984.

dipropylacetyl-p-phenetidine, 1906, A., i, 418.

5-nitro-2-aminophenol, 1906, A., i, 496.

preparation of dialkylmalonyl-p-phenetidines, 1906, A., i, 497.

p-aminophenylisoxazole-3-sulphonic acid, 1906, A., i, 658.

p-hydroxyphenylglycinamide, 1906, A., i, 658.
nitration of m-diarylsulphondiamides, 1906, A., i, 701.
acetylated indophenols, 1906, A., i, 702.
preparation of 5:5-diethylbarbituric acid, 1906, A., i, 704.
amino-hydroxy-derivatives of the phenyl-12naphthiminazoles, 1906, A., i, 713.
soluble double salts of 1:3-dimethyl-xanthene and 1:3:7-trimethylxanthine with barium salicylate, 1906, A., i, 715.
[reduction of nitroazo-compounds], 1906, A., i, 717.
nitration of aromatic arylsulphon-amides, 1906, A., i, 736.
preparation of a 3:4-dichloroaniline-sulphonic acid, 1906, A., i, 825.
preparation of a di-o-anisidinedisulphonic acid, 1906, A., i, 837.
[p-amino-phenyl-naphthyl-1:2-triazole-3:8-disulphonic acid], 1906, A., i, 906.
preparation of a di-o-phenetidinedisulphonic acid, 1906, A., i, 950.
[nitration of 3:4-dichloroanilinesulphonic acid] 1907, A., i, 203.
preparation of tert.-butyltoluene and tert.-butylxylene, 1907, A., i, 907.
naphtholmonosulphonates of ethyl p-aminobenzoate, 1907, A., i, 925.
preparation of tetra-alkylidendiminodiphennylmethanesulphonicacids, 1907, A., i, 969.
preparation of 2-derivatives of 6-hydroxy-αβ-naphthiminazole-8-sulphonic acid, 1907, A., i, 975.
[3′-aminophenol-αβ-naphthatriazole-5:9-disulphonic acid], 1907, A., i, 980.
[aryl sulphonic esters of salicylaldehyde and its homologues], 1907, A., i, 1049.
preparation of the leuco-derivatives of the indophenols, 1907, A., i, 1076.
preparation of 5-hydroxy-3′-aminophenyl-1:2-naphthiminazolinedisulphonic acid, 1907, A., i, 1081.
preparation of sulphonic acids of the safranine series, 1908, A., i, 225.
preparation of hexamethylenetetramine borate, 1908, A., i, 322.
preparation of the urethane of m-amino-β-ethoxybenzoic acid, 1908, A., i, 339.

preparation of aminohydroxy-derivatives of phenyl-12naphthiminazoles, 1908, A., i, 469.
preparation of sulphonylic esters of cellulose, 1908, A., i, 955.
preparation of phenoxyazines, 1908, A., i, 1010.
azo-derivatives of 2-chloro-p-anisidine and 2-chloro-p-phenetidine-sulphonic acids, 1908, A., i, 1023.
preparation of aniline and its homologues, 1909, A., i, 220.
preparation of sulphanilic acid, 1909, A., i, 220.
preparation of p-aminophenol-2-sulphonic acid, 1909, A., i, 224.
preparation of p-phenylenediaaccine, 1909, A., i, 256.
preparation of p-phenylenediamine-sulphonic acid, 1909, A., i, 256, 257.
preparation of 4-amino-4′-hydroxydiphenylamine, 1909, A., i, 257.
preparation of pyrogallol from 2:6-dichlorophenol-4-sulphonic acid, 1909, A., i, 469.
preparation of sulphonic derivatives of thioanilines, 1909, A., i, 737.
[sulphonation of 2:3-dichloro-4-aminobenzene], 1909, A., i, 852.
preparation of dibromophenyglycine-o-carboxylic acid, 1910, A., i, 257.
[preparation of derivatives of p-toluencesulphon-p-nitroanilide], 1910, A., i, 727.
[preparation of methyl-2:4-diamoanisole], 1911, A., i, 493.
preparation of arylsulphodiazomino-derivatives, 1911, A., i, 509.
[preparation of a carbamide derivative], 1911, A., i, 584.
preparation of hydroxy-β-naphthyl-pyrazolnomesulphonic acids, 1911, A., i, 637.
preparation of 4-chloro-6-nitro-2-aminophenol, 1911, A., i, 853.
preparation of α-alkyldihydroxyphenylethylamines and their N-alkyl derivatives, 1911, A., i, 857.
preparation of phenothioxin and its derivatives, 1911, A., i, 903.
[preparation of anthrasquinonecarboxidone derivatives], 1912, A., i, 141.

preparation of 4-chloro-a-naphthol, 1912, A., i, 183.

preparation of mercury p-aminophenylarsinates, 1912, A., i, 228.

preparation of a condensation product from dihydro-1:4-benzothiazone, 1912, A., i, 504.

preparation of indophenol condensation products from perimidine and its derivatives, 1912, A., i, 512.

preparation of esters of salicylic acid, 1912, A., i, 558.

preparation of neutral phosphoric acid esters of phenols and naphthols with their homologues and derivatives, 1912, A., i, 760.

preparation of o-aminoanthraquinone-carboxylic acid, 1912, A., i, 981.

preparation of indophenols of the benzimazolo group and their leuco-derivatives, 1912, A., ii, 1033.

Alabéeff, Pavel. See Ivan Ostromisslensky.

Alagna, B. See E. Oliveri-Mandalà.

Alagna, Ezio. See Efisio Mameli.

Alba, F. See A. Hubert.

a new method of separation and estimation of the organic acids in fruits and vegetables, 1907, A., ii, 589.

complete analysis of the fruit of [the tomato] Lycopersicum esculentum, 1907, A., ii, 715.

method for the complete analysis of vegetable substances, 1908, A., ii, 327.

ripening of tomatoes (Lycopersicum esculentum), 1908, A., ii, 774.

metabolism of oxalic acid and oxalates, 1912, A., ii, 666.

Albanese, Monfreti, influence of electrolytes on the viscosity of colloidal liquids, 1908, A., ii, 1018.

Alber, Eugen, 7-aminoquinidine [7-amino-2-methylquinoline], 1905, A., i, 235.

Alber, Eugen. See also Fritz Fichter.

Alberda van Ekenstein, William, and Jan Johannes Blanksma, hydrazones derived from p-nitrophenylllydrazine and p-dinitrobenzyllydrazine, 1904, A., i, 98.

drhyzona derived from o-, m-, and p-nitrophenylllydrazines, 1905, A., i, 474.

benzaldehyde derivatives of sugars and glucosides, 1906, A., i, 511.

benzyldene and tolyldene derivatives of hydroxy-acids, 1906, A., i, 512.

the levorotation of mannose, 1907, A., i, 829.

de the sugar from frog-spawn, 1907, A., ii, 638.

dugar, 1908, A., i, 9.

transformation of l-gulose and of l-idose into l-sorbose, 1908, A., ii, 138.

β-hydroxy-3-methylfururaldehyde as the cause of some colour reactions of hexoses, 1909, A., i, 288, 762.

crystallised l-ribose, 1909, A., i, 457.

formation of levulic acid from hexoses, 1910, A., i, 461.

Liebmann's protein reaction, 1911, A., ii, 554.

Alberda van Ekenstein, William. See also Jan Johannes Blanksma and Cornélis Adriaan Lobry de Bruyne.

dicyclic quaternary bases, 1909, A., i, 178.

Albert, Bruno. See Conrad Willgerodt.

Albert, Friedrich. See Emil Knoevenagel.

Albert, Kurt. See Otto Ruff.

Albert, Robert, estimation of soil acidity, 1909, A., ii, 446.

Albert, Robert. See also Philipp Malcomesius.

Alberti, Leo, and Bronislav Smieciuszewski, preparation of the chlorohydrin, the oxide, and an unsaturated alcohol from normal diprimary decylen glycol [decan-ak-diol], 1906, A., i, 619.

Albertini, Alberto. See Herman Decker, and Adolf Kaufmann.

Albertoni, Pietro, and Felice Rossi, the action of animal proteins on vegetarians, 1911, A., ii, 411.

Albini, Silvio. See Giuseppe Plancher.

Albitzky, Alexius A., isomerism between oleic and elaidic acids and erucic and brassidic acids. II., 1903, A., i, 227.
INDEX OF AUTHORS.

Aldrich, *Thomas Bailey*, the feeding of white rats on the pituitary body, 1912, A., ii, 1192.

Aldrich, *Thomas Bailey*. See also Eliah Mark Houghton.

Aldridge, Montague. See Frederick Daniel Chattaway.

Alefeld, *Ernst*. Semi-aldehyde of succinic acid (a correction), 1909, A., i, 364.

Albrecht, *Ernst*. See also Johannes Thiele.

Alcock, Frank Harris, [essay of] sodium salicylate, 1907, A., ii, 58.

Alcock, (Miss) *Mary*. See Gilbert Thomas Morgan.

Alcock, Nathaniel Henry, and Jordan Roche Lynch, physical and chemical properties of nerves. I., 1908, A., ii, 51.

Alcock, Nathaniel Henry. See also Otto Loewi.

Alderson, Edmund. See Herbert Eldon Roaf.

Aldrich, *Thomas Bailey*, adrenaline [epinephrine], the active principle of the suprarenal glands, 1905, A., i, 955.

Alexander, William. See Benjamin Moore.
Alexander, W. B. See Walter Parke Bradley.
Alexandroff, A. See Th. Rudakoff, and Vetcheslov E. Tistschenko.
Alexandroff, Dmitry Konstantinowitsch, detection of pyrrolidine-2-carboxylic acid, 1905, A., ii, 869.
salts and ethers of hexanitrodiphenylamine, 1908, A., i, 83.
buréte without stopcock or rubber connexion, 1910, A., ii, 747.

ω-sulphomethyl derivatives of aromatic amines, 1905, A., i, 340, 769.
condensation product from anthra-
nilic acid and formaldehyde, 1905, A., i, 437.
preparation of nitriles, 1905, A., i, 438.
preparation of w-cyanomethylanthranilic acid, 1905, A., i, 645.
[a new aminodihydroxyanthra-
quinonesulphonic acid], 1905, A., i, 654.
preparation of stable, dry hyposul-
phites, 1905, A., ii, 814.
preparation of chloro-derivatives of indigotin, 1906, A., i, 89, 277.
chlorination of mono- and di-amino-
azo-dye from 3:4-dichloroaniline, 1906, A., i, 121.
o-hydroxyazo-dyes, 1906, A., i, 121.
preparation of chloro- and bromo-
phthalimides, 1906, A., i, 182.
[azo-dyes from 3:4:6-trichloroaniline], 1906, A., i, 322.
Badische Anilin- & Soda-Fabrik, [azo-dyes from nitro-m-phenylenediaminesulphonic acid], 1906, A., i, 322.
sulphonic esters of hydroxybenzaldehydes and hydroxybenzoic acids, 1906, A., i, 413.
preparation of the salts of formaldehydesulphoxylic acid, 1906, A., i, 480.
preparation of indoxyl, 1906, A., i, 695.
preparation of hydroxyethylaniline and its derivatives, 1906, A., i, 786.
preparation of derivatives of the reduction products of anthraquinone, 1906, A., i, 862.
preparation of benzanthronequinolines, 1906, A., i, 889.
preparation of 4-alkyloxy-a-naphthols, 1906, A., i, 951.
preparation of hydroxyethyl salicylate, 1906, A., i, 957.
[oxidation of aromatic hydrocarbons and their derivatives with manganese disulphate], 1907, A., i, 202.
preparation of aldehydes of the anthraquinone series, 1907, A., i, 224.
preparation of anthracene derivatives, 1907, A., i, 228; 1908, A., i, 999; 1912, A., i, 119, 1006.
[the orientation of sulphonated chlorotoluenoazo-ß-naphthols and their lake-forming properties], 1907, A., i, 263.
preparation of benzanthrone and its derivatives, 1907, A., i, 324.
[preparation of dianthraquinonylamine derivatives], 1907, A., i, 327.
oxidation of ß-nitrotoluene in the side-chain with manganese dioxide and sulphuric acid, 1907, A., i, 407.
[acetyl derivatives of the highly chlorinated alkylanilines], 1907, A., i, 408.
preparation of chlorinated amides, 1907, A., i, 444.
preparation of stable compounds from aldehydes and hyposulphites, 1907, A., i, 478.
preparation of acetyl alkyl compounds of highly halogenated aromatic amines, 1907, A., i, 507.
preparation of dianthraquinonyl and its derivatives, 1907, A., i, 589, 942.

Badische Anilin- & Soda-Fabrik, benzanthrone derivatives of the naphthantraquinone series, 1907, A., i, 943.
[properties of substituted amidines], 1907, A., i, 973.
preparation of derivatives of formaldehydesulphoxylic acid containing nitrogen, 1907, A., i, 1024.
[preparation of 2':2'-dianthraquinonyl-1:5-diaminoanthraquinone], 1907, A., i, 1085.
dinitrodiphenylaminesulphonic acids and their transformation into triphenylmethane colouring matters, 1908, A., i, 154.
[direct production of alizarin from anthraquinone], 1908, A., i, 191.
preparation of hydroxybenzanthrones, 1908, A., i, 193.
[chlorination of dianthraquinonyl derivatives], 1908, A., i, 193.
preparation of salts of 1-diazoo-ß-naphtholsulphonic acids, 1908, A., i, 231.
preparation of diphenylamine derivatives, 1908, A., i, 259.
preparation of indoxyl and its homologues and derivatives, 1908, A., i, 371.
[oxidation of 2-methyl-1:2'-dianthraquinonylamine], 1908, A., i, 456.
preparation of formaldehydesulphoxylate, 1908, A., i, 605.
preparation of halogen derivatives of benzanthrone, 1908, A., i, 661; 1909, A., i, 244.
preparation of barium cyanide from barium cyanamides, 1908, A., i, 770.
preparation of complex dianthraquinonyldiaminoanthraquinones, 1908, A., i, 807.
preparation of the cyanides and cyanamides of the alkali and alkaline earth metals, 1908, A., i, 964.
preparation of derivatives of benzanthrone, 1908, A., i, 993.
preparation of chloroacylanthraquinones, 1908, A., i, 994.
preparation of pure nitrates from nitrous fumes, 1908, A., ii, 175.
preparation of 2-ß-nitrosoanilinonaphthalene-ß:8-disulphonic acid, 1909, A., i, 221.
preparation of derivatives of 1:3-diaminoanthraquinone, 1909, A., i, 243.
preparation of benzanthrone and its derivatives, 1909, A., i, 244.
[anthrapyrindone derivatives], 1909, A., i, 262.

preparation of 3-chloro-6-nitroaniline, 1909, A., i, 297.

[preparation of derivatives of triamino-benzene], 1909, A., i, 337.

preparation of derivatives of thiol-benzoic acid, 1909, A., i, 718; 1912, A., i, 111.

preparation of substituted aromatic carboxylic acids from the corresponding aldehydes, 1909, A., i, 792.

preparation of acetylaminanthraquinones, 1909, A., i, 810.

[preparation of 2-methylanthrapyridone], 1909, A., i, 835.

[preparation of methylenebis-3-chloro-6-nitroaniline], 1909, A., i, 910.

[preparation of benzanthryl-1-aminoanthraquinone derivatives], 1909, A., i, 941.

preparation of substituted halogen derivatives of 3-oxy-(1)-thionaphthen, 1909, A., i, 950.

preparation of 2:3-diketo-tetrahydro-(1)-thionaphthen, 1909, A., i, 950.

[preparation of benzoyl-p-phenylene-diaminesulphonic acid], 1909, A., i, 964.

preparation of safraninesulphonic acids, 1909, A., i, 972.

preparation of halogenated anthraquinones, 1910, A., i, 49.

preparation of 2:3-diketo-tetrahydro-(1)-thionaphthen derivatives, 1910, A., i, 59, 60.

preparation of chloro- and bromo-anthraquinonesulphonic acids, 1910, A., i, 270.

preparation of nitrogen derivatives of phenylglycine-o-carboxylic acid, 1910, A., i, 318.

preparation of anthranilodio-acetic acid and its derivatives, 1910, A., i, 319.

preparation of halogenated 2-methylanthraquinone derivatives substituted either in the aromatic nucleus or in the side-chain, 1910, A., i, 325.

preparation of 5-halogen-6-chloro-2-acylaminotoluenes, 1910, A., i, 371.

preparation of halogen derivatives of phenylglycine-o-carboxylic acid, 1910, A., i, 382.

preparation of condensation products in the anthracene series, 1910, A., i, 397, 701, 702; 1911, A., i, 885.

preparation of mononitroanthraquinonylquinolines, 1910, A., i, 430.

preparation of thionaphthen derivatives, 1910, A., i, 500, 764.

preparation of carbamino-acid esters from 6-amino-o-naphthol-3-sulphonic acid, 1910, A., i, 667.

preparation of halogenindoxyl acids and their esters, 1911, A., i, 156.

preparation of 1:5-dichloronaphthalene-3-sulphonic acid and of 1:4-dichloronaphthalene-6-sulphonic acid, 1911, A., i, 434.

preparation of o-nitroanthraquinone-carboxylic acids, 1911, A., i, 455.

preparation of acenaphthenone, 1911, A., i, 464.

preparation of halogenated anthraquinones, 1911, A., i, 466.

preparation of anthranilic acid esters containing a substituted group in the para-position to the amino-group, 1911, A., i, 539.

preparation of substituted anthranilic acid esters, 1911, A., i, 539.

preparation of sulphonated aromatic ammonium compounds, 1911, A., i, 627.

preparation of \( \beta \)-dimethyl-\( \Delta \)\( \gamma \)-butadiene, 1911, A., i, 829.

preparation of chloroalkylarylsulphonyl chlorides, 1911, A., i, 850.

preparation of a mixture of 1:4- and 1:5-dichloronaphthalenes, 1911, A., i, 850.

preparation of aminoanthraquinones and of aminonaphthanthraquinones or their derivatives, 1911, A., i, 884.

preparation of anthraquinone condensation products, 1911, A., i, 885.

preparation of halogenated derivatives of indigotin, 1911, A., i, 925, 1030.

preparation of sulphurous acid derivatives of unsaturated hydrocarbons, 1911, A., i, 938.

[preparation of derivatives of anthraquinonecarboxylic acids and of anthraquinonecarboxylic acids], 1911, A., i, 980.

preparation of phenanthridone derivatives, 1911, A., i, 1026.
Badische Anilin- & Soda-Fabrik, preparation of ammonium salts from nitrogen compounds of aluminium, 1911, A., ii, 1085.
[preparation of dimethyldianthren], 1912, A., i, 142.
preparation of chloroalkylaryl sulphonic acids and of chloroalkylaryl carboxylic acids, 1912, A., i, 176.
preparation of aromatic sulphonyl ammonium compounds, 1912, A., i, 176.
preparation of halogenated dehydroindigotin salts, their nuclear homologues and substitution products, 1912, A., i, 218.
preparation of carboxylic acids of aromatic ammonium compounds or their derivatives, 1912, A., i, 355.
preparation of aldehydes in the anthraquinone series, 1912, A., i, 361.
preparation of condensation products in the anthraquinone series, 1912, A., i, 362, 311, 996.
preparation of chloro-substituted derivatives of anthranilic acid, 1912, A., i, 450.
[preparation of anthraquinone derivatives], 1912, A., i, 468, 996.
[preparation of nitromethylenanthrone], 1912, A., i, 475.
[preparation of naphthantheridone], 1912, A., i, 504.
preparation of nitrated derivatives of indigotin, 1912, A., i, 512.
preparation of condensation products in the anthracene series, 1912, A., i, 804.
preparation of pinacene from acetone and sodium, 1912, A., i, 831.
preparation of anthraquinone derivatives containing sulphur, 1912, A., i, 876, 980, 1013.
[preparations of phenanthrene derivatives containing sulphur], 1912, A., i, 877.
preparation of crystalline zinc form-aldehydesulphoxylate, 1912, A., i, 945.
preparation of 1-aminoanthraquinone-2-carboxylic acid and its derivatives, 1912, A., i, 979.
preparation of ammonia by the catalytic combination of nitrogen and hydrogen, 1912, A., ii, 936.
preparation of molybdenum compounds containing nitrogen, 1912, A., ii, 946.
the catalytic preparation of ammonia from its elements by the employment of pure iron as the contact substance, 1912, A., ii, 1052.

Berthaud, A., elementary demonstration of the law of mass action, 1912, A., ii, 915.

Berthaud, J., new method of forming organic compounds of phosphorus, 1907, A., i, 117.

platinichlorides and periodides of di- and tri-methylamine and their employment in the separation of the bases, 1910, A., i, 365.

new method for estimating the three methylamines and ammonia in mixtures, 1910, A., ii, 663.

estimation of methylamines in presence of large quantities of ammonia, 1910, A., ii, 808.

Bertheim, Alfred, an isomeric amino-phenylarsinic acid, 1908, A., i, 590.

diazophenylarsinic acid and its products of decomposition, 1908, A., i, 591.

halogenated p-aminophenylarsinic acids, 1910, A., ii, 346.

derivatives of p-aminophenylarsinic oxide, 1911, A., i, 593.

nitro- and amino-arsanilic acids, 1911, A., i, 1055.

Bertheim, Alfred, and Ludwig Benda, constitution of the isomeric amino-phenylarsinic acids, and of Michaelis’s nitrophenylarsinic acid, 1912, A., i, 62.

Bertheim, Alfred, and Frida Leopold, methylated diaminodihydroxyarsenobenzenes, 1912, A., i, 818.

Bertheim, Alfred. See also Ludwig Benda, Paul Ehrlich, Richard Joseph Meyer, and Arthur Rosenheim.

Berthelot, Albert, di-iodotyrosine and its possible application in therapeutics, 1911, A., ii, 636.

Berthelot, Albert, and D. M. Bertrand, the intestinal flora; isolation of a microbe capable of producing β-iminazolylethyramine from histidine, 1912, A., ii, 608.

toxicity of β-iminazolylethyramine [4-β-aminoethylglyoxaline], 1912, A., ii, 969.
Berthelot, [Paul Alfred] Daniel, the melting point of gold, 1904, A., ii, 489.

the most probable value of the gas constant R, 1904, A., ii, 705.

exact calculation of molecular weights of gases, 1907, A., ii, 154.

calculation of the compressibility of gases at about atmospheric pressure by means of the critical constants, 1907, A., ii, 154.

molecular weights of different gases calculated by the method of limiting densities, 1907, A., ii, 155.

atomic weight of nitrogen, 1907, A., ii, 680.

scale of molecular weights of gases, 1907, A., ii, 668.

compressibility of gases at about atmospheric pressure, 1907, A., ii, 740.

coloration of certain precious stones under radioactive influences, 1908, A., ii, 8.

Berthelot, Daniel, and Henry Gaudechon, chemical effects of ultra-violet light on gases; polymerising action, 1910, A., i, 349.

photochemical synthesis of carbohydrates from carbon monoxide and water vapour in the absence of chlorophyll; photochemical synthesis of quaternary compounds, 1910, A., i, 543.

chemical effect of ultra-violet light on gases; oxidising actions; combustion of cyanogen and ammonia; synthesis of formic acid, 1910, A., ii, 564.

oxidising action of ultra-violet light on gases; peroxidation of oxides of nitrogen and sulphur, 1910, A., ii, 606.

mechanism of photochemical reactions and the formation of vegetable substances; decomposition of sugar solutions, 1910, A., ii, 813.

photochemical decomposition of alcohols, aldehydes, acids, and ketones, 1910, A., ii, 814.

principal types of photolysis of organic compounds by ultra-violet light, 1911, A., ii, 86.

photolysis of acids with a complex grouping by ultra-violet light; action of uranium salts as luminous catalysts, 1911, A., ii, 170.

nitrification by ultra-violet light, 1911, A., ii, 240.

photolysis of alcohols, acid anhydrides, ethers and esters by ultra-violet light, 1911, A., ii, 835.

photolytic decomposition of smokeless powders by ultra-violet light; influence of stabilisers; damaged powders, 1912, A., i, 163.

photolytic decomposition of smokeless powders, of picric acid and ammonium picrate by ultra-violet light, 1912, A., ii, 394.

action of ultra-violet rays on gaseous hydrocarbons, 1912, A., i, 741.

photolysis of ketones by solar and ultra-violet light, 1912, A., i, 750.

the rôle of wave-length in photochemical reactions; analogy between the photochemistry making use of high frequences and the chemistry of high temperatures, 1912, A., ii, 616.

wave-length of the active radiations in the photochemical synthesis of ternary compounds, 1912, A., ii, 715.

the radiations effective in the photochemical synthesis of quaternary compounds, in the polymerisation of different gases, and in the photolysis of acetone, 1912, A., ii, 822.

different methods of photochemical decomposition of dextrose and galactose according to the wave-length of the radiations, 1912, A., ii, 1120.

Berthelot, Marcellin [Pierre Eugène], limit of the intensity of a current from a voltaic element capable of producing appreciable electrolysis in a voltameter, 1903, A., ii, 3.

Lavoisier's laboratory note-books 1903, A., ii, 16.

researches on voltaic elements depending on the reciprocal action of two saline solutions, 1903, A., ii, 51, 125.

impurities of compressed oxygen, and the part played by them in combus tions in the calorimetric bomb, 1903, A., ii, 70.
Berthelot, Marcellin [Pierre Eugène], transformation of diamond into charcoal during oxidation, 1903, A., ii, 412.

a law relating to the electromotive force of voltaic elements based on the reciprocal action of salt solutions and soluble electrolytes, 1903, A., ii, 258.

law of the electromotive forces of salt solutions; influence of temperature, 1903, A., ii, 259.

law relating to the electromotive forces developed by reciprocal actions of saline solutions, 1903, A., ii, 464.

galvanic elements with one and with two liquids, 1903, A., ii, 525.

a new general relationship between the electromotive forces of salt solutions, 1903, A., ii, 526.

galvanic elements with two liquids; electromotive forces; condensations; transformations of energy at the electrodes, 1903, A., ii, 524.

relationships between galvanic elements with several liquids, 1903, A., ii, 625.

remarks concerning the relationships between galvanic elements containing the same liquids between two different or identical electrodes, 1903, A., ii, 626.

galvanic elements with several different liquids and identical metallic electrodes, 1903, A., ii, 626.

solubility and polymerisation of cyanogen; reactions between cyanogen and potassium cyanide; thermochemical studies on the solution and polymerisation of cyanogen; the slow oxidation of cyanogen and cyanides by free oxygen, 1904, A., i, 720, 721, 793, 860.

electromotive forces resulting from the contact and reciprocal action of two liquids, 1904, A., ii, 9.

sublimed carbon, 1904, A., ii, 27.

[action of antiseptic and insecticidal agents], 1904, A., ii, 65.

voltaic elements founded on the reciprocal action of saline liquids and of metallic electrodes; preliminary observations on the methods of measurement and conditions of experiment, 1904, A., ii, 154.

emission of water by plants and their spontaneous desiccation, 1904, A., ii, 281.

gaseous exchange between the atmosphere and plants separated from their roots and kept in the dark, 1904, A., ii, 363.

chemical effects of light; action of hydrochloric acid on platinum and gold, 1904, A., ii, 569.

emanations and radiations, 1904, A., ii, 602; 1905, A., ii, 3.

heat of transformation of black crystallised antimony sulphide into the orange precipitated sulphide, 1904, A., ii, 605.

the state of vaporised carbon 1904, A., ii, 653.

changes effected by time on hydrocarbon substances of organic origin, 1905, A., i, 169, 501.

chemical effects of light; action of hydrochloric acid on platinum and gold, 1905, A., ii, 3.

desiccation of plants and vegetable tissues; period of maturation not reversible; final equilibrium in average atmospheric conditions, 1905, A., ii, 50, 413.

absolute desiccation of plants and vegetable substances; period of artificial desiccation; reversibility by atmospheric moisture, 1905, A., ii, 51.

desiccation of plants; period of vitality; humectation by liquid water; reversibility imperfect, 1905, A., ii, 51.

some thermochemical rules relating to the possibility and prognostication of reactions, 1905, A., ii, 76.

changes in the dimensions and volume of vegetable organs and tissues under the influence of desiccation, 1905, A., ii, 111.

metals found in the archaeological excavations in Egypt, 1905, A., ii, 164.

use of the hot and cold tube in the study of chemical reactions, 1905, A., ii, 308, 810.

vessels of fused silica—their use in chemistry; permeability of vessels of fused silica, 1905, A., ii, 316, 386, 810.

chemical combination, 1905, A., ii, 378.

permeability of glass vessels, 1905, A., ii, 443, 810.

calorimetric methods, especially referring to the determination of the heat of combustion of organic compounds, 1905, A., ii, 504.
Berthelot, Marcellin [Pierre Eugène], insoluble alkaline compounds formed by humic substances and their rôle in vegetable physiology and agriculture, 1903, A., ii, 759.
control experiments [over long periods of time], 1905, A., ii, 805.
insoluble alkaline compounds in living vegetable tissues, 1906, A., ii, 117.
insoluble potassium compounds in humic matters, 1906, A., ii, 117.
insoluble alkali compounds in living plants: oak leaves, 1906, A., ii, 246.
insoluble potassium compounds in the trunk and bark of oaks, 1906, A., ii, 246.
formation of endothermic compounds at high temperatures, 1906, A., ii, 524.
direct synthesis of nitric acid and the nitrates from their elements at the ordinary temperature, 1906, A., ii, 533.
absorption of nitrogen by organic substances under the influence of radio-active matter, 1908, A., ii, 645.
chemical equilibrium of several bases exposed simultaneously to the action of phosphoric acid, 1906, A., ii, 657.
natural and artificial coloration of amethyst, etc., 1906, A., ii, 863.
observations relating to ethereal equilibrium, and to the mutual displacement of glycerol and the other alcohols, 1907, A., i, 9.
comparison between chemical phenomena determined by a heating resulting from purely calorific causes and those due to a heating produced by electrical actions [electricity], 1907, A., ii, 153.
chemical action of radium, 1907, A., ii, 215.
combination of elementary carbon and nitrogen, 1907, A., ii, 256.
memorial lecture on (Dixon), 1911, T., 2353; P., 270.
Berthelot, Marcellin, and Gustave André, some metals and minerals found in the excavations of the Tell Acropolis of Susa in Persia, 1906, A., ii, 230.
Berthelot, Marcellin, and Henry Gaudechon, cinchona alkaloids; [thermo-chemistry of] quinine and quindine, 1903, A., i, 773; ii, 197.
cinchona alkaloids: cinchonine, cinchonidine, and cinchonamine, 1903, A., i, 773; ii, 270.
Berthelot, Marcellin, and Henry Gaudechon, thermochemical investigation of strychnine and brucine, 1905, A., ii, 301, 441.
Berthelot, Marcellin, and Philippe Landrieu, heats of combustion and of formation of certain nitrogenous substances of physiological importance, 1907, A., ii, 230.
Berthold, Adolf, new distillation arrangement for ammonia estimation, 1910, A., ii, 70.
Berthold, Erich. See Franz Sachs and Alfred Wohl.
Berthoud, A., impossibility of super-heating a solid, 1910, A., ii, 825.
kinetic theory of gases and thermodynamics, 1911, A., ii, 578.
Berti, Pio, potassium bromide as indicator when using Fehling’s solution, 1905, A., ii, 57.
solutions of sugar and inorganic salts in dialysis, 1905, A., ii, 682.
asperagine substances [amino-acids in molasses], 1905, A., ii, 759.
Bertiaux, L. See Auguste Holland.
Bertini, Corrado, products of the condensation of ethyl benzoylecetate with benzaldehyde, 1904, A., i, 167.
Bertoini, Amiccare, the relationship of surface-tension to the union of toxin and anti-toxin, 1910, A., ii, 987.
Bertol, Pasquale, fusion of some typical santonin derivatives with potassium hydroxide, 1903, A., i, 261.
action of hydrochloric acid on arteisin, 1904, A., i, 177.
decomposition products of a derivative of arteisin (1:4-dimethyl-β-naphthol and propionic acid), 1905, A., i, 224.
new reduction products of arteisin, 1908, A., i, 560.
action of chlorine on “saccharin,” 1911, A., i, 858.
artemisinophenylhydrazone, 1911, A., i, 898.
Bertolo, Pasquale, and G. Ranfaldi, two dehydrinquinones of arteisin (artermisone and isoartermisone), 1905, A., i, 897.
Bertozzi, Astenore, toxicity of methyl-atropinium bromide, homotropin hydrobromide, eumydrine, and atropine sulphate, 1906, A., ii, 475.
Bertram, H., oxidation by the urine, 1905, A., ii, 488.
Bertram, H. See also Arthur Binz.

arsenic in animals, 1903, A., ii, 91, 310.

arsenic in hen’s eggs, 1903, A., ii, 499.
employment of the calorimetric bomb
to demonstrate the presence of
arsenic in the organism, 1903, A.,
ii, 604.
regulator for fractional distillation
under reduced pressure, 1903, A.,
ii, 643.
separator for fractional distillation
under reduced pressure, 1903, A.,
ii, 643.
oxidation of guaiacol by laccase, 1904,
A., i, 157.
pigment of the suprarenal capsules,
1904, A., i, 539.
detection and estimation of traces of
arsenic in organs, etc., 1904, A.,
ii, 85.

biochemistry of the sorbose bacterium,
1904, A., ii, 760.
a new sugar from mountain-ash berries,
1905, A., i, 21.
synthesis and chemical nature of sorbi-
eritol, 1905, A., i, 21.

adrenaline, 1904, A., i, 956; 1905, A.,
i, 106.
coffee seeds without caffeine, 1905, A.,
ii, 648.
favourable employment of manganese
as manure, 1906, A., ii, 121.
vicianin, a new cyanogenetic glucoside
contained in the seeds of vetch,
1907, A., i, 68.
estimation of reducing sugars, 1907,
A., ii, 136.
action of tyrosinase on some substances
related to tyrosine, 1908, A., i, 236.
perseulose, a new crystalline sugar
with seven carbon atoms, 1908, A.,
i, 715.

constitution of perselulose, 1909, A., i,
634.
action of the Bulgarian ferment on
proteins, 1911, A., ii, 140.
detection and estimation of small
quantities of manganese, particularly
in organic substances, 1911, A., ii,
542.

Bertrand, Gabriel (Emile), the importance
of manganese in the formation of
coulida of Aspergillus niger, 1912,
A., ii, 377.
extraordinary sensitiveness of Asper-
gillus niger to manganese, 1912, A.,
ii, 377.

Bertrand, Gabriel, and Henri Agulhon,
detection of minute quantities of
boron in the organism and in com-
estimation of boric acid in complex
mixtures, and especially in plant
ashes, 1910, A., ii, 345.
the normal presence of boron in
animals, 1912, A., ii, 854.

Bertrand, Gabriel, and P. Bruneau,
preparation and properties of crystal-
ised α-talitol, 1908, A., i, 249.

Bertrand, Gabriel, and Arthur Compton,
individuality of cellase and emulsin,
1910, A., i, 800.
influence of temperature on the activity
of cellase, 1911, A., i, 99.
action of heat on emulsin, 1911, A., i,
592.
influence of the reaction of the medium
on the activity of cellase; new
character distinguishing it from
emulsin, 1911, A., i, 825.
the supposed reversibility of the
hydrolysis of salicin by enzymes,
1912, A., i, 592.

Bertrand, Gabriel, and Franz Ducháček,
action of a Bulgarian ferment on certain
sugars, 1909, A., i, 623.

Bertrand, Gabriel, and Maurice Holderer,
cellase and the diastatic decomposi-
tion of cellose, 1910, A., i, 212.
new observations on the individuality
of cellose, 1910, A., i, 290.

Bertrand, Gabriel, and Maurice Javillier,
a highly sensitive method of pre-
cipitating zinc, 1907, A., ii, 53.
a method of estimating very small
quantities of zinc, 1908, A., ii,
67.
nicotine silicotungstate and on the
estimation of nicotine, 1909, A., ii,
450.
influence of manganese on the develop-
ment of Aspergillus niger, 1911, A.,
ii, 222.
joint influence of zinc and manganese
on the development of Aspergillus
niger, 1911, A., ii, 421.
influence of zinc and manganese on
the mineral composition of Asper-
gillus niger, 1911, A., ii, 644.
estimation of nicotine, 1911, A., ii,
827.

Bertrand, Gabriel, and Henri Agulhon,
Bertrand, Gabriel, and A. Lanzenberg, synthetic crystalline l-iditol, 1906, A., i, 728.
Bertrand, Gabriel, and Jean Lecarme, state of matter in the neighbourhood of the critical point, 1905, A., ii, 627.
Bertrand, Gabriel, and Florentin Medi-
greceanu, manganese normally in the blood, 1912, A., ii, 459.
presence and distribution of manganese in animal organs, 1912, A., ii, 662.
presence of manganese in the animal series, 1912, A., ii, 786.
Bertrand, Gabriel, and W. Mutermilch, existence of a tyrosinase in wheat bran, 1907, A., i, 811.
coloration of brown bread, 1907, A., ii, 716.
Bertrand, Gabriel, and (Mlle.) L. Riv-
kind, distribution of vicianin and its diastase in leguminous seeds, 1907, A., ii, 122.
Bertrand, Gabriel, and Felix Rogoziński, haemoglobin as a peroxydase, 1911, A., i, 248.
Bertrand, Gabriel, and M. Rosenblatt, tyrosinase and racemic tyrosine, 1908, A., i, 379.
the fatal temperature for plant tyro-
sinas, 1910, A., i, 530.
Bertrand, Gabriel, M. Rosenblatt, and (Mme.) M. Rosenblatt (née Rozen-
band), activation of sucrase [invertase] by different acids, 1912, A., i, 145.
comparative hydrolysis of sucrose by various acids in presence of invertase, 1912, A., i, 327.
activity of the sucrase of "aspergillus" in presence of different acids, 1912, A., i, 401.
comparative hydrolysis of sucrose by various acids in presence of the invertase of Aspergillus niger, 1912, A., i, 522.
Bertrand, Gabriel, and (Mlle.) M. Rozen-
band, action of acids on peroxydase, 1909, A., i, 279.
Bertrand, Gabriel, and R. Veillon, action of the Bulgarian ferment on monobasic acids derived from reducing sugars, 1911, A., ii, 221.
Bertrand, Gabriel, and Gustave Weis-
weiller, action of the Bulgarian fer-
m ent on milk, 1907, A., ii, 120.
constitution of vicianin. I., 1908, A., i, 817.

Bertrand, Gabriel, and Gustave Weis-
weiller, vicianose, a new reducing sugar containing C6H1105, 1910, A., i, 156.
constitution of vicianose; diastatic hydrolysis, 1910, A., i, 653.
constitution of vicianose and of vici-
in, 1911, A., i, 15.
Bertrand, P. See Robert Fosse.
Bertrand, Ed., action of potassium hydroxide on a mixture of phenyl-
acetyletylene and methylcyclohexanone, 1905, A., i, 775.
action of potassium hydroxide on a mixture of phenylacetyletylene and acetophenone, 1905, A., i, 775.
Berwerth, Friedrich, and Gustav Tam-
mann, the natural and artificial "burnt zone" of meteoric iron and the behaviour of Neumann's lines in heated kamaite, 1912, A., ii, 652.
Berzelius, Jöns Jacob (Freiherr) von, presentation of engraving of, to the Society, by Professor Retzius, 1905, P., 83.

Beschke, Erich, O. Beittler, M. Kitaj, and S. Strum, 2:7-dimethoxy-9:10-di-
phenylacnapthylene and the corre-
sponding dianisyl compounds, 1909, A., i, 917.
Beschke, Erich, and Franz Diehm, 2:8-
or amphi-chrysonequinone, 1911, A., i, 889.
Beschke, Erich, Georg Köhres, and Ludwig Stoll, isomerism of some unsatu-
rated lactonic acids, 1912, A., i, 889.
Beschke, Erich, Heitarrich Rölle, and S. Strum, condensation of 2:7-dihydroxy-
naphthalene with aromatic aldehydes and ammonia; synthesis of substituted acenaphthalenes, 1909, A., i, 961.
Beschke, Erich, Mariam Winograd-
Finkel, and Georg Köhres, synthesis of chrysene, 1911, A., i, 873.
Beschke, Erich. See also Julius von
Braun, Martin Freund, and Otto Wallach.

standardisation of sodium thiosulphate and estimation of sodium sulphide, 1907, A., ii, 811.
action of the silent electrical discharge on dry and moist ammonia, 1911, A., ii, 718.
formation of hydrogen peroxide in the electrical discharge, 1911, A., ii, 1082.
preparation of magnesium silicade and its decomposition by acids, 1912, A., ii, 255.

preeparation of santolal and menthol ethers, 1912, A., i, 479.
preeparation of 2-piperonylquinolino-4-carboxylic acid (piperonylicinehonic acid), 1912, A., i, 503.
preeparation of aryl esters of 2-phehylquinolino-4-carboxylic acid, 1912, A., i, 582.

Chemische Fabrik auf Aktien (vorm. E. Schering), preparation of glycals from dialogen-butanes and their homologues, 1912, A., i, 743.
preeparation of 2-phenyl- and substituted 2-phenyl-6:6'-diquinolyl-4:4'-dicarboxylic acids, their homologues and derivatives, 1912, A., i, 811.
preeparation of compounds from 2-phenylquinolino-4-carboxylic acid or its homologues with glycine, 1912, A., i, 1018.

Chemische Fabrik Coswig-Anhalt, preparation of a compound containing aluminium, boric acid, and active oxygen, 1911, A., ii, 984.
Chemische Fabrik Flursheim, H. Noerdlinger, preparation of aldehydes, alcohols, and acids, 1906, A., i, 628.

Chemische Fabrik Gedeon Richter, preparation of additive compounds of chloral with amides, 1911, A., i, 836.
Chemische Fabrik Griesheim-Elektron, preparation of 3-chloro-4-aminophenol, 1903, A., i, 817.
preeparation of thionyl chloride, 1903, A., ii, 420.
preeparation of alkali metals, 1903, A., ii, 646.
preeparation of aromatic aldehydes, 1904, A., i, 1021.  
electrolytic preparation of metallic permanganates, 1904, A., ii, 127.
[3-chloro-4'-methylamino-4-hydroxy-diphenylamine], 1906, A., i, 890.
[condensation of the arylsulphonyl-naphthylamines with p-aminophenols], 1908, A., i, 209.
azo-compounds from the o-aminophenols and 2:8-dihydroxynaphthalene-6-sulphonic acid, 1908, A., i, 480.
preeparation of dry calcium hypochlorite, 1908, A., ii, 280.
the removal of arsenic from liquids and gases, 1908, A., ii, 686.
[preeparation of calcium hypochlorites], 1908, A., ii, 692.
separation of p- and m-nitro-o-anisidine, 1911, A., i, 125.
[preeparation of dichlorodinitrobenzidine], 1911, A., i, 493.
[preeparation of ]-azimino-compounds, 1912, A., i, 144.
preeparation of anthraquinone derivatives containing the ]-azimino-ring, 1912, A., i, 588.
Chemische Fabrik Griesheim-Elektron, preparation of epichlorohydrin from dichlorohydrin, 1912, A., i, 744.
[preparation of anthraquinone derivatives], 1912, A., i, 1085.

sulphur dyes for the phenols and their derivatives, 1904, A., i, 81.
preparation of concentrated formic acid, 1908, A., i, 598.
direct production of dry zinc hyposulphite, 1908, A., ii, 185.
preparation of aromatic nitro-compounds, 1909, A., i, 295.

Chemische Fabrik Grünau, Landshoff, & Meyer, Emil Franke, and Walter Kirchner, preparation of formic acid from alkali formates, 1912, A., i, 408.

Chemische Fabrik von Friedr. Heyden, acyl derivatives of phenylglycine-o-carboxylic acid esters, 1908, A., i, 487.
preparation of acetylnitrin, 1908, A., i, 513.
derivatives of indoxylacid, 1905, A., i, 647.
bismuth disalicylate, 1906, A., i, 665.
preparation of guanyldiethylbarbiturate acid, 1906, A., i, 894.
preparation of bismuth tannate, 1906, A., i, 974.
preparation of the bornyl esters of the aromatic hydroxy-carboxylic acids, 1907, A., i, 429.
preparation of double lactates containing antimony, 1907, A., ii, 888.
preparation of santaly esters, 1907, A., i, 953.
separation of o- and p-guaiacol sulphonic acids, 1908, A., i, 161.
preparation of isobornyl esters of the fatty acids from pinene hydrochloride or hydrobromide, 1908, A., i, 351, 809.
the reduction products of sulphurous acid and their double compounds with aldehydes, 1909, A., i, 207.
bismuth salts of brominated catechols, 1909, A., i, 469.
[preparation of bornyl and menthol sulphuric acids], 1909, A., i, 497.
preparation of alkyleneiminosulphonates, 1909, A., i, 704.
preparation of disulphoacetalddehyde-sulphoxylates, 1909, A., i, 880.

preparation of o-ω-trichloroacetoxyl-benzoic acid, 1910, A., i, 37.
preparation of aromatic halogen-alkyloxy-carboxylic acids, 1910, A., i, 37.
preparation of nitrogen derivatives of formaldehyde sulphoxyl acid, 1910, A., i, 229.
preparation of nitrogen derivatives of aldehyde bisulphites, 1910, A., i, 229.
preparation of nitrogen derivatives of formaldehyde sulphoxylates, 1910, A., i, 229.
preparation of tribromocatechol, 1910, A., i, 247.
preparation of iodoacysalicilic (o-iodoaclyoxybenzoic) acids, 1910, A., i, 485.
preparation of diglycollyldisalicilic acid, 1911, A., i, 133.

Chemische Fabrik Ladenburg, separation of m- and p-cresols, 1904, A., i, 312.
preparation of carbonic acid esters, 1911, A., i, 438.

Chemische Fabrik vorm. Sandoz, [chloronitroaminophenols], 1904, A., i, 311.
[sulphonic acids of benzaldehyde], 1905, A., i, 141.
preparation of camphene, 1909, A., i, 247.
preparation of bromonaphthalene-1-diazo-2-oxide-4-sulphonic acid, 1911, A., i, 1047.

Chemische Fabrik Uerdingen Lienau & Co., preparation of pinene hydrochloride, 1907, A., i, 328.

Chemische Fabrik vorm. Weiler-Ter-Meer, diaminomethylidiphenylcarboxylic acid, 1904, A., i, 53.
azo-compounds from sulphonic acids of a-amino-β-naphthol, 1905, A., i, 161.
yellow sulphur dye from nitro-a-methylbenzimidazole, 1905, A., i, 552.

Chemische Werke vorm. Dr. Heinrich Byk, preparation of amylamine, 1908, A., i, 395.
preparation of cholesteryl a-bromoisovalerate, 1910, A., i, 31.
Chemische Werke vorm. Dr. Heinrich Byk, preparation of a soluble double compound of theophylline and piperazine, 1910, A., i, 81.
preparation of amino-aldehydes, 1910, A., i, 322.
preparation of halogen-hydroxyalkyl-substituted xanthine bases, 1910, A., i, 786.
preparation of esters of allophanic acid, 1911, A., i, 118.
preparation of bromo-fatty acid derivatives of aminoaceto-\(\alpha\)-phenetidines, 1911, A., i, 323.
preparation of readily soluble double compounds from dialkylaminodi-methylphenylpyrazolone, caffeine, and aromatic acids, 1912, A., i, 516.
preparation of aluminium glycollate, 1912, A., i, 534.
preparation of readily soluble double compounds from aminoacylphenec-tidines, caffeine, and mineral acids, 1912, A., i, 580.
preparation of mineral acid esters of carbohydrates, the corresponding hydroxy-acids, and higher alcohols, 1912, A., i, 832.
preparation of calcium perborate, 1912, A., ii, 1171.

Chemische Werke Schuster & Wilhemy, preparation of calcium antimony lactate, 1910, A., i, 217.

Chéneneau, C., refractive index of solutions, 1904, A., ii, 641.
index of refraction of substances dissolved in non-aqueous solvents, 1906, A., ii, 509.
valency of the dissolved salt molecule deduced from the dispersive properties of the solution and from the theory of electrons, 1907, A., ii, 662.

preparation of amino-alcohols, 1906, A., i, 936.
preparation of diazaino-alkyl esters, 1906, A., i, 936.
production of alkali nitrites, 1906, A., ii, 611.
preparation of cyanacetylcarbamide and its alkyl and amyl derivatives, 1907, A., i, 195.
[dianthraquinonylamine], 1907, A., i, 226.
hydrogen iodide additive compounds of oleic, elaidic, and brassidic acids, 1907, A., i, 380.
[4:4'-diaminodi-p'-phenoxybenzene and its azo-derivatives], 1907, A., i, 568.
preparation of 8-arylamino-a-naphtholsulphonic acids, 1907, A., i, 914.
preparation of aromatic monoacetyl-triamines, 1907, A., i, 977.
[preparation of salts of iodinated fatty acids], 1907, A., i, 1002 ; 1909, A., i, 204.
preparation of iodobehenic acid, 1907, A., i, 1002.
preparation of bromo-aliphatic acids, 1907, A., i, 1003.
preparation of methylenecitryl haloids, 1907, A., i, 1006.
preparation of methylenecitrylsalicylic acid, 1907, A., i, 1045.
preparation of 4-benzoylaminoaceto-1:2-dialkylxybenzenes, 1907 A., i, 1049.
Farbenfabriken vorm. Friedrich Bayer & Co., preparation of 1:2:5-trihydroxyanthraquinone and 1:2:5-trihydroxyanthraquinone-3-sulphonic acid, 1907, A., i, 1057.

preparation of coeroxonium and coerthiomium derivatives, 1907, A., i, 1067.

colouring matters of the indanthren series, 1907, A., i, 1084.
magnesium, calcium and strontium salts of the higher brominated fatty acids, 1908, A., i, 122.

the addition of hydrogen iodide to the unsaturated fatty acids, 1908, A., i, 123.

[4-chloro-5-nitro-2-aminophenol and its diazo-oxide], 1908, A., i, 230.

preparation of 3-aminoacetylcatechol, 1908, A., i, 262.

preparation of mixed alkyl aromatic ethers, 1908, A., i, 263.

preparation of the alkyl esters of the higher iodated fatty acids, 1908, A., i, 310.

soluble silver compounds of nucleic acids and their derivatives, 1908, A., i, 376.

preparation of methyleneoctriloxytolic acids, 1908, A., i, 421.

preparation of alkyloxyacetyl derivatives of the hydroaromaticalcohols, 1908, A., i, 429.

preparation of anthraquinone derivatives containing nitrogen, 1908, A., i, 456; 1910, A., i, 396.

preparation of hydroxyalkyl derivatives of xanthine bases, 1908, A., i, 475, 703.

preparation of soluble and stable additive compounds of thio carbamide and silver salts, 1908, A., i, 613.

preparation of 4-chloro-2-aminophenyl-5-sulphonic acid, 1908, A., i, 629.

preparation of anthracene derivatives containing nitrogen, 1908, A., i, 699, 1010.

[preparation of 3-chloro-4-amino-dimethylaniline], 1908, A., i, 779.

preparation of succinylisalicylic acid and its methyl homologues, 1908, A., i, 798.

the replacement of a sulphonic group by hydroxyl in anthraquinonae-sulphonic acid and its derivatives, 1908, A., i, 807.

preparation of 1:5- and 1:8-hydroxyanthraquinonesulphonic acids, 1908, A., i, 807.

preparation of p-dibromoanthraquinand dibromochryszazin-disulphonic acids, 1908, A., i, 808.

Farbenfabriken vorm. Friedrich Bayer & Co., preparation of diaminoanthrarufunidisulphonic acid, 1908, A., i, 808.

preparation of the anhydrides of acylsalicylic acids, 1908, A., i, 984.

preparation of a derivative of gallo cyanin, 1908, A., i, 1001.

preparation of ethyl glyoxylate by the reduction of ethyl oxalate, 1909, A., i, 204.

preparation of anthranol and its derivatives from the corresponding anthraquinones by reduction with metals and acid, 1909, A., i, 225.

replacement of halogen by hydroxyl in substituted anthraquinones, 1909, A., i, 242.

preparation of thiocyanogen derivatives of anthraquinone, 1909, A., i, 244.

doxygenation of anthraquinones, 1909, A., i, 247.

preparation of mixed carbonates from hydroaromatic alcohols and ethyl salicylate, 1909, A., i, 244.

preparation of santalyl ethers, 1909, A., i, 247.

[preparation of pyridones of the anthracene series], 1909, A., i, 256.

preparation of amino-, alkylamino-, or arylamino-anthrapyridones, 1909, A., i, 263.

[production of iminazoles from 1:8-naphthylenediamine], 1909, A., i, 263.

preparation of o-diaminopyrimidines containing halogenated acyl groups, 1909, A., i, 270.

preparation of 5-oximino-4-iminopyrimidine derivatives, 1909, A., i, 270.

production of azoxy- and azo-compounds of the benzene series, 1909, A., i, 272.

preparation of alkyl- and aryl-aminoanthraquinones, 1909, A., i, 310.

preparation of O-acetyl derivatives of the aminophenols and aminophthols, 1909, A., i, 339.

preparation of mercaptans of the anthracene series, 1909, A., i, 496.

preparation of mercaptans of the anthraquinone series, 1909, A., i, 496.

[preparation of anthrapyridones], 1909, A., i, 524.

preparation of 2-alkoxy-1-alkylpyrimidines, 1909, A., i, 527.
preparation of phthalimidocatehol ethers, 1909, A., i, 712.
preparation of pyrimidine derivatives, 1909, A., i, 746.
preparation of basic purine derivatives, 1909, A., i, 746.
preparation of alkyl methylenecitrates, 1909, A., i, 880.
preparation of isopropyl p-aminobenzocate, 1909, A., i, 921.
preparation of dithioanthraquinones, 1909, A., i, 941.
[preparation of acyl-3-nitro-p-phenylenediamines], 1909, A., i, 964.
preparation of halogenated nitroanthraquinones, 1910, A., i, 49.
[preparation of thioglucose derivatives of anthraquinone], 1910, A., i, 49.
preparation of xanthine and guanine derivatives containing substituents in position 8, 1910, A., i, 78.
preparation of salts of dibromobehenic acid, 1910, A., i, 215.
preparation of dianthraquinonylphenylenediamine, 1910, A., i, 281.
preparation of β-methyltetramethylenediamine, 1910, A., i, 303.
preparation of halogen and amino-derivatives of aromatic ethers, 1910, A., i, 312.
preparation of aminoacyleatecholes, 1910, A., i, 313.
[preparation of aldehyde derivative of hydroxy-aromatic acids], 1910, A., i, 321.
preparation of sulphur derivatives of anthraquinone, 1910, A., i, 325.
preparation of sulphur and nitrogen derivatives of anthraquinone, 1910, A., i, 338.
[preparation of amino-derivatives of aromatic ethers], 1910, A., i, 373.
preparation of isobutyl p-aminobenzoate, 1910, A., i, 351.
preparation of salts of m-aminobenzaldehyde in the presence of anhydro-alpha-aminobenzaldehyde, 1910, A., i, 390.
preparation of halogen anthraquinone-sulphonic acids, 1910, A., i, 396.
[preparation of aldehyde condensation products], 1910, A., i, 428.
preparation of substituted halogen iminodialkylpyrimidines, 1910, A., i, 444.

preparation of β-methyladipic acid, 1910, A., i, 650.
preparation of methylene ketones, 1910, A., i, 652.
[preparation of dinitromethylpyridinium derivatives], 1910, A., i, 696.
preparation of keto-alcohols, 1910, A., i, 706.
preparation of aromatic alkyl ethers, 1910, A., i, 726.
[preparation of aminoanthraquinone thio-ethers], 1910, A., i, 750.
[preparation of benzoylaminanthraquinones], 1910, A., i, 751.
preparation of phenoxxzone, 1910, A., i, 764.
preparation of a dihydroxycarbazole-disulphonic acid, 1910, A., i, 774.
preparation of pyrimidine derivatives containing mercury, 1910, A., i, 804.
preparation of a double salt of zinc hyposulphite with sodium sulphite, 1910, A., ii, 411.
preparation of octan-γ-dione-α-ol and its homologues, 1911, A., i, 102.
preparation of octendione and its homologues, 1911, A., i, 114.
preparation of a-bromo-a-ethylbutyrylcarbamide, 1911, A., i, 118.
preparation of santalyl alkylaminocetates, 1911, A., i, 137.
preparation of derivatives of ββ-di-alkylpropionic acids, 1911, A., i, 259.
preparation of nitrothioanthrones and their derivatives, 1911, A., i, 450.
[preparation of diaminoacetoxydiphenyl ethers], 1911, A., i, 456.
[preparation of triphenylmethane derivatives], 1911, A., i, 458.
preparation of chloro-substitution products of anthraquinones and of halogenated anthraquinones, 1911, A., i, 466.
preparation of methoxyanthraquinones and their derivatives, 1911, A., i, 469.
the halogenation of indanthren, 1911, A., i, 504.
preparation of tetramethylenediamine [ds-diaminobutane], 1911, A., i, 526.
preparation of soluble compounds from hydroxymercurocarboxylic acids, 1911, A., i, 594.
preparation of oleine alcohols of the general formula OH·CHMe·CR·CH₂, 1911, A., i, 598.
preparation of quaternary ammonium bases, 1911, A., i, 609.
preparation of hydroxyphenylethyl-
-dialkylamines, 1911, A., i, 629.
preparation of hydroxyphenylethyl-
amines and their alkyl ethers, 1911, A., i, 629.
preparation of sulphaminobenzoyl-
aminophenols and their sulphonic acids, 1911, A., i, 639.
preparation of phenyl esters of iodo-
-paraffin acids, 1911, A., i, 639.
preparation of mixed formic acetic esters of aloins, 1911, A., i, 659.
preparation of formyl derivatives of morphine alkaloids, 1911, A., i, 668.
preparation of esters of cinnamic acid, 1911, A., i, 828.
preparation of m-hydroxy-β-phenyl-
-propiolic acid alkyl ethers and their salts, 1911, A., i, 865.
[preparation of anthracene derivatives], 1911, A., i, 903.
[preparation of methylindanthren], 1911, A., i, 925.
preparation of nininoalkyl derivatives of azimino-o-toluidides, 1911, A., i, 925.
the partial or total replacement of halogens by hydrogen in polyhalo-

genated aminoanthraquinones, 1911, A., i, 995.
preparation of substances resembling caoutchouc, 1911, A., i, 1003.
preparation of 1-aryl, alkyl, or alkyl-
aryl substituted hydastinines, 1911, A., i, 1015.
preparation of nuclear substituted mercury derivatives of halogenated or nitrated phenols, or halogenated nitrophenols, 1911, A., i, 1056.
preparation of benzoylanhydroxy-
-anthraquinones, 1912, A., i, 118.
preparation of epichlorhydrin from di-
chlorohydrin and alkalis, 1912, A., i, 155.
preparation of bromoacetylisocarbamidc ethers, 1912, A., i, 169
preparation of dihalogenated nitroanthraquinones, 1912, A., i, 995.
preparation of arylamineanthraquinone derivatives, 1912, A., i, 995.
preparation of substituted 2:3-diphenylquinoline-4-carboxylic acid, 1912, A., i, 1018.
preparation of pyrazolone derivatives in the benzene series containing a free hydroxyl group, 1912, A., i, 1022.
preparation of derivatives of barbituric acid, 1912, A., i, 1024, 1025.
preparation of mono- and di-alkylbarbituric acids, 1912, A., i, 1025.

phthalylhydroxylamic acid, 1903, A., i, 491.
preparation of a cyclogeraniolanehydroxyacarboxylic acid, 1903, A., i, 502.
preparation of alkyl and aryl derivatives of chloroaminofluoran, 1903, A., i, 509.
acyl derivatives of aminocaffeine, 1903, A., i, 512.
compounds of dimethylaminophenyl-dimethylpyrazolone with camphoric acid, 1903, A., i, 530.
separation of glycine and its homologues from inorganic compounds, 1903, A., i, 607.
preparation of a cyclogeranioleneacarboxylic acid, 1903, A., i, 627.
electrolytic preparation of azobenzene, 1903, A., i, 662.
preparation of phenylglycine-o-carboxylic acid, 1903, A., i, 754, 832.
cyclogeraniolenealdehyde, 1903, A., i, 764.
[substituted phenyl benzyl ethers], 1903, A., i, 817.
dinitrosulfonic acids of the dialkyl ethers of anthracrysone, anthraflavic acid, and isoanthraflavic acid, 1903, A., i, 840.
preparation of dimethyl- and diethylaminophenylmethylpyrazolone, 1903, A., i, 866.
preparation of anthranilic acid and N-alkylated anthranilic acids, 1904, A., i, 50.

preparation of bromoindigotin, 1904, A., i, 57, 167, 500.
0-methoxyanthraquinonesulphonic acids, 1904, A., i, 68.
preparation of caffeine-ethylendiamine, 1904, A., i, 85.
azo-compounds from aziminonnaphthalenesulphonic acids, 1904, A., i, 123.
phenylene- and tolylene-diglycines, 1904, A., i, 153.
preparation of N-arylanthraquinic acids, 1904, A., i, 159.
preparation of indoxyl from formylmethylanthraquinic acid, 1904, A., i, 167.
preparation of diphenylamine-2:2'-dicarboxylic acid, 1904, A., i, 168.
preparation of alkylated 4-amino-1-phenyl-2:3-dimethyl-5-pyrazolones, 1904, A., i, 196.
{β-naphthazo-α-naphthol-5-sulphonic acid], 1904, A., i, 207.
azo-compound from 3:6-diaminoquinol dialkyl ethers and 1:8-dihydroxy-naphthalene-3:6-disulphonic acid ["chromotrope" acid], 1904, A., i, 208.
electrolytic preparation of fatty amines, 1904, A., i, 295.
preparation of hydroxydiaryl sulphides, 1904, A., i, 313.
preparation of diphenylaminedicarboxylic acids, 1904, A., i, 317.
reduction of indigo and its bromoderivatives, 1904, A., i, 318.
benzeneazo-diphenylamine-o-carboxylic acid and its homologues, 1904, A., i, 353.
preparation of 2:6-tetrazo phenol-4-sulphonic acid, 1904, A., i, 353.
nutal soluble silver compounds of gelatoses, 1904, A., i, 357.
preparation of chlorinated toluenesulphonic acids, 1904, A., i, 390.
[cyclohexane derivatives], 1904, A., i, 411.
soluble crystalline derivatives of amino-carboxylic esters, 1904, A., i, 413.
preparation of leuco hydroxyanthraquinones, 1904, A., i, 434.
preparation of amino-5- and 8-hydroxyanthraquinones, 1904, A., i, 435, 512.
blue dyes of the anthraene series, 1904, A., i, 439.
INDEX OF AUTHORS.

Farbwerke vorm. Meister, Lucius, & Brüning, disazo-compounds from 2:6-diaminophenol-4-sulphonic acid, 1904, A., i, 459.

preparation of indigo-tin, 1904, A., i, 500.

4-nitroalizarin 2-alkyl ethers, 1904, A., i, 513.

[azo-compounds of phenylmethylpyrazolone], 1904, A., i, 538.

preparation of phenylaminoacetonitrile, 1904, A., i, 572.

bromo-derivatives of indigo-tin, 1904, A., i, 586.

[azo-derivatives of phenanthranilic acid], 1904, A., i, 637.

5-nitro-2-aminotoluene-4-sulphonic acid, 1904, A., i, 662.

polyhydroxyanthraquinonequinolines, 1904, A., i, 656.

electrolytic oxidation of organic compounds, 1904, A., i, 813.

a chloro-1:8-dihydroxyanthralene-3:6-disulphonic acid, 1904, A., i, 882.

[aminotolyliothiocarbamide], 1904, A., i, 889.

alkylamino-o-dihydroxyacetophenones (alkylaminoacacetocatechols), 1904, A., i, 873.

[o-glycollylamino benzoic acid and the synthesis of indigo], 1904, A., i, 881.

bromination of indigo-tin, 1904, A., i, 894, 1019.

preparation of acridinium dyes, 1904, A., i, 927.

5-chloro-4-amino-1-phenyl-3-methylpyrazole, 1904, A., i, 940.

[1-acetylamino-2:4-diaminonaphthalene], 1904, A., i, 943.

diazotisation of sulphonated n-diamines, 1904, A., i, 953.

[coloured quinoline derivatives], 1904, A., i, 1048.

[hydroxypheynl derivatives of 4:4'-diaminodiphenylamine], 1904, A., i, 1061.

[action of sulphur on tolylenedicarbamide], 1904, A., i, 1062.

o-chloro-m-nitrotoluene-4-sulphonic acid, 1905, A., i, 124.

aminophenylcatechol, 1905, A., i, 127.

dialkyl ethers of anthranilhydrazine derivatives, 1905, A., i, 146.

p-nitrobenzenearo-o-toluenearo-2-napthol, 1905, A., i, 162.

4:4'-diaminoformyl-(acetyl)-diphenylamine, 1905, A., i, 191.

[2:2'-diamino-4'-oxalotoluidide], 1905, A., i, 249.

Farbwerke vorm. Meister, Lucius, & Brüning, amino-alcohols of the formula C\(_6\)H\(_5\)(OH)\(_2\)CH\((OH)\)CH\(_2\)-N\(_X\), 1905, A., i, 436.

amino-derivatives of anthraquinone, 1903, A., i, 477.

indophenol derivatives from \(p\)-chlorophenol, 1905, A., i, 530.

sulphur dye from 2:2'-diamino-4'-oxalotoluidide, 1905, A., i, 540.

purification of o-nitrotoluene, 1905, A., i, 639.

condensation products of primary aromatic amines with formaldehyde, 1905, A., i, 643.

cyclogeraniolidenediactone, 1905, A., i, 653.

dinitrodiaminoanthraquinonedieoxyacids, 1905, A., i, 653.

1-hydroxyanthraquinone-5-sulphonic acid, 1905, A., i, 653.

preparation of o-dimethoxyanthraquinones, 1905, A., i, 654.

oxidation of aromatic hydrocarbons by means of cerium peroxide, 1905, A., i, 697.

[methoxy-derivatives of anthraquinone], 1905, A., i, 709.

[azo-dyes from \(\beta\)-ketones and \(\beta\)-ketonic esters], 1905, A., i, 723.

tetrazophenolsulphonic acid, 1905, A., i, 725.

red sulphur dyes from resorcinol, 1905, A., i, 913.

aminoazo-dyes from chlorochromotropic acid, 1905, A., i, 953.

soluble preparations of \(o\)-nitronepropyl-\(\beta\)-lactomethylketone, 1906, A., i, 97.

preparation of \(o\)-methyl-\(\beta\)-napthol, 1906, A., i, 257.

[3:5-dichloro-4'-dimethylamino-4'-hydroxydiphenylamine], 1906, A., i, 308.

stable compounds of hyposulphites with ketones, 1906, A., i, 400.

preparation of blue and violet dyes by oxidation, 1906, A., i, 444.

azo-dye from \(m\)-aminobenzeneazo-\(m\)-toluidine, 1906, A., i, 486.

sulphonation of 2-chloro-3-nitrobenzaldehyde with alkali sulphates, 1906, A., i, 512.

preparation of indoxyl and its homologues, 1906, A., i, 574, 749.

preparation of dianiminodiaphthazines, 1906, A., i, 543.

preparation of \(o\)-nitro-\(\beta\)-methoxyanthraquinones, 1906, A., i, 677.
Farbwerke vorm. Meister, Lucius, & Brüning, stable derivatives of the active base of the extract of suprarenal glands, 1906, A., i, 691.

colourless soluble salts of rosaline, 1906, A., i, 712.
[colouring matters of the cyanine series], 1906, A., i, 716.
zinc formaldehydesulphoxylate, 1906, A., i, 802.

preparation of the alkamine esters of o- and m-aminobenzoic acids, 1906, A., i, 845.

preparation of the alkamine esters of p-aminobenzoic acid, 1906, A., i, 847.

the employment of vanadium salts in the electrolytic oxidation or reduction of organic compounds, 1906, A., i, 862.

preparation of chlorinated quinizarins, 1906, A., i, 867.

colouring matters of the quinoline series, 1906, A., i, 886.

preparation of 5:5-dialkylbarbituric acids, 1906, A., i, 894; 1907, A., i, 447.

preparation of alkylated aryl-p-diaminoanthraquinonesulphonatic acid, 1906, A., i, 963.

oxidation of substituted aromatic hydrocarbons, 1907, A., i, 202.
mixed anhydrides of tannic and cinnamic acids, 1907, A., i, 232.

preparation of o-hydroxyazo-derivatives, 1907, A., i, 263.

[an azopyrazolone derivative], 1907, A., i, 264.

preparation of phenylglycine and its homologues. I. and II., 1907, A., i, 312.

preparation of green triphenylmethane derivatives, 1907, A., i, 355.

[azo-derivative of anthranilic acid], 1907, A., i, 362.

preparation of azo-derivatives of the pyrazolone group, 1907, A., i, 363.

preparation of the alkylamino-esters of p-aminobenzoic acid, 1907, A., i, 923.

preparation of formaldehydesulphoxylates, 1907, A., i, 1009.

preparation of leucohydroxyanthraquinone, 1907, A., i, 1057.

preparation of alkylated 4:8-diaminoanthrarufins, 1907, A., i, 1057.

[preparation of w-dianilinodimethyltetrahydroxyanthraquinone and 3p-tetramethylamino4benzyltetrahydroxyanthraquinone], 1907, A., i, 1085.

preparation of 4-antipyrilmethylamine, 1907, A., i, 1086.

[combination of o-diazo-oxides with 1:8-dihydroxydodecane-3:8-disulphonic acid], 1907, A., i, 1090.

production of a sparingly soluble [basic] zinc formaldehydesulphoxylate, 1908, A., i, 133.

preparation of benzyolalkylaminoalkohols, 1908, A., i, 167.

preparation of alkylaminoalkylamino-cinnamates, 1908, A., i, 169.

preparation of alkylaminoalkyl esters of salicylic acid, 1908, A., i, 176.

[preparation of amino-derivatives of anthracrysonone], 1908, A., i, 192.

[thio-derivatives of anthraquinone], 1908, A., i, 192.

interaction of sodium sulphide and the hydroxyphenazines, 1908, A., i, 219.

[preparation of safraninones containing aliphatic groups], 1908, A., i, 225.

preparation of alkylaminoalkyl benzocates, 1908, A., i, 266.

preparation of quinoline derivatives of the anthraquinone series, 1908, A., i, 365.

preparation of aromatic ethanolamines, 1908, A., i, 418.

preparation of dimethyl ether of p-nitrochrysaizin, 1908, A., i, 428.

preparation of 4-dimethylamino-1-phenyl-2:6-dimethyl-5-pyrazolone, 1908, A., i, 471.

preparation of alkylamino-alkyl p-aminobenzocates, 1908, A., i, 638.

preparation of w-nitroacetocatechol, 1908, A., i, 655.

preparation of 3-nitro-6-aminophenol-4-sulphonic acids, 1908, A., i, 785.

preparation of alkylthiosalicyclic o-alkylthiobenzocids, 1908, A., i, 797; 1909, A., i, 232.

[preparation of 8-carboxymethylmethylo-naphthoic acid], 1908, A., i, 797.
Farbwerke vorm. Meister, Lucius, & Brüning, preparation of hydroxyanthraru[m and hydroxychrysazin I. and II., 1908, A., i, 807.
preparation of phenanthroanthraquinone, 1908, A., i, 808.
preparation of red colouring matters of the thionindigo-red series, 1908, A., i, 987.
preparation of 3-oxithionaphthen, 1908, A., i, 1003.
preparation of a dihydroxithionaphthenecarboxylic acid, 1908, A., i, 1004.
preparation of crystalline salts of o-dihydroxyphenylethanomethylamine, 1909, A., i, 229.
preparation of 2-nitro-4-aminobenzoic acid, 1909, A., i, 230.
preparation of substituted o-carboxyphenylthioglycollic acids, 1909, A., i, 234.
preparation of 5-alkyloxy-2-acetyl-S-oxythionaphthen, 1908, A., i, 807.
preparation of phloroglucin and its carboxylic acid, 1908, A., i, 1004.
preparation of carboxylic acids, 1909, A., i, 231, 923.
preparation of substituted o-carboxyphenylthioglycollic acids, 1909, A., i, 234.
preparation of 5-alkyloxy-2-acetyltoluenesulphonamides, 1909, A., i, 240.
[preparation of alkylaminooanthraquinone derivatives], 1909, A., i, 243.
[preparation of leuco-derivatives of diaminanthraquinones from the corresponding hydroxylic compounds], 1909, A., i, 243.
preparation of arylnaphthoquinones, 1909, A., i, 243.
preparation of leuco-derivatives; substituted "thioindigotin," 1909, A., i, 251.
preparation of 1-aryl-2-4-dialkyl-3-halogenmethyl-5-pyrazolones, 1909, A., i, 257.
preparation of anthrapyrimidones, 1909, A., i, 263, 264.
preparation of hydroxyarylsilic acids, 1909, A., i, 297.
preparation of p-arylglucinearlsic acids, 1909, A., i, 280.
preparation of sulphur derivatives of p-aminophenylarsinic acid, 1909, A., i, 280.
preparation of arsenophenols, 1909, A., i, 347; 1911, A., i, 1055.
preparation of derivatives of phenylarsenious oxide and arsenobenzene, 1909, A., i, 347.
preparation of m-aminophenylarsinic acid (m-arsanic acid), 1909, A., i, 448.

preparation of optically active 6-di-hydroxyphenylalkylamines, 1910, A., i, 664.

[preparation of halogen derivatives of 6-amino-3-keto(1)-thionaphthen and nitrosothanes], 1910, A., i, 693.

preparation of acetylchboroanithraquinones, 1910, A., i, 750.

preparation of β-anthraquinonylcarbinilide from β-aminoanthraquinone, 1910, A., i, 750.

the nitration of diazonium compounds, 1910, A., i, 791.

preparation of compounds of unsaturated acids with aldehyde, ketones, and formic acid, 1911, A., i, 107.

preparation of nitrophenyl mercaptans, 1911, A., i, 441.

preparation of ω-chlorobenzo-trichloride, 1911, A., i, 445.

preparation of 1:2-diaminoanthraquinone, 1911, A., i, 469.

preparation of alylanthraquinonyl-carbamides, 1911, A., i, 499, 995.

preparation of naphth-anthraquinone-azines, 1911, A., i, 509.

preparation of anthraquinonylglycines, 1911, A., i, 548.

preparation of a nitro-1-aminophenyl-4-arsenic acid, 1911, A., i, 594, 760.

preparation of 2:2'-dianthraquinonyl-carbamide, 1911, A., i, 655.

preparation of phenylbenzyldimethyl-ammoniumdisulfonic acid, 1911, A., i, 852.

preparation of 1:4-dihydroxynaphthalene monalkyl ethers, 1911, A., i, 854.

preparation of p-dialkylaminobenzyl-1-aminoanthraquinone, 1911, A., i, 995.

preparation of aminohydroxyarylarinic oxides, 1911, A., i, 1055.

preparation of Dnitrohydroxyarylarinic acids, 1911, A., i, 1056.

preparation of dianthraquinonyl- or polyanthraquinonyl-carbamides, 1912, A., i, 119.

[preparation of substituted pyrazolones], 1912, A., i, 196.

Farbwerke vorm. Meister, Lucius, & Brüning, preparation of anthraquinone derivatives containing sulphur, 1912, A., i, 197.

[preparation of benzyloaminoanthraquinone derivatives], 1912, A., i, 197.

preparation of α-hydroxyanthraquinone alkyl ethers, 1912, A., i, 476.

preparation of mercaptans in the anthraquinone series, 1912, A., i, 477.

preparation of isatin-naphthalides, their homologues and substitution products, 1912, A., i, 500.

preparation of phenylbenzyldimethyl-ammoniumsulphonic acid, 1912, A., i, 545.

preparation of aminoanthraquinonyl-triazoles, 1912, A., i, 588.

preparation of nitrohydroxyarylarinic acid, 1912, A., i, 595.

preparation of neutral aqueous soluble derivatives of 3:3'-diamino-4:4'-dihydroxyarsenobenzene, 1912, A., i, 595.

preparation of 5-nitro-2-aminophenyl-1-arsenic acid, 1912, A., i, 595.

preparation of p-amino-m-hydroxyarylarinic acids, 1912, A., i, 596.

preparation of aminohydroxy-derivatives and homologues of arsenobenzenes, 1912, A., i, 596.

preparation of p-nitroacetacetonilide, 1912, A., i, 759.

[preparation of 14-chlorocoeppamidine and allied compounds], 1912, A., i, 794.

[preparation of benzyl-a-isatinanilide], 1912, A., i, 801.

preparation of hydroxyanthrimides, 1912, A., i, 996.

preparation of 2:5-diaminophenyl-1-arsenic acid, 1912, A., i, 1044.

preparation of neutral readily soluble derivatives of 4:4'-dihydroxy-3:3'-diaminobenzene, 1912, A., i, 1044.

preparation of pure nitric oxide by an electrolytic method, 1912, A., ii, 551.

alum from Mormugao, India, 1909, A., ii, 411.

three new manganese minerals: vredenburgite, sitaparite, and juddite, 1909, A., ii, 491.

Fernandez, Enrique, the pancreas of the elephant, 1910, A., ii, 427.

Fernandez, Obdulio, Spanish oil of turpentine, 1910, A., i, 399.

a reaction of noic acid, 1910, A., i, 1119.

iodometric estimation of sugar in urine, 1911, A., ii, 664.

Fernbach, Auguste, composition of potato-starch, 1904, A., i, 294.

influence of the reaction of the medium on the activity of diastases, 1906, A., i, 327.

biological degradation of carbohydrates, 1911, A., ii, 62.

new form of soluble starch, 1912, A., i, 832.

Fernbach, Auguste, and Marcel Schen, influence that the reaction [of the medium] exerts on certain properties of malt macerations, 1911, A., i, 98.

the mechanism of proteolastic enzymes, 1911, A., i, 824.

Fernbach, Auguste, and Jules Wolff, coagulation of starch, 1904, A., i, 374.

amylocculose formed by the action of diastase, 1904, A., i, 374.

diastase coagulation of starch, 1905, A., i, 164.

analyse between starch coagulated by amylocoagulase and pecta starch, 1905, A., i, 574.

influence of liquefaction of starch on its transformation by saccharifying diastases, 1905, A., i, 624.

the almost complete conversion into maltose of the dextrins obtained by the saccharification of starch, 1906, A., i, 484.

mechanism of the influence of acids, bases, and salts in the liquefaction of starch paste, 1906, A., i, 804.

Fernekes, Gustave, action of sodium and potassium amalgams on various aqueous solutions, 1904, A., ii, 163.

action of amalgams on solutions, 1905, A., ii, 33.

potassium mercuric ferrocyanide, 1906, A., i, 149.

ferricyanides of mercury, 1906, A., i, 487.

Ferns, John, and Arthur Lapworth, the preparation and properties of sulphonic esters, 1912, T., 273 ; P., 18, 263.

Ferns, John. See also (Miss) Mary Elizabeth Dobson.

Ferraboschi, Frederic, double sulphate of granidine and aluminium, 1908, A., i, 720.

Ferraboschi, Frederic, the oxidation of mucic acid in presence of iron, 1909, T., 1248 ; P., 178.

the production of ozone in the interaction between hydrogen dioxide and sulphur dioxide; preliminary note, 1909, P., 178.

Ferrari, C., relation between the utilisation of reserve carbohydrates and the flowering of Ranunculus bulbosus, 1909, A., ii, 697.

Ferrari, Eugenio. See Giuseppe Oddo.

Ferrari, G. See Giacomo Carrara.

Ferrari, L. See Giuseppe Bruni.

Ferrari, Ugo. See Carl Dietrich Harries.

Ferrario, Emos, new synthesis of citric acid, 1908, A., i, 758.

mixed anhydrides, 1910, A., i, 707.

phenothioquin, 1911, A., i, 555.

Ferrario, Emos, and P. Fagetti, hydrocarbons, C6H12; new synthesis of tetramethylmethane [dimethylpropane], 1909, A., i, 77.

the Grignard reaction; syntheses of fluoror, 1911, A., i, 316.

Ferrario, Emos. See also Herman Docker.

Ferraro, Annibale, estimation of phosphates in urine, 1908, A., ii, 733.

microscopic analyses of soluble, crystallizable substances [salicylic acid, caffeine], 1909, A., ii, 191.

Ferraro, Annibale, and Arturo Carobbio, modified Bettendorf's reagent, 1906, A., ii, 490.

Ferratini, Adolfo, double salts of hydrazine, 1912, A., ii, 345.

simple method of applying Boedeker's reaction, 1911, A., ii, 226.

microchemical investigation of alcohols, 1912, A., ii, 607.

Ferrer Hernández, Jaime, and Angel del Campo y Cardan, Delepine's phosphorescent esters, 1911, A., i, 174.

analytical application of certain xanthates, 1911, A., ii, 825.

Ferrer Hernández, Jaime. See also Angel del Campo y Cardan.

Ferreri, G. See G. Charrier.

Ferrero, Efsio, and Mario Nozari, absorption spectra of solutions of chrome alum, 1905, A., ii, 493.
Ferrero, R. See Angelo Angeli and Vincenzo Castellana.

Ferris, William S. See Oswald Schreiner.

Ferrulli, Felice. See Luigi Francesconi and Gennaro Minunni.

Ferry, Edwin L. See Thomas Burr Osborne.

Ferry, Paul, improved apparatus for the volumetric estimation of nitrogen, 1912, A., ii, 486.

Ferry, Paul. See also Georges Arth.

Ferssen, G. G., et al., action of magnesium on a mixture of allyl bromide and pulegone (synthesis of 1-methyl-3-allyl-4-isopropylidene-cyclohexan-3-ol), 1910, A., i, 633.

Fersmann, Alfred, stolperite from the Rhone, 1907, A., ii, 561.

Fersmannite group, 1908, A., ii, 603.

Ferssen, G. G., action of magnesium on a mixture of allyl bromide and pulegone (synthesis of 1-methyl-3-allyl-4-isopropylidene-cyclohexan-3-ol), 1910, A., i, 633.

Fersmann, Alex., paligorskite, 1910, A., ii, 244.

Fersmannite, paligorskite, 1910, A., ii, 603.

Ferssen, G. G., von, action of magnesium on a mixture of allyl bromide and pulegone (synthesis of 1-methyl-3-allyl-4-isopropylidene-cyclohexan-3-ol), 1910, A., i, 633.

Fersmannite, paligorskite, 1910, A., ii, 244.

Fersmann, Alex., paligorskite, 1910, A., ii, 603.

Fersmann, Alex., qualitative composition of the earth's crust in percentage numbers of atoms, 1912, A., ii, 447.

Féry, Charles, heat and light radiations of certain oxides, 1903, A., ii, 124.

Féry, Charles, determination of boiling points of copper and zinc, 1903, A., ii, 293.

Féry, Charles, the temperature of flames, 1904, A., ii, 13.

Féry, Charles, and C. Chèneveau, a new pyrometer, 1904, A., ii, 467.

Féry, Charles, and Eugène Tassilly, a new spectrophotometer and its application in analytical chemistry, 1912, A., ii, 1000.

Fésier, Gustav. See Otto Dimroth.

Fetsch, William C. See Thomas Evans.

Fetterolf, Daniel W., the Lloyd reaction as applied to heroin, and veratrine, 1907, A., ii, 825.

Fetvadjian, Ara, See Fritz Ullmann.

Fedzer, K. See Edgar Wedekind.

Feucht, Heinrich. See Otto Dimroth.

methylcarbonato-derivatives of phenolcarboxylic acids and their use for synthetical operations, 1908, A., i, 892; 1909, A., i, 161, 309. A.
hydrolysis of guanino-acids, 1909, A., i, 366. A.
Fischer, Emil, and Emil Abderhalden, digestion of proteins by the pancreas enzymes, 1903, A., ii, 666. A.
synthesis of polypeptides. V. Derivatives of proline (pyrrolidine-2-carboxylic acid), 1904, A., i, 917. A.
Fischer, Emil, and Heinrich Koehler, synthesis of polypeptides. XIX., 1909, A., i, 684. A.
Fischer, Emil, and Herbert Blumenthal, synthesis of a-amino-\(\gamma\)-hydroxybutyric acid, 1907, A., i, 191. A.
Fischer, Emil, and Reginald Boehner, formation of proline by the hydrolysis of gelatin with barium hydroxide, 1910, A., i, 345. A.
Fischer, Emil, and Alfred Dilthey, 5:5-dialkylbarbituric acids and the ureides of the dialkylacetic acids, 1905, A., i, 35. A.
INDEX OF AUTHORS.

Fischer, Emil, and Otto Fischer, derivatives of triphenylmethane, 1904, A., i, 568.

Fischer, Emil, and Erich Flatau, conversion of active α-bromopropionic acid into active methylsuccinic acid, 1909, A., i, 205.

Fischer, Emil, and Ferdinand Gerlach, pyrroline-2-carboxylic acid, 1912, A., i, 889.

Fischer, Emil, and Albert Göddertz, synthesis of γ-amino-α-hydroxybutyric acid and its trimethyl derivative, 1911, A., i, 19.

Fischer, Emil, and Reinhard Groh, production of some amino-acids from phenylhydrazones of ketonic acids by aluminium amalgam, and preparation of the optically active γ-aminovaleric acids, 1911, A., i, 773.

Fischer, Emil, and Bureckhardt Helferich, new synthetic glucoses, 1911, A., i, 802.

Fischer, Emil, Kurt Hess, and Alex. Stahlschmidt, conversion of dihydrofurandicarboxylic acid into hydroxy-pyridinecarboxylic acid, 1912, A., i, 901.

Fischer, Emil, and Kurt Hoesch, methylcarbonato-derivatives of phenolicarboxylic acids and their use for synthetic operations VII. Didepsides of hydroxynaphthoic, ferulic, and o-coumaric acids; methyl derivatives of orsellic acid, 1912, A., i, 859.

Fischer, Emil, and Walter Abraham Jacobs, resolution of racemic serine into the optically active components, 1906, A., i, 807.

Fischer, Emil, and Wilhelm Leuchs, synthesis of polypeptides. XVIII. Derivatives of aspartic acid, 1907, A., i, 486.

Fischer, Emil, and Adolf Krämer, preparation of α-amino-γδ-dihydroxy-n-valeric acid, 1908, A., i, 858.

Fischer, Emil, Walter Kropp, and Alex Stahlschmidt, derivatives of glutamic acid, 1909, A., i, 368.

Fischer, Emil, and Hermann Leuchs, synthesis of serine, l-glucosaminic acid, and other hydroxyamino-acids, 1903, A., i, 12.

Fischer, Emil, and Efim Semen London, formation of proline in the digestion of gliadin, 1911, A., ii, 905.

Fischer, Emil, and Andreas Luniaik, synthesis of polypeptides. XXXII. Derivatives of l-proline and of phenylalanine, 1910, A., i, 136.

Fischer, Emil, Koichi Matsubara, and Steygried Hilpert, resolution of α-aminoisovaleric acid into its optically active components, 1906, A., i, 561.

Fischer, Emil, and Josef von Mering, new class of narcotics, 1903, A., i, 552.

Fischer, Emil, and Annibale Moresci, the Walden rearrangement. VIII. Conversions of 6-glutamic acid, 1912, A., i, 836.

Fischer, Emil, and Erich Otto, synthesis of some dipeptide derivatives, 1903, A., i, 607.

Fischer, Emil, synthesis of polypeptides, 1903, A., i, 800.

Fischer, Emil, and Otto Pfeiffer, methylcarbonato-derivatives of phenolcarboxylic acids and their use for synthetic operations. VI. Partial methylation of phenolcarboxylic acids, 1912, A., i, 559.

Fischer, Emil, transformation of 6-vinylacrylic acid into diaminovaleric acid, 1905, A., i, 863.

Fischer, Emil, stereochemistry of the 2:5-diketopiperazines, 1906, A., i, 457; 1907, A., i, 18.

Fischer, Emil, and Georg Reif, synthesis of polypeptides. XXVII. (II.) Derivatives of proline [pyrrolidine-2-carboxylic acid], 1908, A., i, 1007.

Fischer, Emil, and Helmuth Schiehler, Walden's inversion, 1908, A., i, 324, 857; 1909, A., i, 359.

Fischer, Emil, synthesis of polypeptides. XXVII. (III.) Derivatives of active valine, 1908, A., i, 957.

Fischer, Emil, and Helmut Schiehler, and Reinhard Groh, the Walden inversion. VI. 6-Amino-butyric acid, 1911, A., i, 527.

Fischer, Emil, and Fritz Schlotterbeck, transformation of sorbic acid into amino-acids, 1904, A., i, 549.

Fischer, Emil, and Julius Schmidlin, synthesis of polypeptides. XI. Dipeptides of phenylglycine with glycine, alanine, asparagine, and aspartic acid, 1905, A., i, 694.

Fischer, Emil, phenylbutyric acids and their a-amino-derivatives, 1906, A., i, 584.

Fischer, Emil, and Walter Schoeller, synthesis of polypeptides. XXII. Derivatives of 1-phenylalanine, 1907, A., i, 1037.

Fischer, Emil, and Hans Schrader, compounds of quinones with esters of amino-acids, 1910, A., i, 270.

Fischer, Emil, and Arnold Schulze, synthesis of polypeptides. XVI. Derivatives of d-alanine, 1907, A., i, 295.

Fischer, Emil, and Max Darmein Simmer, attempts at an asymmetric synthesis, 1903, A., i, 696.

Fischer, Emil, and Donald D. von Slyke, products from pyrrole-2-carboxylic acid, 1911, A., i, 1020.

Fischer, Emil, Hermann Strauss, and Josef Severin, synthesis of phenolic glucosides, 1912, A., i, 884.

Fischer, Emil, synthesis of polypeptides. VII. Derivatives of cystine, 1905, A., i, 30.

Fischer, Emil, synthesis of polypeptides. X. Polypeptides of the diamino- and hydroxyamino-acids, 1906, A., i, 73.

Fischer, Emil, and Otto Warburg, synthesis of polypeptides. XI. Glycyl-leucine, alany-leucine, leucyl-leucine, glycylalanyl-leucine, and active alanylglucose, 1905, A., i, 690.

Fischer, Emil, synthesis of polypeptides. XI. Optically active 6-bromopropionic acid, 1905, A., i, 692.

Fischer, Emil, and Otto Warburg, the Walden inversion. V. Optically active 6-amino-6-phenylpropionic acid, 1910, A., i, 622.
Fischer, Emil, and Oskar Weichhold, resolution of aminophenylacetic acid into optically active constituents, 1908, A., i, 419.

determination of the heat of combustion of organic compounds by use of the platinum resistance thermometer, 1908, A., ii, 155.

Fischer, Emil, and Karl Zach, syntheses of bases of the sugar group, 1911, A., i, 117.

new anhydrides of dextrose and glucosides, 1912, A., i, 239.

new transformations of anhydride, 1912, A., i, 678.

e-amino-α-guanidinohexoic acid, 1910, A., i, 305.

additions to the papers on e-amino-α-guanidinohexoic acid and new synthesis of aminohydroxy-acids and of piperidone derivatives, 1910, A., i, 612.

derivatives of cellobiose, 1910, A., i, 718.

Fischer, Ernst, a new pyknometer pipette, 1904, A., ii, 384.

Fischer, Ernst. See also Julius Schmidt.

Fischer, Franz, valvular action and pulverisation of copper anodes, 1903, A., ii, 587.

anodic behaviour of copper and aluminium, 1904, A., ii, 534.

transition resistance and polarisation at the aluminium anode, 1905, A., ii, 6.

blue aluminium compounds deposited on the aluminium anode, 1905, A., ii, 252.

action of ultra-violet light on glass, 1905, A., ii, 320.

chemical transfer of metallic potentials and the chemical solution pressure of metals, 1905, A., ii, 501.

Fischer, Franz, mercury arc lamp with quartz jacket suitable for chemical purposes, 1905, A., ii, 568.

course of chemical reactions at high temperatures, 1907, A., ii, 72.

preparation of argon from air by means of calcium carbide, 1907, A., ii, 344.

theory of volatilisation by atomic rays, 1909, A., ii, 718.

process of rapidly forming lead-accumulator plates by means of phosphoric acid and phosphates, 1910, A., ii, 576.

formation of ozone at stationary linear electrodes, 1909, A., ii, 227.

conversion of oxygen into ozone at high temperatures and the oxidation of nitrogen, 1906, A., ii, 224.

Fischer, Franz, and Otto Hähnel, volatilisation of cathodes in attenuated gases, 1908, A., ii, 653, 800.

chemical or physical theory of volatilisation (of cathodes), 1908, A., ii, 925.

preparation of pure argon and nitrogen, 1910, A., ii, 608.

Fischer, Franz, and George Illovici, products of the arc and spark electric discharge in liquid argon, 1908, A., ii, 1034.

products of the arc and spark electric discharge in liquid argon II. Experiments with hydrogen, titanium, tin, lead, antimony, and bismuth, 1909, A., ii, 139.

products of the arc and spark electric discharge in liquid argon or nitrogen. III. Tin nitride and pyrophoric tin, 1909, A., ii, 232.

Fischer, Franz, and Richard Lepsius, a constant form of a galvanic element with carbon anode (brennstoff element), 1912, A., ii, 1036.

Fischer, Franz, and Hans Ploeze, the electric pressure furnace. I. Construction of the furnace and its temperature-gradient under pressure, 1912, A., ii, 530.

Fischer, Franz, the electric pressure furnace. II. Strontium peroxide from strontium oxide and oxygen, 1912, A., ii, 554.

Fischer, Franz, the electric pressure furnace. III. Preparation of lead peroxide from lead oxide, and the dark brown compound, PbO9, 1912, A., ii, 555.

Fischer, Franz, and Oskar Ringe, formation of hydrogen peroxide, 1908, A., ii, 371.

Fischer, Franz, preparation of argon from air by means of calcium carbide, 1908, A., ii, 688.

Fischer, Franz, and Emil Stecher, rapid electro-analysis under diminished pressure, 1912, A., ii, 1096.

Fischer, Franz, and Karl Thiele, the lead coulombmeter, 1910, A., ii, 681.

Fischer, Franz, Karl Thiele, and Edward B. Maxted, the lead coulombmeter. II., 1910, A., ii, 682.

Fischer, Franz, Karl Thiele, and Emil Stecher, rapid electro-analysis with stirring by bubbling a gas through the solution, 1911, A., ii, 1129.

Fischer, Franz, and Erich Tiede, an electrical tungsten-resistance oven for chemical purposes, 1911, A., ii, 694.

Fischer, Franz. See also Erich Tiede.

Fischer, Georg (Giessen), haemolysis; is there a cocaine haemolysis? 1910, A., ii, 970.

Fischer, Hans (Marburg). See Theodor Zincke.

Fischer, Hans (München), optical behaviour of tryptophan, 1908, A., i, 378.

Fischer, Hans, and Emil Bartholomäus, haemopyrrole, 1912, A., i, 50, 580.

Fischer, Hans, and Erich Bartholomäus, syntheses of phyllopyrrole; chemistry of haemopyrrole, 1912, A., i, 297.

Fischer, Hans, and Paul Meyer, the solution of the haemopyrrole question, 1912, A., i, 646.

Fischer, Hans, and Paul Meyer, synthesis of 2:4-dimethylpyrrole-5-acetic acid and 2:4-dimethylpyrrole-5-propionic acid, 1912, A., i, 647.

Fischer, Hans, and Friedrich Meyer-Beetz, bile pigments. II. Urobilino-ogen of urine and the nature of Ehrlich’s aldehyde reaction, 1911, A., i, 1004.

Fischer, Hans, and Heinrich Röse, bilirubic acid, a new degradation product of bilirubin, 1912, A., i, 575.

Fischer, Hans. See also Emil Fischer and Otto Neubauer.

Fischer, Herbert. See Walter Herz.

essential oil of Bupleurum fructicosum, Linn., 1911, A., i, 1000.
\[\text{A}^{12}\text{-dihydrocumarinaldehyde [and] \(H\)}\text{-phellandrene in the essential oil of Bupleurum fructicosum, 1911, A., i, 1000.}\]
apparatus for continuous working in fractional distillations in a vacuum, 1911, A., ii, 966.
localisation and distribution of the essential oil in "Bupleurum fructicosum" (Linn.), 1911, A., ii, 1025.
action of nitrosyl chloride on the essential oil of Bupleurum fructicosum; nitroso-chlorides; derivatives and decomposition products; dihydrocumarinaldehyde. III., 1912, A., i, 37.
the essential oil of Seseli boconii, 1912, A., i, 123.
localisation and distribution of the essential oil in Seseli boconii and Crithimum maritimum. I., 1912, A., ii, 381.
Franchimont, Antoine Paul Nicolas, action of absolute nitric acid on heterocyclic compounds, 1907, A., i, 395.
sodium alkyl carbonates, 1910, A., i, 4.
monoalkylnitroamines, 1910, A., i, 616.
trinitrophenylalkylnitroamines, 1910, A., i, 617.
nitrotrimethylnitroaminomethylene, 1911, A., i, 19.

**FRA**

**INDEX OF AUTHORS.**

Franchimont, Antoine Paul Nicolas, and J. J. Attema, so-called compounds of salts of sulphocarboxylic acids with sulphuric esters, 1903, A., i, 484.
Franchimont, Antoine Paul Nicolas, and Hilmar Johannes Backer, absorption spectra of the cobalto-derivatives of aliphatic nitroamines, 1912, T., 2256; P., 264.
Franchimont, Antoine Paul Nicolas, and J. V. Dubsky, reaction products of potassium isocyanate and diaminoacetone hydrochloride; amino- and carbamido-propyleneureine [carbamidomethyglyoxalolene], 1911, A., i, 238.
derivatives of \(s\)-diaminoacetone, 1911, A., i, 528.
acetylation of substituted acetamides, 1911, A., i, 529.
the direct nitration of aliphatic imino-compounds, 1912, A., i, 752.
amides of \(\alpha\)- and \(\beta\)-aminopropionic acids, 1906, A., i, 71.
certain derivatives of \(s\)-diaminoacetone (1:3-diaminopropanone), 1907, A., i, 832.
action of concentrated nitric acid on trimethyleneureine and on hydrocracid, 1907, A., i, 877.
nitration and acetylation of glycine anhydride and its methyl homologues: alanine anhydride and \(\alpha\)-aminoisobutyric anhydride, 1908, A., i, 509.
Franchimont, Antoine Paul Nicolas, and Erwin Kramer, derivatives of piperazine, 1910, A., i, 139; 1912, A., i, 391.
Franchimont, Antoine Paul Nicolas, Willem van Ryn, and Hermann Friedmann, piperidides, 1907, A., i, 842.
Franchini, Giuseppe, increased assimilation of lecithin and its behaviour in the organism, 1907, A., ii, 895.
lecithin, choline, and formic acid, 1909, A., ii, 165.
Franchini, Giuseppe, and Luigi Preti, cutaneous respiration, 1908, A., ii, 509.

**Francis, M. de.** See Giovanni Leonardo.

**Francis, Arthur Gordon, and Charles Alexander Keane,** the nitration of acetylenezoic and of stilbenediol diacetates, 1911, T., 344; P., 44.

**Francis, Arthur Gordon.** See also (Sir) Edward Thorpe.

Fritzsche, Oskar. See Johannes D'Ans.

Fritz, Immanuel. See Hugo Kauffmann.

Fritzen, Adolf. See Otto Fischer.

Fritzmann, Ernst. See Alexei E. Paworsky and Otto Sackur.

Fritzmann, I. E., complex compounds of platinum with organic selenides, 1912, A., i, 71.

preparation of a hydroxyquinolinesulphonic acid, 1908, A., i, 208.

preparation of normal salts of o-hydroxyquinoline with polybasic acids, 1908, A., i, 287.

preparation of n-propyl p-aminobenzoates, 1910, A., i, 32.

Fritzsche, Hermann. See Richard Willstätter.

Fritzsche, Paul. See Otto Diels.

Fritzsche, Wilhelm. See Otto Wallach.

Frobenius, Otto, and Eduard Hepp, 1:6-dihydroxyanthraquinone, 1907, A., i, 428.

Froboese, Victor. See Franz Fischer.

Froebel, Wilhelm, and Armin Hochstetter, action of water on the bromides and chlorides of olefines, 1903, A., i, 320.

Fröhlich, Adolf. See Alfred Werner.

Fröhlich, Alfred, the Munchi arrow poison, 1905, A., ii, 411.

Fröhlich, Alfred, and Otto Loewi, action of nitrites and atropine on autonomic nerves, 1908, A., ii, 711.

the increase of susceptibility to adrenaline produced by cocaine, 1910, A., ii, 228.

Fröhlich, Alfred. See also Richard Chiari.

Fröhlich, Emil, preparation of NN'-dialkylmethylendiaryldiamines and homologues, 1907, A., i, 346.

attempts to prepare isomeric asymmetric ammonium compounds, 1909, A., i, 375.

resolution of asymmetric diammonium compounds into optical antipodes, 1911, A., i, 493.

Fröhlich, Emil, and Edgar Wedekind, asymmetric nitrogen. XXVIII.

Asymmetric ammonium salts of p-anisidine, 1907, A., i, 410.

asymmetric nitrogen. XXIX. 

Resolution of phenylbenzylmethylbutylammonium compounds, 1907, A., i, 512.

Fröhlich, Emil. See also Carl Adam Bischoff and Edgar Wedekind.

Fröhlich, Friedrich W., the action of carbon dioxide and alcohol on muscle, 1907, A., ii, 40.

Fröhlich, Jaroslav, synthesis of unsymmetrical substituted thianthrenes, 1907, A., i, 632.

Fröhlich, Jaroslav. See also Fritz Fischer.

estimation of fatty matter in butter, 1907, A., ii, 58.

Froger-Delapierre, E., preparation of vanillin, 1904, A., i, 808.

Frohneberg, Wilhelm. See Theodor Zincke.

Froidevaux, J., detection of fluorides in meat products, 1904, A., ii, 840.

Froloff-Bagrief, A. See W. Lubiennko.

Fromherz, Konrad, constituents of lignocelluloses which yield furfuraldehyde and methylfurfuraldehyde, 1907, A., i, 186.

estimation of methylfurfuraldehyde, 1907, A., ii, 141.

the resorption of parenterally administered magnesium, and its influence on calcium metabolism, 1909, A., ii, 318.

the behaviour of p-hydroxyphenylaminoacetic acid in the animal body, 1911, A., ii, 314.

the method of action of phenylcinchoninic acid on the purine metabolism of the dog, 1911, A., ii, 1016.

Fromherz, Konrad, and Wilhelm Meigen, oximes of methylfurfuraldehyde, 1907, A., i, 232.

Fromherz, Konrad. See also Otto Neubauer.

Fromholdt, G., the behaviour of urobilin in the rabbit, 1907, A., ii, 902.

Fromm, Emil, fate of cyclic terpenes and camphor in the animal organism. V. Behaviour of sabinol, 1904, A., ii, 360.

unsaturated disulphides, 1906, A., i, 656.

sodium benzaldehydesulphoxylate; a correction, 1909, A., i, 108.

duplobenzylidenethioacetone; a correction, 1910, A., i, 490.

Fromm, Emil, and Oskar Acht, benzyl derivatives containing sulphur, and their decomposition by dry distillation, 1903, A., i, 340.

Fromm, Emil, Heinrich Baumhauer, and Arnold Weller, disulphides with neighbouring double linkings. III., 1908, A., i, 700.
Fromm, Emil, and Paul Clemens, fate of cyclic terpenes and camphor in the animal system. IV. Behaviour of sabirol, 1904, A., i, 177.

Fromm, Emil, and Konrad van Emstcr, matico oil, 1903, A., i, 188.

Fromm, Emil, and Dionys von Gómez, derivatives of perthiocyanic acid and of cyanomidothiocarboxylic acid; synthesis of new triazoles, 1907, A., i, 872.

Fromm, Emil, Hermann Hildebrandt, and Paul Clemens, cyclic terpenes and camphor in the animal system. III. Camphene in the animal system, 1903, A., i, 429.

Fromm, Emil, and Hermann Höller, action of ammonia sulphide on ketones, 1907, A., i, 710. Thio-derivatives of ketones. V. Duplobenzylidenethioacetone, a substance with extraordinary additive powers, 1907, A., i, 710.

Fromm, Emil, Walther Lambrecht, and James L. McKee, thio-derivatives of ketones. VI. 1908, A., i, 989.

Fromm, Emil, and Gdalja Raiziss, basic properties of sulphoxides and their tautomerism, 1910, A., i, 554.

Fromm, Emil, Adolf Roesicke, and Otto Gaupp, lowest oxides of hydrogen sulphide, 1908, A., i, 968.

Fromm, Emil, Adolf Roesicke, and Max Tausent, fission of disulphides with neighbouring double linkings, 1909, A., i, 505.

Fromm, Emil, and Philipp Schmoldt, thiobenzoic acids, 1907, A., i, 702.

Fromm, Emil, and Emil Vetter, disulphides with neighbouring double linkings; action of amines and hydraxes on thioacetals; new synthesis of triazoles. II., 1907, A., i, 892.

Fromm, Emil, and Jacob Wittmann, derivatives of p-nitrophenyl mercaptan, 1908, A., i, 631.

Fromme, Albert, a fat-hydrolysing ferment from the mucous membrane of the stomach, 1905, A., ii, 731.

Frommel, Wilhelm. See Wilhelm Steinkopf.

Frossard, Jos. See Luc. Baumann.

Frouin, Albert, possibility of maintaining life of animals after complete excision of the thyroid gland by the use of calcium or magnesium salts for their nourishment, 1909, A., ii, 686.

Frouin, Albert, and Arthur Compton, inactivation of trypsin by dialysis against distilled water; reactivation of the diastase by addition of salts, 1912, A., i, 60.

Frouin, Albert. See also Henri Bierry and M. Nicolle.

Frumina, (Mlle.) Cécile, dimethylthiodiacarbinol [γ-Dimethylhexane-γ-diol], 1910, A., i, 150.

Fry, Harry Shipley, critical survey of some recent applications of the electron conception of valence, 1912, A., i, 546.
applications of the electron conception of positive and negative valencies. IV. Fluorescence: anthracene and phenanthrene, 1912, A., ii, 713.

Fry, Harry Shipley. See also Thomas Evans.

Fuchs, Charles. See Paul Thiebaud Muller.

Fuchs, Denes. See Emil Abderhalden.

Fuchs, Dionys, the alteration in the excretion of amino-acids or substances titratable with formaldehyde as a cause of the increase in the Cal. N ratio after great loss of blood, 1911, A., ii, 58.

Fuchs, Dionys, and Nikolaus Roth, action of adrenaline on respiratory metabolism, 1912, A., ii, 654.

Fuchs, Gotthold, action of bismuth, 1904, A., ii, 195.
a group of therapeutically active acid amides, 1904, A., ii, 832.

Fuchs, Julius. See Emil Knoevenagel.

Fuchs, Karl, continuity of states of aggregation and fluid crystals, 1907, A., ii, 17.

Fuchs, Karl. See also William Küster.

Fuchs, Willy. See Leopold Nathan.

Füchtbauer, Christian, spontaneous crystallisation of supercooled liquids, 1904, A., ii, 610.

conductivity of non-luminous sodium vapour and the relationship between the ionisation of gases and the absorption of their line spectra, 1909, A., ii, 537.

conduction of electricity in saturated alkali metal vapour, 1911, A., ii, 361.

Füeg, Gustav. See Fritz Fichter.

Fühner, Hermann, thalleioquinine reaction of quinine and Jaffe's kynurenine action reaction, 1905, A., i, 828.
the action of alcohols on echinoderm eggs, 1905, A., ii, 49.

physiological evidence as to the constitution of ammonium dye bases, 1906, A., ii, 622.

Fühner, Hermann, the thalleioquinine reaction, 1907, A., i, 150.

hemolytic power of alcohols, 1907, A., ii, 631.

action of organic ions; particularly of guanidine, 1907, A., ii, 901.

the quantitative estimation of synthetic muscarine by physiological methods, 1908, A., ii, 877.

the action of methyl-green, 1908, A., ii, 877.

the fate of synthetic muscarine in the animal body, 1908, A., ii, 1061.

mutual influence on solubility in aqueous solutions of ether, chloroform, phenol, etc., 1909, A., ii, 388.

toxicological detection of colchicine, 1910, A., ii, 1011.

the supposed immunity of toads to their own poison (secretion of skin glands), 1910, A., ii, 1096.

the toxicological detection ofaconitine, 1912, A., ii, 105.

degree of acidity of monatomic alcohols, 1912, A., ii, 188.

pituitrin and its active constituents, 1912, A., ii, 960.

the synergic action of poisons. I. The combination of heart poisons (methyl-violet with alcohol and glycerol), 1912, A., ii, 792.

Fühner, Hermann, and W. Greb, the synergic action of poisons. II. Mixed haemolysis, 1912, A., ii, 970.

Fühner, Hermann, and Ernst Neubauer, estimation of the hemolytic action of monohydric alcohols, 1906, A., ii, 687.

haemolysis by substances in homologous series, 1907, A., ii, 485.

Fühner, Hermann, and E. Rosenow, the behaviour of synthetic muscarine in the animal body. II, 1909, A., ii, 1042.

Führer, Eugen. See Gustav Schultz.

Führer, Karl. See Josef Houben.

Fürstenau, Robert, a new method of calculating the ratio of the [electric] charge to the mass of the molecule of mercury vapour, 1909, A., ii, 12.

ratio of the specific heats of gases and its dependence on the temperature, 1909, A., ii, 17.

dependence of the ratio of the specific heats of gases on the temperature, 1909, A., ii, 375.

Fürstenberg, Albert. See Franz Kuncckell.

Fürstenberg, August. See Josef König.

Fürstenberg, J. See Alfred Werner.

INDEX OF AUTHORS.

Fulcher, James Garfield. See Edwin Brett Hart.

Fulcher, T. S. See Hermon C. Cooper.

Fulmer, Halphen, Halphen’s test for cottonseed oil, 1903, A., ii, 249.

Funaro, Angiolo, and Igino Barboni, lecithin in wine, 1905, A., ii, 275.

Funaro, Roberto, estimation of reducing substances in infants’ urine, 1908, A., ii, 715.

Funk, Albert. See Wilhelm Autenrieth.

Funk, Casimir, the value of different methods used for estimating sugar in urine, 1908, A., ii, 902.

the reducing substances of urine, 1910, A., ii, 1117.

synthesis of dl-3:4-dihydroxyphenylalanine, 1911, T., 554; P., 56.

probable formation of adrenaline in the animal body, 1911, A., ii, 907.

the constitution of aminotyrosine and the action of oxydases on some tyrosine derivatives, 1912, T., 1004; P., 140.

the chemical nature of the substance which cures polynéuritis in birds induced by a diet of polished rice, 1912, A., ii, 186.

the effect of a diet of polished rice on the nitrogen and phosphorus of the brain, 1912, A., ii, 467.

preparation from yeast and certain foodstuffs of the substance the deficiency of which in diet occasions polynéuritis in birds, 1912, A., ii, 856.

Funk, Casimir, and Stanislaus von Kostanecki, 2-methoxystilbene, 1905, A., i, 352.

Funk, Casimir, and Albert Niemann, filtration of rennet and pepsin, 1910, A., i, 801.

Funk, Casimir. See also Emil Abderhalden.

Funk, William, separation of iron from zinc by means of ammonia, 1906, A., ii, 54.

separation of iron from manganese, nickel, cobalt, and zinc by the acetate process, 1906, A., ii, 398.

separation of ferric iron from manganese, nickel, cobalt, and zinc by the formate process, 1906, A., ii, 707.

separation of iron and manganese from nickel and cobalt by treating the sulphides with dilute acids, 1906, A., ii, 806.

Funk, William, separation of cobalt from manganese and iron by means of potassium nitrite, 1907, A., ii, 199.

separation of zinc from nickel, cobalt, iron, and manganese by means of hydrogen sulphide, 1907, A., ii, 398.

the decomposition of felspar by water, 1909, A., ii, 146.

Funke, Ing. See Hans von Euler.

Furbeck, Margaret, and Adolf Lieben, white and yellow silver lavulites, 1909, A., i, 695.

Furckat, Margaret, See also Rudolf Wegscheider.

Furlong, John Ralph. See Wilhelm Manchot.

Furno, Alberto. See Emil Abderhalden.

Fyffe, William Alexander. See James Walker.

Gabbi, G. See Gualtierio Poma.

Gabel, Werner. See Ernst Beckmann.

Gabillon, M. See Victor Anger.

Gablin & Cie, neumelun, 1906, A., i, 546.

Gabriel, Siegward, nitromethane and phthalic anhydride, 1908, A., i, 345.

quinazoline, 1908, A., i, 445.

conversion of phthalazine into pyridazine derivatives, 1904, A., i, 103.

2-methylpyrimidine, 1904, A., i, 1060.

phthalonimide and o-phenyleneamidine, 1905, A., i, 97.

amino-derivatives of pyrimidine, 1905, A., i, 244.

aminoacetone, 1905, A., i, 265.

isocysteine and isocystine, 1905, A., i, 265.

γ-nitropropylphthalimide, 1905, A., i, 441.

bromodihydroaracil, 1905, A., i, 481.

derivatives of β-aminothiol and of a-amino propyl alcohols, 1905, A., i, 649.

nitroso-derivatives of oxygenated imino-compounds, 1905, A., i, 650.

diaminoethyl ether, 1905, A., i, 862.

action of bromine on α-lactylcambamidine and related compounds, 1906, A., i, 634; 1907, A., i, 90.

acetophenone-o-carboxylic acid, 1907, A., i, 214.
Gabriel, Siegmund, synthetic derivatives of glycine and its homologues, 1907, A., i, 625.
-derivatives of the amino-acids applicable for synthetical purposes, 1908, A., i, 181.
tautomerism in the iminazole series, 1908, A., i, 573.
6-amino-ketone derivatives, 1908, A., i, 648.
preparation of pyridazine, 1909, A., i, 259.
\(\epsilon\)-amino-ketones, 1909, A., i, 492.
reduction of \(\epsilon\)-amino-ketones, 1909, A., i, 493.
\(\zeta\)-amino-ketones, 1909, A., i, 891; 1910, A., i, 229.
synthesis of \(\gamma\)-coniceine, 1909, A., i, 957.
synthesis of oxazoles and thiazoles. I. and II., 1910, A., i, 190, 431.
\(\alpha\)-amino-ketones, 1911, A., i, 212.
condensation product of ethyl phthaliminoisobutyrylmalonate, 1911, A., i, 227.
compounds of the propane series, 1911, A., i, 644, 982.
\(\alpha\)-aminoisobutyrophenone, \(NH_2CMe_2^-CO\), 1911, A., i, 991.
reduction of acyl derivatives of \(\alpha\)-nitrobenzylamine, 1912, A., i, 391.
Gabriel, Siegmund, and James Colman, aminoaetone, 1903, A., i, 13.
derivatives of pyrimidine and methylated pyrimidines, 1904, A., i, 103.
2:4:8-trichloropyrimidine, 1904, A., i, 1059.
quinazoline, 1904, A., i, 1060; 1905, A., i, 944.
quinazoline alkyl haloids, 1906, A., i, 209.
tertiary and quaternary bases from piperidine, 1906, A., i, 881; 1907, A., i, 237.
supposed penthiazole derivatives, 1906, A., i, 889.
derivatives of \(\gamma\)-aminobutyric acid, 1908, A., i, 274.
\(\epsilon\)-amino-ketones, 1908, A., i, 649.
phthaliminoacetyl chlorides and ethyl sodiomalonate, 1909, A., i, 491.
aminosulphones and allied compounds, 1912, A., i, 115.

Gabriel, Siegmund, and James Colman, \(\beta\)-aminoethyl mercaptan, 1912, A., i, 529.
Gabriel, Siegmund, and Albert Lieck, transformations of amino-ketones, 1908, A., i, 464.
Gabriel, Siegmund, and Adolf Sonn, formation of pyrazine compounds from quinoxaline derivatives, 1908, A., i, 60.
Gabrilowitsch, O. E. See Efin Semev London.
Gabutti, Emilio, distinction between chloral and butylchloral, 1904, A., ii, 300.
colour reactions of morphine and codeine, 1904, A., ii, 375.
detection of abrusitol in wine, 1904, A., ii, 787.
analytical reactions of conine, 1906, A., ii, 711.
detection of sulphonal in trional or tetronal, 1907, A., ii, 512.
ew reaction of formaldehyde, applicable in pharmacology, 1907, A., ii, 587.
chloral chloroacetate, 1911, A., i, 261.
Gachot, Charles. See Emilio Noelting.
Gadais, J. See L. Gadais.
Gadais, L., and J. Gadais, detection and estimation of lead in cream of tartar, 1905, A., ii, 357.
estimation of calcium citrate and of lemon juice, 1909, A., ii, 446.
analyses of liquorice juices, 1911, A., ii, 948.
Gadamer, Johannes [Georg], alkaloids of calumba root (Jateorhiza columba syn. Cocculus palmatus), 1903, A., i, 50; 1906, A., i, 976.
corydalis alkaloids, 1904, A., i, 185; 1905, A., i, 462; ii, 411; 1910, A., ii, 418.
d-sec.-butylamine, 1904, A., i, 375.
action of amyl alcohol on chloral ethyl-alehoilate, 1905, A., i, 326.
constitution of \(\psi\)-ammonium bases with reference to the alkaloids and the products these yield by transformation, 1905, A., i, 368.
berberine, 1905, A., i, 369.
condensation of \(\psi\)-ammonium bases with hydroxylamine and \(p\)-dimethylaminomine, 1905, A., i, 383.
constitution of \(\psi\)-ammonium bases. II., 1908, A., i, 322.
Gadamer, Johannes [Georg], isomerism of ephedrine and $\psi$-ephedrine, 1909, A., i, 49.
dihydroberberine, 1911, A., i, 152.
diCorydaline, 1911, A., i, 12.
diCorydaline, 1911, A., i, 317.
corydalis alkaloids. VII. (Protopine, glaucine), 1911, A., i, 483.
corydalis alkaloids. XI. Corytubérine, 1912, A., i, 462.
corydalis alkaloids. XII. Corydine, 1912, A., i, 47.
corydalis alkaloids. XIII. Glaucine sub-group, 1912, A., i, 48.
cyclic ammonium bases, 1912, A., i, 127.
theory of racemisation, substitution, and the Walden inversion, 1912, A., i, 934.

Gadamer, Johannes, and T. Amenomiya, sesquiterpenes and sesquiterpeno-alcohols, 1903, A., i, 353.
optical function of the asymmetric carbon atoms in egeonine, 1904, A., i, 337.

Gadamer, Johannes, and Walter Klee, corydalis alkaloids; corycavine, a new alkaloid of the corycavine series, 1911, A., i, 318.

Gadamer, Johannes, and Fritz Kunzte, corydalis alkaloids. IX. Corytubérine sub-group, 1911, A., i, 1011.
corydalis alkaloids. X. Bulbocapnine, 1911, A., i, 1012.

Gadamer, Johannes, and Ernst Steimbrecher, corydalis alkaloids. V. $R$-Corydaline and phenylberberine, 1911, A., i, 153.

Gadamer, Johannes. See also Arthur Voss.

the doubly linked carbon-nitrogen system > C:N, 1904, A., i, 854.

derivatives of glycollonitrile, 1904, A., i, 882.

aminoethyl ether, 1905, A., i, 119.

fusibility in the series of normal di- and primary glycols, 1905, A., i, 254.

normal Cg secondary alcohols, 1905, A., i, 402.

derivatives of aaa-trichloroisopropyl alcohol, 1905, A., i, 558.
Henry, Louis, derivatives of n-hexolic acid, 1905, A., i, 561.
condensation of nitromethane with alkyl derivatives of aminomethyl alcohol, 1905, A., i, 609, 661.
crystals of s-tetrachloroisopropyl formal, 1905, A., i, 634.
stoichiometrical laws and the atomic theory, 1905, A., ii, 81.
the ![OH] group of tertiary alcohols, 1906, A., i, 133.
the addition of hydrogen chloride to
\[ \text{CMe}_2 \text{CH}_2 \]
\[ \rightarrow \text{O}, \]
1906, A., i, 228; 1907, A., i, 7.
the alcoholic function, 1906, A., i, 329.
hexamethylethane, 1906, A., i, 473.
synthesis of pentamethylethanol, 1906, A., i, 477.
vigilancy in various groups of compounds, 1906, A., i, 549.
methylene compounds, 1906, A., i, 555.
some synthetical reactions of pina-
colin, 1906, A., i, 618.
acetyl chloride and hydrochloric acid as reagents for distinguishing be-
tween the various types of mono-
hydric alcohols, 1906, A., i, 781.
succinic pinacone [β-hydroxymethylhexane-
β-e-diol], 1906, A., i, 922.
molecular state of water; its chemical constitution and the relative value of the two valencies of the oxygen atom, 1906, A., ii, 17.
bromine as a differential reagent for isomeric secondary and tertiary aliphatic alcohols, 1907, A., i, 4.
addition of hypochlorous acid to ethylene compounds, 1907, A., i, 7.
butyrolactone and αδ-dimethylsuccinic glycol [δ-methylpentane-αδ-diol], 1907, A., i, 106.
action of phosphorus pentabromide on phenol ethers, 1907, A., i, 206.
various syntheses of dimethilsopropyl-
carbinol, CMe₂Trβ-OH, 1907, A., i, 273.
identity of the four valencies of the carbon atom, 1907, A., i, 374.
direct dehydration of dimethliso-
propylcarbinol, 1907, A., i, 374.
preparation of ethylene glycol and other alcohols, 1907, A., i, 377.
dihydroxytetramethylecetone, 1907, A., i, 587.
various syntheses with compounds containing the group CMe₂Cl-CI, 1907, A., i, 670.

Henry, Louis, acetic esters, 1907, A., i, 674.
oxalic aldehyde [glyoxal], 1907, A., i, 677.
synthesis of secondary isoamyl alcohol, 1907, A., i, 744.
structural stability of ethylene oxide, 1907, A., i, 745.
hydrolysis of the ethylenic oxides by sulphuric acid, 1907, A., i, 745.
symmetrical dimethylethylene oxide, 1907, A., i, 817.
the series resulting from the methyla-
tion of ethyl alcohol, with regard to the aptitude for isomeric change of the haloid ethers, 1907, A., i, 886.
propylene oxide, 1907, A., i, 887.
bisecundary butylene monochloro-
hydrin, \[ \text{OH-CHMe} \text{CHMeCl}, \]
1907, A., i, 887.
hydroxy- and ethoxy-derivatives of normal primary butylamine, 1907, A., i, 898.
relative volatility of various groups of acetic esters, 1907, A., i, 1002.
isomeric change of isobutyl alcohol effected by nitrous acid, 1908, A., i, 2.
action of nitrous acid on allylamine, 1908, A., i, 81.
relative volatility of certain groups of mixed carbon compounds, 1908, A., i, 305.
relative volatility of certain groups of mixed carbon compounds. II. Mixed methylene compounds, 1908, A., i, 381.
vigilancy in “methylene” series of methyl derivatives, 1908, A., i, 381.
methylation in the ethylene derivatives from the point of view of vigility, 1908, A., i, 752.
relative stability of cyclic polycarbon groups, 1908, A., i, 881.
direct dehydration of certain tertiary alcohols, 1909, A., i, 79.

Henry, Louis, Buelens, and Joseph Muset, secondary alcohols derived from the octane, CHMe₂[CH₂]₄-CH₃, 1906, A., i, 723.

Henry, Louis, and Aug. de Wael, new syntheses of pentamethylethanol and of hexamethylethane, 1906, A., i, 782.

occurrence of cyanogenic glucosides in feeding-stuffs, 1908, A., ii, 619.
INDEX OF AUTHORS.

Henri, Thomas Anderson. See also Wyndham Rowland Dunstan.

Henschke, Fritz, condensation of phenol with formaldehyde, 1905, A., i, 429.

Henseling, Friedrich. See Max Mayer.

Hensgen, Carl, dissociation of electrolytes, 1906, A., ii, 73.

Henstock, Herbert, some derivatives of 2- and 3-phenanthrol, 1906, T., 1527; P., 235.

Henstock, Herbert, and Charles Henry Graham Sprankling, \( \alpha \gamma \)-trimethyl- and \( \alpha \gamma \gamma \)-tetramethyltricarballylic acids and \( \gamma \)-dimethylbutane-\( \alpha \beta \beta \)-dicarboxylic acid, 1907, T., 354; P., 32.

Henstock, Herbert, and (Miss) Bertha Elizabeth Woolley, the action of phosphorus pentachloride on hydroxytrimethylsucinic ester; 1:2-dimethylcyclopropane-1:2-dicarboxylic acid (1:2-dimethyltrimethylene-1:2-dicarboxylic acid), 1907, T., 1954; P., 235.

Henstock, Herbert. See also William Arthur Bone.

Hentschel, G., the technical analysis of cement, 1912, A., ii, 867.

Hentschel, Willibald, theoretical considerations respecting the origin and essence of chemical elements, 1904, A., ii, 327.

Henze, Martin, gorgonin and iodogorgonic acid, 1903, A., i, 698.

demarcation currents produced by chemical reagents, 1903, A., ii, 163.

spongosterol, a cholesterol-like substance from Suberites domuncula, and its probable relationship to lipochrome, 1904, A., i, 410; 1908, A., i, 418.

hemocyanin, 1905, A., i, 164.

muscle of octopeds, 1905, A., ii, 270.

iodogorgonic acid, 1907, A., i, 370; 1911, A., i, 617.

chemical investigations on the octopus, 1908, A., ii, 517.

chemical composition of the skeletal substance of Velella sparsus, 1908, A., ii, 517.

amount of dissolved organic compounds in the sea, and their significance in its internal economy, 1908, A., ii, 706.

the influence of oxygen pressure on the gaseous exchange of certain sea-animals, 1910, A., ii, 785.

Henze, Martin, occurrence of betaine in cephalopods, 1911, A., ii, 216.

the blood of ascidians. I. Vanadium compound in the blood-corpuscles, 1911, A., ii, 740.

the blood of ascidians. II., 1912, A., ii, 654.

Henzerling, Carl, ethylcreatinine, 1911, A., i, 21.

Hepburn, Joseph S. See also (Miss) Mary Engle Pennington.

Hepner, Albert. See August Michaelis, and Theodor Pfeiffer.

Hepner, Hans, nitro-derivatives of \( \beta \)-naphthquinoline, 1907, A., i, 244.

Hepp, Eduard. See Otto Fischer, and Otto Frobenius.

Heraeus, Wilhelm C., cause of the destruction of platinum crucibles in phosphate analyses, 1903, A., ii, 82.

platinum gauze for contact action in organic ultimate analysis, 1906, A., ii, 900.

Heraeus, Wilhelm C., and Wilhelm Geibel, a cause of the destruction of platinum vessels, 1907, A., ii, 969.

Hermann, Heinrich. See Wilhelm Muthmann.

Herb, Otto. See Hans von Liebig.

Herbette, Jean, new form of thallium tartrate; isomorphous mixtures of thallium and potassium tartrates, 1905, A., i, 566.

isomorphism, 1906, A., i, 929.

isomorphism of potassium chlorate and nitrate, 1906, A., ii, 660.

mixed crystals of barium chloride and bromide, 1906, A., ii, 669.

Herbig, W., the examination of wool-fat, 1907, A., ii, 59.

Herbst, Carl. See Augustin Bistrzycki.

Herbst, Karl, reversion of phosphoric acid in superphosphates, 1908, A., ii, 374.

Herbst, Wilhelm. See August Michaelis.

Herder, Max, new reagents for alkaloids and their microscopical application, 1906, A., ii, 406.

Herforder Maschinenvett- & Oel-Fabrik, Leprince & Siveke, reduction of unsaturated fatty acids and their glycerides, 1903, A., i, 547.
HERING, H. Ewald, activity of nerves on the heart perfused with Ringer's solution, 1904, A., ii, 55.

HERISSÉY, Henri, isolation of crystallised galactose from the products of the digestion of the galactans of the horse's albumen by seminase, 1908, A., ii, 170, 232.

preparation of crystalline gentiogenin, 1905, A., i, 805.

prulaurasin, a crystalline cyanogenetic glucoside obtained from the leaves of cherry laurel, 1906, A., i, 31.

estimation of small quantities of benzaldehyde, 1906, A., ii, 312.

nature of the cyanogenetic glucoside in the seeds of Eriobotrya japonica, 1906, A., ii, 882.

presence of prulaurasin in Cotoneaster microphylla, 1907, A., ii, 123.

presence of amygdonitrile-glucoside [(-mandelonitrile-glucoside)] in Cerasus padus, 1907, A., ii, 863.

production of prulaurasin by the action of a soluble enzyme on isoamygdalin, 1907, A., ii, 863.

preparation of true arbutin, 1910, A., i, 692.

presence of mandelonitrile-glucoside in Photinia serrulata, 1912, A., ii, 675.

HERISSÉY, Henri, and Léon Bourdier, new glucoside (erytaurin) obtained from the common century, 1908, A., i, 903.

HERISSÉY, Henri, and Géza Doby, oxidation of dimethylhydrodiosgenol and of dimethylhydrodiovianillin, 1909, A., i, 788.

utilisation of aucubin by Aspergillus niger, 1911, A., ii, 759.

HERISSÉY, Henri, and Charles Lefebvre, presence of raffinose in Taxus baccata, 1907, A., ii, 715.

HERISSÉY, Henri. See also Léon Bourdier, Émile Bourquelot, and Henri Cousin.

HERITAGE, Gertrude L. See Elmer Peter Kohler.

HERLES, Franz, optically active non-saccharine substances in sugar beet which are eliminated by the action of lime in the purification of the sap, and their polarimetric estimation, 1908, A., ii, 1077.

HERLITZKA, Amedeo, autodigestion of pepsin, 1904, A., ii, 828.

catalases, 1907, A., i, 102.

HERLITZKA, Amedeo, catalase: antagonism between catalases and peroxydases, 1907, A., i, 1102.

calorimetric investigation on protein precipitation, 1908, A., i, 706.

influence of temperature on the refractive index of white of egg, 1910, A., ii, 1013.

the condition of chlorophyll in plants, and colloidal chlorophyll, 1912, A., ii, 287.

colloidal chlorophyll and certain colloidal derivatives of chlorophyll, 1912, A., ii, 1115.

Herman, I. See Edmond Émile Blaise.

Hermann, Gottfried, the combining power of the chlorides of copper, lead, iron, zinc, tin, and bismuth, and the combining power of the chlorides, bromides, and iodides of copper and cadmium, and the sensitiveness of the solid solutions to light, 1911, A., ii, 801.

Hermann, Hugo, larciresinol, 1903, A., i, 267.

settling of clay emulsions, 1907, A., ii, 442.

detection of colloidal silicic acid, 1907, A., ii, 578.

estimation of tungstic acid and silicic acid, 1912, A., ii, 1215.

Hermann, Paul, calcium magnesium orthosilicate series, 1907, A., i, 544.

Hermann, Paul. See also Victor Goldschmidt.

Hermann, Peter, anilides of rhamnose and arabinose, 1905, A., i, 327.

Hermann, Richard, nitrophenyldiguanides, 1905, A., i, 950.

Hermann, W. See Johannes Stark.

Hermanns, L. toxicological investigations on bio-electric currents. II. The pharmacological specificity of chemical alterations in the current, 1912, A., ii, 663.

Hermes, Paul. See Ludwig Berend, and Heinrich Blitz.

Hernández. See Ferrer Hernández.

Hernando, the influence of substances of the digitalin group on blood-pressure in the rabbit, 1911, A., ii, 1017.

Herold, F. See Georg Lockemann.

Herold, Fritz. See Heinrich Kiliani.

Lazenec, I., new derivatives of catechol; preparation of phenylethylencatechol, 1909, A., i, 469.

new derivatives of catechol, 1909, A., i, 488.

Lazenec, I. See also Charles Moureu.

Lazzart, A., direct manuring of cereals with different forms of calcium, 1906, A., ii, 892.

Lazzarini, Guido. See Camillo Manuelli, and Gaetano Minunni.

Leach, Albert Ernest, composition of turmeric, 1905, A., ii, 127.

Leach, Albert Ernest, and Hermann C. Lythgoe, estimation of ethyl and methyl alcohols in mixtures by the immersion refractometer, 1905, A., ii, 655.

Leach, Frederick Peacock, limonene nitrosoyanides and their derivatives, 1905, T., 413; P., 117.

some new derivatives of pinene, 1906, P., 137.

pinene nitroamine, 1906, P., 304; 1907, T., 1.

a γ-semicarbazide from pinene, 1906, P., 304; 1907, T., 10.

Leach, Frederick Peacock. See also (Sir) William Augustus Tilden.

Leach, (Miss) Mary E., chemistry of the Bacillus coli communis, 1906, A., ii, 568; 1908, A., ii, 56.

Lean, George. See William Carrick Anderson.

Leather, John Petty. See Raymond Ross.

Leather, John Walter, estimation of small quantities of iron, 1905, A., ii, 422.

amount of combined nitrogen in rain and dew, 1906, A., ii, 302.

composition of Indian rain and dew, 1906, A., ii, 487.

records of drainage in India, 1912, A., ii, 596.

Leathes, John Beresford, amount of fat in muscle, 1904, A., ii, 556.

diurnal variations in uric acid excretion, 1907, A., ii, 114.

excretion of nitrogen, creatinine, and uric acid in fever, 1907, A., ii, 376.

higher fatty acids in the liver after removal, 1908, A., ii, 1054.

Leathes, John Beresford. See also Edward Provan Cathcart, and Oscar Hildebrand.

Leavitt, Sherman, and Joseph Arthur Le Clerc, loss of phosphoric acid in the incineration of cereals, 1903, A., ii, 428.

estimation of phosphorus in ash analysis, 1908, A., ii, 531.

Leavitt, Sherman. See also Edward Harrison Keiser.

Lebach, Gustav. See Martin Freund.

Lebach, Hans. See Emil Knoevenagel.

Lebailly, A. See Fernand Malengreau.

Lebas, C., presence of aucubin in different varieties of Aucuba japonica, 1910, A., ii, 63.

Lebas, C. See also Henri Harissey.

Le Bas, Gervaise, a relation between the volumes of the atoms of certain compounds at the melting points and their valencies: interpretation by means of the Barlow-Pope theory, 1906, P., 322; 1907, T., 112.

the relation between valency and heats of combustion; preliminary note, 1907, P., 134.

the unit-stere theory; demonstration of a natural relation between the volumes of the atoms in compounds under corresponding conditions and that of combined hydrogen, 1907, A., ii, 754; 1908, A., ii, 667.

new theory of molecular volumes, 1910, A., ii, 1039.

the influence of the alternating factor in certain series on the molecular volumes at the melting point, 1911, P., 196.

Lebeau, Paul [Marie Alfred], new cobalt silicide, 1903, A., ii, 22.

silicides of cobalt, 1903, A., ii, 80.

two silicides of manganese, 1903, A., ii, 215.

equilibrium which exists between copper, silicon, and manganese, and the manganese silicide, MnSi₂, 1903, A., ii, 298.

decomposition of lithium carbonate by heat, 1903, A., ii, 477.

commercial manganese silicides, 1903, A., ii, 652.

volatility and dissociation of alkali carbonates, 1904, A., ii, 121; 1906, A., ii, 161.

preparation of metallic silicides; manganese silicides, 1904, A., ii, 343.

production of isomorphous mixtures of lime and lithia, 1904, A., ii, 616.

employment of metal-ammonium compounds in organic chemistry; preparation of fatty hydrocarbons, 1905, A., i, 401.
Lebeau, Paul [Marie Alfred], physical properties of propane, 1905, A., \(i, 501\).

employment of metal-ammonium compounds in organic chemistry; formation of primary amines, 1905, A., \(i, 512\).

commercial cuprosilicon, 1906, A., \(i, 29\).

diethylene, 1906, A., \(i, 50\).

cuprosilicon, and a new method of preparing silicon soluble in hydrofluoric acid, 1906, A., \(ii, 168\).

action of fluorine on chlorine; a new method of forming hypochlorous acid, 1906, A., \(ii, 730\).

the existence of bromine chloride, 1906, A., \(ii, 843\).

a new silicic acid of manganese described by Gin, 1907, A., \(ii, 175\).

copper silicic, 1907, A., \(ii, 264\).

reduction of manganese by charcoal, 1907, A., \(ii, 460\).

observations on a property of Moissan’s platinum amalgam, 1907, A., \(ii, 479\).

action of fluorine on selenium; selenium tetrafluoride, 1907, A., \(ii, 540\).

action of fluorine on selenium in glass vessels, 1907, A., \(ii, 613\).

analysis of selenium hexafluoride, 1907, A., \(ii, 679\).

some physical properties of butane and isobutane, 1908, A., \(i, 749\).

silicon hydrates, 1909, A., \(ii, 138\).

uranyl nitrate and the nature of its ethereal solution, 1911, A., \(i, 257\).

the formula of uranium carbide, 1911, A., \(ii, 403\).

the hydrates of uranyl nitrate, 1911, A., \(ii, 403\).

definite bismuthides, 1911, A., \(ii, 405\).

the decomposition by heat of uranyl nitrate, 1912, A., \(ii, 650\).

uranic anhydride and its hydrates, 1912, A., \(ii, 770\).

a new determination of the atomic weight of uranium, 1912, A., \(ii, 848\).

Lebeau, Paul, and Robert Bossuet, magnesium silicic, 1903, A., \(ii, 184\).

the system: silicon–magnesium, 1909 A., \(ii, 403\).

tetracarboxylate on the disodium
derivative of ethyl propanetetra-
carboxylate; a correction, 1905, T., 328; P., 90.
Wsisicenus memorial lecture, 1905, T., 501; P., 17.
synthesis of tertiary menthol and of
inactive menthene, 1905, P., 255.
experiments on the synthesis of the
terpenes. Part VII. A synthesis of
tertiary menthol (p-menthanol-4)
and of inactive menthene (Δ₃-p-
menthene), 1906, T., 832.
some experiments on the oxidising
action of hydrogen peroxide; pre-
liminary note, 1907, P., 166.
experiments on the synthesis of the
terpenes. Part XIV. Synthesis of
d- and l-Δ₃-m-menthol(8), dl-Δ₄-
m-menthol(8), and their deri-
vatives, 1910, T., 2129; P., 249.
experiments on the synthesis of the
terpenes. Part X (continued).
Synthesis of sylvestrene (d-carve-
estrene); preliminary note, 1910, P., 97.
experiments on the synthesis of the
terpenes. Part XVIII. Synthesis of
Δ₃-o-menthenol(8), Δ₄-o-ment-
thenol(8), and the corresponding
menthadienes, 1911, T., 727; P., 95.
experiments on the synthesis of the
terpenes. Part XIX. Synthesis of
cis- and trans-Δ₃-o-menthenol(8),
Δ₃-o-menthenol(8), and the corre-
sponding menthadienes, 1911 T.,
741; P., 95.

acetate, 1905, P., 287.
brazilin and hæmatoxylin. Part VIII.
1906, P., 160.
some derivatives of benzophenone;
synthesis of substances occurring
in coto-bark; preliminary notice,
1906, P., 305.
brazilin and hæmatoxylin. Part VII.
Synthesis of derivatives of hydr-
indine closely allied to brazilin and
hæmatoxylin, 1907, T., 1078.
some derivatives of γ-pyranol allied
to certain derivatives of brazillein
and hæmatein; preliminary com-
munication, 1907, P., 149.
Perkin, William Henry, jun., and Robert Robinson, synthesis of brazili-
inc acid and the lactones of dihydro-
brazilinic and dihydromahtoxylinic acids, 1907, P., 291.
brazilin and hematoxylin. Part VII. Synthesis of brazilinic acid, the
ractones of dihydrobrazilinic and 
dihydromahtoxylinic acids, an-
hydrobrazilic acid, etc.; the consti-
tution of brazilin, hematoxylin,
and their derivatives, 1908, T., 489; P., 54.
brazilin, hematoxylin, and their de-
rivatives. Part X. The constitu-
tion of trimethylbrazilone, of α-
and β-anhydrotrimethylbrazilone,
and of the corresponding hema-
toxylin derivatives, 1909, T., 381;
P., 31.
strychnine, berberine, and allied
alkaloids, 1910, T., 305; P., 24.
synthesis and resolution of gnoscopine
(αl-narcotine), 1911, T., 775; P.,
46, 101, 131.
harmine and harmaline. Part I.,
1912, T., 1775; P., 217.
experiments on the synthesis of
brazilin and hematoxylin and their
derivatives; preliminary note, 1912,
P., 7.
the constitution of harmine; pre-
liminary note, 1912, P., 153.
the synthesis of isoharm; pre-
liminary note, 1912, P., 154.

Power, Frederick Belding, and Marma-duce Barrowcliff, the constituents of the seeds of Hydnocarpus wightiana and of Hydnocarpus anthelminticus; isolation of a homologue of chaulmoogric acid, 1905, T., 884; P., 175.

the constituents of the seeds of Gynocardia odorata, 1905, T., 896; P., 176.

Power, Frederick Belding, and Henry Browning, jun., the constituents of Taraxacum root, 1912, T., 2411; P., 285.

Power, Frederick Belding, and Thomas Callan, the constituents of the seeds of Casimiroa edulis, 1911, T., 1993; P., 257.

chemical examination of jambul seeds, 1912, A., ii, 480.

Power, Frederick Belding, and Frank Howorth Gornall, the constituents of chaulmoogra seeds, 1904, T., 838; P., 135.

the constitution of chaulmoogric acid, 1904, T., 851; P., 136.

gynocardin, a new cyanogenetic glycoside; preliminary note, 1904, P., 137.
Power, Frederick Belding, and Frederic Herbert Lees, constituents of kō-sam seeds (Bruccia sumatrana), 1903, A., i, 772.

the, constituents of the essential oil of Californian laurel, 1904, T., 629; P., 88.
gynocardin, a new cyanogenetic glucoside, 1905, T., 349; P., 88.

Power, Frederick Belding, and Charles Watson Moore, the constituents of the bark of Prunus serotina; isolation of l-mandelonitriile glucoside, 1909, T., 243; P., 27.
the, constituents of the fruit of Echallium elaterium, 1909, T., 1985; P., 260.
chemical examination of elaterium and the characters of elaterin, 1909, A., i, 946.
the, constituents of colocynth, 1910, T., 99; P., 3.
the, constituents of the leaves of Prunus serotina, 1910, T., 1099; P., 124.
the, constituents of bryony root, 1911, T., 937; P., 118.

Power, Frederick Belding, and Harold Rogerson, chemical examination of Ipomcea purpurea, 1908, A., ii, 725.
chemical examination of jalap, 1909, A., i, 819.
the, constituents of leptandra, 1910, T., 1944; P., 218.
chemical examination of Ornithogalum thyrsoides, 1910, A., ii, 338.
chemical examination of the tuberous root of Ipomcea hirsflavie, 1910, A., ii, 888.
chemical examination of the root of Ipomcea orizabensis, 1911, P., 304; 1912, T., 1.
chemical examination of scammony root and of scammony, 1912, T., 398; P., 39.

Power, Frederick Belding, and Arthur Henry Salway, the constituents of the essential oil of nutmeg, 1907, T., 2037; P., 285; discussion, P., 285.
examination of the fruit of Bruccia antidysenterica, 1907, A., ii, 807.
the, constituents of the expressed oil of nutmeg, 1908, T., 1653; P., 197.
chemical examination of Microspermia chamissonis (Yerba buena), 1908, A., ii, 418.
chemical examination and physiological action of nutmeg, 1909, A., ii, 169.
the, constituents of red clover flowers, 1910, T., 231; P., 10.

Power, Frederick Belding, and Arthur Henry Salway, chemical examination of watermelon seed, 1910, A., ii, 337.
chemical examination of pumpkin seed, 1910, A., ii, 338.
the, constituents of Withania somnifera, 1911, T., 490; P., 53.
constituents of Iris versicolor rhizome, 1911, A., ii, 145.
chemical examination of the bark of Erythrophleum guineense, 1912, A., ii, 977.

Power, Frederick Belding, and Frank Tutin, a leverotatory modification of quercitol, 1904, T., 624; P., 87.
examination of Gymnema leaves, 1904, A., ii, 763.
the, relation between natural and synthethetical glycercylphosphoric acids, 1905, T., 249; P., 72.
the, constituents of the essential oil from the fruit of Pittosporum undulatum, 1906, T., 1083; P., 170.
chemical and physiological examination of the fruit of Chelitella toxiearia (a West African poison), 1906, A., ii, 794.
the, constitution of homeoridictyol: a crystalline substance from Eriodictyon leaves, 1907, T., 887; P., 133, 243.
the, constituents of olive leaves, 1908, T., 891; P., 117.
the, constituents of olive bark, 1908, T., 904; P., 117.
Lippia scaberrima (beukess boss), 1908, A., ii, 59.
“oleuropein” from olive leaves, 1909, A., ii, 427.

Power, Frederick Belding. See also Marmaduke Barrowcliff.

Powis, Frank. See Harry Medforth Dawson.

Poyneer, Lois E., and H. Leroy Duffin, the fruit of Medeola virginica and Angelopsis quinquefolia, 1909, A., ii, 389.

Poynton, Frederick John, addition of sodium citrate to cows’ milk in infant feeding, 1904, A., ii, 625.

Pozzi, G. B. See Temistocle Jona.

Pozzi-Escot, Marius Emmanuel, diastatic hydrolysis of salol, 1903, A., i, 590.

reducing enzymes, 1903, A., i, 670.

separation of manganese from cobalt and nickel, 1903, A., ii, 107.

elimination and estimation of manganese in certain products, 1903, A., ii, 392.

formation of hydrogen sulphide by organic extracts and proteins, 1904, A., i, 130.

azo-dyes from 3:3'-dihydroxy-2:2'-dinaphthyl, 1904, A., i, 789.

conversion of nitrobenzene into aniline by means of phlobolin and yeast reductases, 1904, A., i, 792.

study and synthetical preparation of some s-arylthiocarbamides, 1904, A., i, 869.

the simultaneous existence in the living cell of oxidising and reducing diastases; the oxidising property of reductases, 1904, A., ii, 272.

colour reactions of molybdic acid, 1904, A., ii, 294.

Nicloux's process for estimating very small quantities of alcohol, 1904, A., ii, 450.

apparatus for removing volatile matters by a current of steam, 1904, A., ii, 554.

formation of hydrogen sulphide by alcoholic fermentation, 1904, A., ii, 580.

yeast from the cane sugar of Nicaragua, 1904, A., ii, 580.

poisonous action of chromium compounds on lower fungi, especially Saccharomyces, 1904, A., ii, 761.

azo-derivatives of 3:3'-dihydroxy-2:2'-dinaphthyl and 3:3'-dihydroxy-1:1'-dinaphthyl, 1905, A., i, 101.

study and synthetical preparation of arylthiohydantoins, 1905, A., i, 159.

new characteristic reaction of cobalt, 1905, A., ii, 423.

synthesis of tertiary amidines [isodiphenylcarbamidoacetanilide], 1907, A., i, 355.

crystalline double iodide of bismuth and strychnine, 1907, A., i, 868.

double iodide of bismuth and cocaine, 1907, A., i, 868.

action of phenylhydrazine on molybdates, 1907, A., ii, 401.

detection and colorimetric estimation of traces of gold by means of phenylhydrazine, 1907, A., ii, 403.

Pozzi-Escot, Marius Emmanuel, some new ureometers, 1907, A., ii, 414; 1909, A., ii, 276.

vanillin as a test for soluble ferments, 1907, A., ii, 516.

application of microchemical analysis to the reaction of alkaline earths with heavy metals the oxides of which are soluble in ammonia; mixed calcium salts, 1907, A., ii, 653.

modification of Regnard's ureometer, 1907, A., ii, 724.

microscopic detection of very small quantities of bromine, 1907, A., ii, 810.

a new very sensitive method for the detection of nickel, 1907, A., ii, 818.

detection of nickel as double nickel ammonium molybdate, 1908, A., ii, 133.

separation and estimation of cobalt and nickel, 1908, A., ii, 229.

detection and estimation of nickel in presence of cobalt, iron, and manganese, 1908, A., ii, 229.

estimation of nickel in the presence of a very large excess of cobalt, 1908, A., ii, 324.

method for the rapid estimation of nickel in the presence of cobalt, 1908, A., ii, 539.

separation and estimation of nickel in the presence of cobalt and all other elements which are not precipitated by hydrogen sulphide in acid solution, 1908, A., ii, 540.

use of phenolphthalein as indicator in the titration of acids in the presence of sulphurous acid, 1908, A., ii, 628.

estimation of nickel, 1908, A., ii, 635.

rapid estimation of nickel in the presence of all elements of groups 4, 5, and 6, 1908, A., ii, 635.

Rubens, *Heinrich*. See also Ernst Hagen.

Rubow, *V.*, lecithin in heart and kidneys in the normal condition, during starvation, and in fatty degeneration, 1905, A., ii, 396.

Ruckert, *A.*, action of *Oidium lactis* and *Vibrio cholerae* on choline hydrochloride, 1909, A., ii, 82.

Rudakoff, *Th.*, and *A. Alexandroff*, composition of the fusel oil obtained in the distillation of acorns, 1904, A., i, 466.

Rudolf, *Ernst*. See also Leopold Rügheimer.

Rudorf, *Carl Casimir*, George, conductivity and internal friction of solutions, 1903, A., ii, 403.

Rudolf, *Ernst*. See also Leopold Rügheimer.

Rudorf, *Carl Casimir*, George, conductivity and internal friction of solutions, 1903, A., ii, 403.

INDEX OF AUTHORS.

[INDEX]

Rudorf, [Carl Casimir] George, the linear expansion of solid elements as a function of their absolute melting point, 1912, A., ii, 624.

Rudse, Friedrich. See Stanislau von Kostanecki.

Rudzik, K. See Willy Markwald.

Rück, Ulrich, and Hermann Steinmetz, preparation and properties of pure thiocyanic acid, 1912, A., i, 954.

Rücker, Adolf. See Alexander Naumann.

Rücker, Conrad. See Hans Stobbe.

Rüdiger, Max. See Julius Wilhelm Rühl, and Johannes Thiele.

Rueger, Charles E., changes of colour caused by the action of certain rays on glass, 1905, A., ii, 709.

Rügheimer, Leopold, and Ernst Albrecht, derivatives of 4-benzylisoquinoline, 1908, A., i, 439. some homologues of 4-benzylisoquinoline, 1903, A., i, 439.

Rügheimer, Leopold, and Bruno Friling, 4-benzylisoquinoline, 1903, A., i, 438.

Rügheimer, Leopold, Siegfried Toeche Mittler, and Ernst Rudolf, determination of molecular weight by use of solvents with high boiling points, 1905, A., ii, 571.

Rügheimer, Leopold, and Ernst Rudolf, molecular weights of metallic chlorides, 1905, A., ii, 576.

Rügheimer, Leopold, and Ludwig Schumann, derivatives of 4-benzylisoquinoline, 1903, A., i, 439.

Rügheimer, Leopold, and Paul Schön, benzylmnoacetel and analogues, 1908, A., i, 153.

Ruehl, Ernst. See Emil Abderhalden.

Rühl, Friedrich. See Paul Jannasch.

Rühle, J., detection of saponin, 1912, A., ii, 819.

Rümelin, Gustav, heat of dilution of concentrated solutions, 1907, A., ii, 231.

rate of transformation of the radium emanation, 1907, A., ii, 836.

Rümpler, A., preparation of colourless albumins from dark coloured plant juices, 1903, A., i, 214. betasterol, 1903, A., i, 418.

Ruer, Rudolf, changes of volume and heat development occurring when the components of a compound which vaporises unchanged are transferred separately into the gas space, 1910, A., ii, 266.

Ruer, Rudolf, and Nikolaus Ijin, the stable system: iron-carbon, 1911, A., ii, 494.

Ruer, Rudolf, and Emil Schütz, the system: iron-nickel, 1910, A., ii, 959.

Ruer, Rudolf. See also Max Levin.

Rüst, Carl, standardisation of permanganate with an oxalate, 1903, A., ii, 107.

Rüst, Ernst, testing formaldehyde pastilles, 1906, A., ii, 312.

Rütgers. See Firma Rud. Rüttgers.

Rütgerswerke-Aktiengesellschaft, and Carl Geitsch, preparation of m-tolylortho-oxalate, 1911, A., i, 498.

Ruff, Otto, catalytic action of aluminium chloride in the reactions of sulphuryl chloride (dissociation catalysis), 1903, A., ii, 149.

preparation of sulphamido, 1903, A., ii, 723.

titanium nitride, 1909, A., ii, 406.
electric vacuum furnace, 1910, A., ii, 575.

permeability to light of mixtures of several light-absorbing substances [spectroscopic evidence for the formation of new compounds], 1911, A., ii, 257.

a new method for the analysis of some binary compounds, based on the law of mass action, 1911, A., ii, 264.

the so-called sulphammonium and the spectroscopic test for new compounds, 1911, A., ii, 484.

the equilibrium diagram of the iron-carbon alloys, 1911, A., ii, 897.

the system: iron-carbon, 1912, A., ii, 853, 917.

the preparation of ductile tungsten; melting point and other properties of pure tungsten, 1912, A., ii, 946.

the equilibrium diagrams of carbon with iron, nickel, cobalt, and manganese, 1912, A., ii, 1176.

Ruff, Otto, and Ferdinand Bornemann, the estimation of osmium: osmium oxides and chlorides, 1910, A., ii, 305.

Ruff, Otto, Hans Einbeck, Georg Fischer, and Kurt Thiel, the chlorides of sulphur; sulphur tetrachloride and its compounds, 1905, A., ii, 22.

preparation and properties of the fluorides of sexaivalent molybdenum, 1907, A., ii, 624.

titanium nitride and a new class of titanium compounds; the titanium-nitrogen haloids, 1908, A., ii, 700.

Ruff, Otto, and Georg Fischer, chlorides of sulphur, especially the so-called sulphur dichloride, 1903, A., ii, 204.

Ruff, Otto, and Emil Geisel, attempts to prepare nitrogen fluoride, 1903, A., ii, 724.

constitution of nitrogen sulphide, 1904, A., ii, 396.

so-called magnesium peroxide, 1904, A., ii, 817.

the so-called metalammonium compounds, 1906, A., ii, 228.

silicoiodoform, 1908, A., i, 966.

Ruff, Otto, and Hans Georges, lithium imide, 1911, A., ii, 280.

Ruff, Otto, and Ewald Gersten, some sources of error in the gasometric estimation of nitrates and nitriles by Schloesing’s or Piccin’s methods, 1911, A., ii, 930.

tiferro-carbide (cementite), Fe₃C,1912, A., ii, 260.

Ruff, Otto, and Otto Goecke, the solubility of carbon in iron, 1911, A., ii, 897.

Ruff, Otto, and Hugo Graf, the behaviour of sulphur towards water and the vapour pressure of sulphur from 78°-210°, 1907, A., ii, 947.

vapour pressure of sulphur at low temperatures, 1908, A., ii, 578.

INDEX OF AUTHORS.

Ruff, Otto, and Alfred Heinzelmann, uranium hexafluoride, 1911, A., ii, 988.

preparation of metallic lithium, 1906, A., ii, 282.

Ruff, Otto, Max Knoch, and Julian Zedner, fluorides and oxides of quinquevalent bismuth, 1908, A., ii, 298.

Ruff, Otto, and Herbert Lickfett, vanadium chlorides, 1911, A., ii, 291.

vanadium bromides, 1911, A., ii, 988.

vanadium fluorides, 1911, A., ii, 989.

Ruff, Otto, and Walter Martin, pure vanadium, 1912, A., ii, 166.

the solubility of carbon in nickel, 1912, A., ii, 354.

Ruff, Otto, and Wilhelm Plato, preparation of calcium, 1903, A., ii, 19, 211.

regularities in the composition of the most fusible mixtures of pairs of inorganic salts, 1903, A., ii, 588.

electrolytic preparation of calcium, 1904, A., ii, 731.

[separation of columbium and tantalum], 1912, A., ii, 208.

Ruff, Otto, Kurt Stäuber, and Hugo Graf, compounds of arsenic and antimony pentafluoride with nitrosyl fluoride, 1908, A., ii, 584.

Ruff, Otto, and Oskar Treidel, new titanium compounds; titanium nitrides, 1912, A., ii, 561.

Ruff, Otto, and Georg Winterfeld, the bromides of sulphur, 1903, A., ii, 590.

behaviour of fluorine towards nitrogen, oxygen, and chlorine at the temperature of the electric arc and the induction discharge, 1909, A., ii, 395.

Ruff, Otto, Julian Zedner, Max Knoch, and Hugo Graf, compounds of antimony pentachloride with antimony pentafluoride; a contribution to the theory of valency, 1909, A., ii, 1023.

Ruff, Otto, Julian Zedner, Emil Schiller, and Alfred Heinzelmann, some new fluorides, 1909, A., ii, 244.

toxic properties of bile, 1904, A., ii, 357.

Rufz, J. de. See H. Colin.

Ruggli, Paul, ring containing a triple linking, 1912, A., i, 914.

Ruggli, Paul. See also Johannes Thiele.

Ruh, H. O. See John James Rickard Macleod.

Ruhemann, Siegfried, action of ammonia and organic bases on ethyl esters of olefiniccarboxylic and olefinic-β-ketocarboxylic acids, 1903, T., 374, 717; P., 50, 128.

condensation of phenols with esters of unsaturated acids. Part VIII., 1903, T., 1130; P., 201.

the action of benzamidone on olefinic β-diketones, 1903, T., 1371; P., 246.

olefinic ketonic compounds, 1904, T., 1451; P., 206.

the combination of mercaptans with olefinic ketonic compounds, 1904, P., 251; 1905, T., 17, 461; P., 128.

the action of phenylpropioyl chloride on ketonic compounds. Part II., 1906, T., 682; P., 89.

the ethyl esters of acetoxyaloxic and acetophenylxaloxic acids and the action of ethyl oxalate on acetonilide and its homologues, 1906, T., 1236; P., 197.

tetrazoline. Part IV., 1906, T., 1268; P., 238.

xanthoxalin and its analogues, 1906, T., 1847; P., 284.

glutaconic and acconic acids, 1906, P., 137.

dithioxanthoxalin; preliminary note, 1906, P., 324.
Ruhemann, Siegfried, tetrazoline; reply to R. Stollé, 1906; A., i, 465.

the action of ethyl oxalate on thio-acetanilide and its homologues, 1907, T., 797; P., 115.
methyl dicarboxyacetonitate, 1907, T., 1359; P., 195.

constitution of xanthoxanilal, 1907, A., i, 691.

the formation of 4-pyrene compounds from acetylenic acids. Parts I. and II., 1908, T., 431, 1281; P., 52, 177.

the action of mustard oils on the ethyl esters of malonic and cyanoacetic acids, 1908, T., 621; P., 53; 1909, T., 117; P., 14.

formation of cyclohexanone derivatives from olefinic compounds, 1909, T., 109; P., 10.

the condensation of amides with esters of acetylenic acids, 1909, T., 984; P., 87; discussion, P., 87.

triphenyl-2-pyrene, 1910, T., 457; P., 59.
cyclic di- and tri-ketones, 1910, T., 1438; P., 196.
triketoxyhydrindene hydrate, 1910, T., 2925; P., 235.
triketoxyhydrindene hydrate. Part III. Its relation to alloxan, 1911, T., 792; P., 97.
triketoxyhydrindene hydrate. Part IV. Hydrindantin and its analogues, 1911, T., 1306; P., 163.
triketoxyhydrindene hydrate. Part V. The analogues of uramil and purpuric acid, 1911; T., 1486; P., 210.
triketomethylenedioxyhydrindene, 1912, T., 780; P., 95.

studies on cyclic ketones. Part I., 1912, T., 1729; P., 224.

Ruhemann, Siegfried, and Stanley Isaac Levy, studies on cyclic ketones. Part II., 1912, T., 2542; P., 316.

Ruhemann, Siegfried, and William Merriman, the action of phenyl-propioyl chloride on ketonic compounds, 1905, T., 1383; P., 224.
tetrazoline. Part III., 1905, T., 1768; P., 258.

Ruhemann, Siegfried, and William Johnson Smith Naunton, diphenyl-cyclopentenone, 1911, P., 309; 1912, T., 42.

Ruhemann, Siegfried, and John Gillies Priestley, the action of ethyl carbamate on esters of organic acids and mustard oils, 1909, T., 449; P., 62.

Ruhemann, Siegfried, and Edwin Roy Watson, contributions to the knowledge of the B-diketones, 1904, T., 456; P., 48.

the action of organic bases on olefinic ketonic compounds, 1904, T., 1170; P., 175.

Ruhland, Willy, formation of arabin by bacteria and their relation to the gum of the Amygdaleae, 1907, A., ii, 43.
significance of the colloidal nature of aqueous dye-solutions for their penetration into living cells, 1909, A., ii, 257.

[the permeability of cells for dyes], 1910, A., ii, 53.

Ruhoff, Otto E. See Louis Kahlenberg.

Ruhstrat, Gebr., apparatus for the electrolytic production of oxygen and hydrogen, 1912, A., ii, 751.

Ruhtenberg, Hans. See Gustav Keller.

Rule, Alexander, some new derivatives of dicyclopentadiene, 1906, T., 1339; P., 235.

the action of nitrous gases on dicyclopentadiene, 1908, T., 1560; P., 175.

the action of hydrogen sulphide on the alkylxides of the metals.

Part I. Sodium and potassium ethoxides, 1911, T., 558; P., 60.

Rule, Alexander. See also Alfred Theophras de Mouilpied.

Rullmann, W., the reactions for the oxidising enzymes of cow’s and human milk, 1904, A., ii, 304.

Schardinger’s milk reaction, 1911, A., ii, 667.

Rulon, S. A., and Philip Bouvier Hawk, studies on water drinking. III. Uric acid elimination following copious water drinking between meals, 1911, A., ii, 135.

studies on water drinking. IV. The excretion of chlorides when large amounts of water are taken between meals, 1911, A., ii, 1012.

Rumine, Wladimir. See Herman Decker.

Rumpf, Karl. See Julius von Braun.

Rumpf, Theodor, Max Dennstedt, and A. Gronover, quantity of fat contained in human blood and some organs, 1904, A., ii, 136.

Rumpf, Theodor. See also Max Dennstedt.

Runge, Carl [David Tolnai], relationship between spectra and atomic weights, 1904, A., ii, 2.
spectra of the alkali [metals], 1908, A., ii, 78.
Rupe, Carl [David Tulmé], radioactivity of air over the open sea, 1908, A., ii, 80; 1911, A., ii, 1050.

Rupe, Carl, and Julius Precht, bunsen flame spectrum of radium, 1903, A., ii, 346.

position of radium in the periodic system according to its spectrum, 1903, A., ii, 346.

spark spectrum of radium, 1903, A., ii, 621; 1904, A., ii, 461.

heat given out by radium, 1904, A., ii, 7.

Rupe, Otto. See Fritz Reitzenstein.

Runzel, Karl. See Richard Anschütz.

Runne, Ernst. See also Hermann Emde.

Runne, H. See Julius Troger.

Ruoss, Hermann, estimation of tannic acid by ferric salts, 1903, A., ii, 189.

Ruot. See Pierre Mazé.

Rupe, Hans, carvone, 1906, A., i, 681.

turmeric oil, 1908, A., i, 95.

Rupe, Hans, and Hans Altenburg, β-cinamic acid, 1909, A., i, 7.

semicarbazide and cyclic nitrosoclorides, 1911, A., i, 72.

Rupe, Hans, and James Bürgin, hydrocarbons from cinamyl chloride, CH₃C₆H₃Cl, 1910, A., i, 161.

deduction of methyl pulegone, 1910, A., i, 378.

turmeric oil. IV. Synthesis of α-p-tolyl-α-methylbutyric acid, 1911, A., i, 446.

Rupe, Hans, and Ernst Busolt, β-phenyl-cinnamic acid (ββ-diphenylacrylic acid), 1908, A., i, 23.

Rupe, Hans, Karl Dorschky, and Walther Lotz, carvone. III. The semicarbazones of carvone, 1909, A., i, 595.

Rupe, Hans, and Alfred Ebert, a hydrocarbon from isopulegone, 1908, A., i, 663.

Rupe, Hans, and Fritz Emmerich, action of magnesium methyl haloids on carvone and dihydrocarvone, 1908, A., i, 433.

action of magnesium methyl iodide on carvone and pulegone, 1908, A., i, 556.
RUPE, Hans, and E. Oestreich, reduction of semicarbazones and the preparation of some hydroxytriazoles, 1912, A., i, 220.

RUPE, Hans, Samuel Pfeiffer, and Immannuel Splitterger, condensations with citronellial. II, 1907, A., i, 711.

methineammonium compounds, 1906, A., i, 754.

RUPE, Hans, and Heinrich Prose, hydrocarbons from α-bromostyrene and preparation of γ-phenylbutyric acid, 1910, A., i, 367.

RUPE, Hans, Max Ronus, and Walther Lotz, preparation of unsaturated aliphatic acids with a double linking in the αβ-position, 1903, A., i, 139.

RUPE, Hans, and Paul Schlochoff, action of semicarbazide on unsaturated ketones, 1904, A., i, 144.

cineole. IV. Synthesis and constitution of cinenic acid, 1905, A., i, 409.

methylheptenone oxides, 1905, A., i, 414.

carvone, 1905, A., i, 449.

RUPE, Hans, Heinz Schobel, and Erwin Abegg, constitution of 3-methylpylogen (3-methylpentadiene), 1912, A., i, 573.

RUPE, Hans, and Georg L. M. Schwarz, chromophorous groups. II. Methine-
ammonium dyes, 1905, A., i, 83.

RUPE, Hans, and Oskar Siebel, methine-
ammonium dyes, III, 1906, A., i, 585.

RUPE, Hans, and Immannuel Splitterger, aminocampholic acids, 1907, A., i, 1016.

RUPE, Hans, and Alfred Steinbach, turmeric oil. II. Oxidation products of curcumone, 1911, A., i, 69.

turmeric oil. III. Synthesis of γ-p-
tolylvaleric acid, 1911, A., i, 293.

RUPE, Hans, Karl Georg Thiess, and Alexander Wetter, benzoylbenz-
iminazole, 1910, A., i, 71.

RUPE, Hans. See also Sidonius Kessler.

RUPERT, Frank F. See also Gilbert Newton Lewis.

RUPP, Erwin, iodometry of sulphurous acid, 1903, A., ii, 40.

iodometry of the peroxides of calcium, strontium, barium, magnesium, and sodium, 1903, A., ii, 42.

chlorine evolution apparatus and an apparatus for the electrolysis of hydrochloric acid for lecture purposes, 1903, A., ii, 69.

iodometry of ferrous salts, 1903, A., ii, 244.

iodometry of hydrazine, 1903, A., ii, 329.

iodometry of phosphorus, 1903, A., ii, 692.

iodometric estimation of zinc with potassium ferrocyanide, 1903, A., ii, 695.

iodometric estimation of mercuric cyanide, 1903, A., ii, 696.

titration of metals with iodic acid, 1903, A., ii, 755.

volumetric estimation of mercurous salts and of mercurous and mercuric salts together, 1903, A., ii, 759.

titration of hydroxygynom trisecipitatum alb, 1903, A., ii, 759.

titration of minute quantities [especially of gold], 1904, A., ii, 150.

a new burner for spectra ; apparatus for collecting gases for lecture experiment purposes, 1904, A., ii, 153.

iodometry of the precipitated per-
oxides of lead, bismuth, and manganese, 1904, A., ii, 211.

volumetric and gravimetric estimation of platinum, 1904, A., ii, 296.

formic acid and its volumetric estimation, 1905, A., ii, 291.

iodic acid as an oxidising reagent, 1905, A., ii, 417.

iodometric estimation of sulphurous acid, 1905, A., ii, 479.

estimation of phosphorus in phosphorised oil, 1905, A., ii, 763.

evaluation of officinal mercuric cyanide, 1905, A., ii, 867.

titrmetric estimation and separation of cyanides, thiocyanates, and chor-

lides, 1905, A., ii, 867.
Rupp, Erwin, mercuric oxycyanide, 1906, A., i, 340.

modification of Beckmann’s boiling-point apparatus, 1906, A., ii, 147.

two new forms of apparatus in organic analysis, 1906, A., ii, 802.

titration with permanganate in alkaline solution; [estimation of formaldehyde and nitrous acids], 1906, A., ii, 907.

standardisation of acids and alkalis, 1907, A., ii, 194.

acidimetric estimation of both mercury components in mercury oxycyanide, 1908, A., ii, 634.

preparation of carbon monoxide, 1908, A., ii, 943.

volumetric estimation of mercury by means of the thiocyanate, iodometric, and acidimetric processes, 1908, A., ii, 1073.

new volumetric methods for titrating zinc or lead, 1910, A., ii, 243.

a practical gas generating arrangement in connexion with the nitrometer, 1910, A., ii, 844.

phenolphthalein derivatives and their behaviour as indicators, 1911, A., i, 301.

detection of fluorine, 1912, A., ii, 88.

simple apparatus for estimating carbon dioxide, 1912, A., ii, 297.

Rupp, Erwin, and Albert Finck, iodometry of phosphorous acid and phosphorus trihaloids, 1903, A., ii, 41.

iodometry of hypophosphites and hypophosphates, 1903, A., ii, 330.

Rupp, Erwin, and Samuel Goy, mercuric oxycyanide, 1908, A., i, 770; 1909, A., i, 295; 1912, A., i, 613.

preparation of mercuric cyanide, 1908, A., i, 863.

Rupp, Erwin, and Max Horn, volumetric estimation of iodides in the presence of chlorine and bromine ions, 1906, A., ii, 895.

titration of ferrous salts with alkali hypiodite, 1907, A., ii, 132.

Rupp, Erwin, and Walter Klee, preparation of mercuric chloride from mercuric sulphate and sodium chloride by the wet process, 1910, A., ii, 615.

Rupp, Erwin, and Julius Kost, estimation of iodine in pharmaceutical preparations such as ointments, etc., 1907, A., ii, 298.

Rupp, Erwin, and Ludwig Krauss, iodometric estimation of copper as cuprous xanthate, 1903, A., ii, 106.

Rupp, Erwin, and K. Kropat, estimation of total mercury in official mercury salicylate, 1912, A., ii, 998.

Rupp, Erwin, and Franz Lehmam, acidimetric assay of white precipitate, 1908, A., ii, 70.

complete analysis of mercury cyanides, 1908, A., ii, 70.

simple preparation of mercuric oxycyanide solution from its components, 1909, A., i, 92.

titration of diabetic sugar, 1909, A., ii, 442.

volumetric estimation of sugars by K. Lehmann’s process, 1910, A., ii, 163.

volumetric separation of mercury and silver, 1910, A., ii, 350.

qualitative analytical treatment of silicates with boric acid, 1911, A., ii, 658.

Rupp, Erwin, and Richard Loose, an indicator highly sensitive towards alkali and suitable for titrations with centinormal solutions, 1909, A., ii, 90.

Rupp, Erwin, and Johannes Mieleck, estimation of peroxidised compounds by means of alkali hypiodite, 1907, A., ii, 391.

Rupp, Erwin, and Georg Schumann, iodometric estimation of bismuth as chromate, 1903, A., ii, 110.
Rupp, Erwin, and Wilhelm Friederich Schirmer, volumetric estimation of mercuric oxide, 1908, A., ii, 1073.

Rupp, Erwin, and Karl Seegers, indicators in the titration of cinchona bases, 1908, A., ii, 239.

Rupp, Erwin, and Max Zimmer, iodometry of thallium as chromate, 1903, A., ii, 183.

Rupp, G., composition of the mineral water of Bad Dürkheim, 1912, A., ii, 263.

Ruppenthal, Karl. See Ferdinand Henrich.

Ruppenthal, Richard. See Max Busch.

Ruppert, Eduard. See Alfred Einhorn.

electrical conductivity of sea-water, 1906, A., ii, 492.

the alkalinity of sea-water, 1910, A., ii, 405, 452.

precipitation of sulphate ions as barium sulphate, 1910, A., ii, 1108.

ratio of the Cl-, SO₄²⁻, and Ω⁻values of a series of sea-water samples examined in the hydrographical laboratories of Helsingfors, Kiel, Christiania, Monaco, and Nancy, 1911, A., ii, 123.

hydrographical-chemical methods, 1912, A., ii, 599.

Rusche, Franz. See Robert Behrend.

Rusche, Wilhelm, can horseflesh be detected by glycosen estimation? 1907, A., ii, 320.

Ruschhaupt, Walter, diuresis; the opposite influence of two salts, 1903, A., ii, 33.

diuresis; the influence of diuretics on the excretion of sodium chloride, 1903, A., ii, 33.

diuresis; the effect of certain operative procedures on sodium chloride diuresis, 1903, A., ii, 33.

Ruschhaupt, Walter. See also Wilhelm Filehne, and Emil Knoevenagel.

Rusconi, Arnaldo, detection of ethyl alcohol in chloroform, 1909, A., ii, 768.

hemolysis as a means of detecting saponin in beer, aerated waters, and wine, 1910, A., ii, 559.

Rusnov, Peter von. See Rudolf Wegscheider.

Russ, Donald E. See Miles Standish Sherrill.

Russ, Franz, action of the silent electric discharge on chlorine, 1905, A., ii, 381.

decomposition of formaldehyde by the silent discharge, 1906, A., i, 627.
influence of the material of the vessel and of light on the formation of ozone by the silent discharge, 1906, A., ii, 606.

Scharwin, Wassili W., and Paul Schorigin, oximes of unsymmetrical ketones with two similar nuclei, 1903, A., i, 635.

Schatz, W., estimation of ferric iron in the presence of ferrous iron, 1910, A., ii, 457.

Schauh, F. See Julius Tröger.

Schauh, Fritz. See Carl Bülow.

Schauh, Ira Obed. See James Harvey Pettit.

definition of radioactivity, 1906, A., ii, 411.

“dimorphism” of benzophenone, 1910, A., i, 391.

Schauh, Karl, and Heinrich Wüstenfeld, selective absorption and emission, 1912, A., ii, 18.

Schauhmann, Georg. See Erwin Rupp.

Schauhmann, H., estimation of sugar by Allihn’s and Meissl’s methods, 1908, A., ii, 437.

estimation of phosphoric acid in metabolism experiments, 1909, A., ii, 829.

Schauhmann, Ludwig. See Leopold Büghemer.

Scheda, Kurt, derivatives of bromoacetanilide, 1903, A., i, 410.

trihydromethylenenfururanoxime and its compound with hydrogen chloride, 1903, A., i, 509.

Scheda, Kurt. See also Eduard Buchner.

Scheel, Kurt [Friedrich Franz Christian], formulé for the vapour pressure of water, ice, and dilute sulphuric acid at low temperatures, 1906, A., ii, 422.

refractive indices of gases at the temperature of the room and of liquid air, 1907, A., ii, 145.

Scheel, Kurt, and Wilhelm Heuse, apparent deviations from Mariotte’s law and their influence on the measurement of small pressures, 1908, A., ii, 1016.

measurement of the saturation pressure of water vapour below 0°, 1909, A., ii, 643.

specific heat, C_p, of air at room and low temperatures, 1912, A., ii, 19.

Scheel, Karl, and Rudolf Schmidt, refractive power of helium, 1908, A., ii, 333.

Scheen, Oscar, electrolytic estimation of antimony, 1908, A., ii, 636.

Scheen, Oscar. See also Rudolph Fittig.

Scheermesser, Friedrich Wilhelm, pepsin-glutino-peptone, 1904, A., i, 463.

sublimation by the dynamical method, 1910, A., ii, 484.

appearance of a maximum and minimum pressure with heterogeneous equilibria at a constant temperature, 1910, A., ii, 697.

the determination of three-phase pressures in the system: hydrogen sulphide and water, 1911, A., ii, 264.

the system: hydrogen sulphide–water, 1911, A., ii, 870.

gas equilibria, 1912, A., ii, 328.

quaduple points and the continuities of the three-phase line, 1912, A., ii, 1151.

the system: ether–water, 1912, A., ii, 1151.

Scheffer, Frans Eppo Cornelis, and J. P. Treub, vapour pressure of nitrogen peroxide, 1912, A., ii, 132, 936.

Scheffer, Frans Eppo Cornelis. See also Andrea Smits.

Scheiber, Johannes, N-α-naphthylhydroxylamine, 1904, A., i, 867.

N-alkylketoximes, 1908, A., i, 763.

action of chlorides of dibasic acids on ethyl sodiomalonate, 1909, A., i, 363.

action of phthalylglycolyl chloride on ethyl sodioacetocetate, 1909, A., i, 390.

cuprous acetylide in analysis, 1909, A., ii, 765.

homologous nature of anthranil and methylanthranil, 1911, A., i, 915.

Scheiber, Johannes, and Ernst Beckmann, N-α-naphthylhydroxylamine, 1908, A., i, 725.

Scheiber, Johannes, and Paul Brandt, N-α-naphthylhydroxylamines. III., 1908, A., i, 725.

derivatives of 1-amino-β-naphthol, 1908, A., i, 726.

N-α-alkylketoximes, 1908, A., i, 764.

Scheiber, Johannes, and A. Deutsch, 0-cyanobenzoic acid, 1912, A., i, 863.
Scheibler, Johannes, and Rudolf Flebbe, constitution of copper acetylhyde, 1908, A., i, 933.
Scheibler, Johannes, Hanns Fleischmann, and Rudolf Flebbe, appearance of stereoisomerism in $N$-substituted aldoximes, 1909, A., i, 391.
Scheibler, Johannes, Hanns Fleischmann, and Kurt Klope, $N$-alkylated aldoximes, 1911, A., i, 382.
Scheibler, Johannes, and Max Knothe, chlorocamphornitrilic acid, 1912, A., i, 542.
Scheibler, Johannes, and Hubert Wolf, $N$-alkylketoxines, 1907, A., i, 1028.
Scheibler, Johannes. See also Ernst Beckmann, and Hans Reckleben.
Scheiber, Helmuth, the mutual relationship of the optically active forms of $BB^\prime$-iminodibutyric and $\alpha$-amino-butyric acid, 1912, A., i, 632.
Scheiber, Helmuth, and Alvin Sawyer Wheeler, the Walden inversion. VII. Optically active lentic (a-hydroxyisohexoic) acid and its transformation into a-bromoisoheaxoic acid, 1911, A., i, 535.
Scheiber, Helmuth. See also Emil Fischer.
Scheid, Karl, a lecture demonstration of lime-burning, 1909, A., ii, 308.
Scheidemann, Julius. See Wilhelm Muthmann.
Schein, S. D. See Wladimir E. Pawloff.
Scheit, Arthur. See Josef Emanuel Hibach.
Scheitlin, Emil, preparation of 4-sulphonanino-1-phenyl-2,3-dimethyl-5-pyrazolone, 1908, A., i, 658.
preparation of 4-dimethylaminol-1-phenyl-2,3-dimethyl-5-pyrazolone, 1908, A., i, 1019.
Scheitz, Paul, commercial azolitmin, 1910, A., i, 865.
the portion of litmus soluble in alcohol, 1910, A., i, 866.
Scheitz, Wilhelm. See Balthasar Pfyl.
Scheljapin, A. See Leo Pissarjewsky.
Schell, Curt, photographic-photometric absorption measurements of silver iodide in the ultra-violet spectrum, 1911, A., ii, 831.
Schellack, Eduard. See Otto Wallach.
Schelle, Robert, preparation of pure tellurium, 1911, A., ii, 388.
Schellens, Walther, behaviour of vegetable and animal textile fibres with solutions of metallic salts, 1906, A., i, 69.
Scheller, Alfred. See Erich Müller.
Scheller, Emil. See Alfred Heiduschka, and Andreas Lipp.
Schellhaas, H. W. Hugo, anomalous anodic polarisation by nitric acid, 1908, A., ii, 249.

Schreinemakers, Frans Antoon Hubert, mixed crystals in systems of three substances, 1905, A., ii, 154, 376, 685; 1906, A., ii, 342; 1907, A., ii, 17.

ternary equilibria, 1905, A., ii, 804.

• potassium chromates 1905, A., ii, 818.
• ammonium chromates, 1905, A., ii, 820.
• lithium chromates, 1906, A., ii, 24.
• alkali chromates, 1906, A., ii, 287.

a tetra-component system with two liquid phases, 1907, A., ii, 337.

equilibria in quaternary systems, 1908, A., ii, 571, 985.

doing the system: water, ammonium, barium and cupric chlorides, 1909, A., ii, 30.

the system: copper sulphate—copper chloride—ammonium sulphate—ammonium chloride and water at 30°, 1909, A., ii, 403.
certain deductions for quaternary systems, 1909, A., ii, 559.

equilibria in quaternary systems; the system: sodium oxide, barium oxide, hydrochloric acid, and water, 1909, A., ii, 986.

non-dehydration of hydrates by absolute alcohol, 1910, A., i, 294.

equilibria in quaternary systems; the system: lithium sulphate—ammonium sulphate—ferrous sulphate and water, 1910, A., ii, 195.

raising and lowering of the freezing point, 1910, A., ii, 389.

the transformation point of double salts, 1910, A., ii, 489.

Schreinemakers, Frans Antoon Hubert, and (Miss) Woutrine Constance de Baat, the system: water, and sodium, barium, and copper chlorides, 1908, A., ii, 1020.

equilibria in quaternary systems; the system: water—ethyl alcohol—sodium chloride—sodium sulphate, 1909, A., ii, 872.

the system: water—ammonium nitrate—silver nitrate, 1910, A., ii, 489.
equilibria in the system: sodium chloride, sodium sulphate, cupric chloride, cupric sulphate, and water at 25°, 1911, A., ii, 381.
Schreinemakers, Frans Antoon Hubert, and Daniel Herman Cochere, equilibirinum in the system: ammonium sulphate, lithium sulphate, and water, 1906, A., ii, 424.

Schreinemakers, Frans Antoon Hubert, and Joseph J. B. Deuss, the system: water—alcohol—manganous sulphate, 1912, A., ii, 441.

Schreinemakers, Frans Antoon Hubert, and Hendrik Filippo, rubidium chromates, 1906, A., ii, 445.

Schreinemakers, Frans Antoon Hubert, and Petrus Hubertus Jacobus Hoenen, double salts of ammonium sulphate and ammonium nitrate, 1909, A., ii, 236.

Schreinemakers, Frans Antoon Hubert, and J. L. M. van der Horn van der Bos, the system: water—phenol—hydrochloric acid at 25°, 1912, A., ii, 543.

Schreinemakers, Frans Antoon Hubert, and A. Massink, some compounds of nitrates and sulphates, 1912, A., ii, 553.

Schreinemakers, Frans Antoon Hubert, and D. J. Meyeringh, caesium chromates, 1909, A., ii, 41.

Schreinemakers, Frans Antoon Hubert, and J. Milikan, [oxy-salts of the alkaline-earth metal haloids], 1912, A., ii, 760.

Schreinemakers, Frans Antoon Hubert, and Antonius Jacobus Cornelis de Waal, the system: water, lithium sulphate, and aluminium sulphate, 1906, A., ii, 855.

Schreiner, Eirling, some hydrocarbons of the diphenyl series, 1910, A., i, 367.

derivatives of ethylbenzene and of isopropylbenzene, 1910, A., i, 467.

higher homologues of benzene, 1910, A., i, 661.

Schreiner, Oswald, colorimetric estimation of [small amounts of] phosphoric acid in the presence of silica, 1904, A., ii, 85.

Schreiner, Oswald, estimation of phosphoric acid in aqueous extracts of soils and plants, 1904, A., ii, 777.

colorimetric methods; a simple colorimeter for general use, 1905, A., ii, 760.
symptoms shown by plants under the influence of different toxic compounds, 1911, A., ii, 427.

Schreiner, Oswald, and Bailey Edgar Brown, colorimetric estimation of phosphates, 1905, A., ii, 117.

Schreiner, Oswald, and George Henry Faillyer, absorption of phosphates by soils, 1906, A., ii, 485.

absorption of potassium by soils, 1906, A., ii, 575.

Schreiner, Oswald, and William S. Ferris, colorimetric estimation of magnesium, 1904, A., ii, 681.

Schreiner, Oswald, and Elbert C. Lathrop, dihydroxystearic acid in good and poor soils, 1911, A., ii, 923.

the chemistry of steam-heated soils, 1912, A., ii, 981.

Schreiner, Oswald, and Howard Sprague Reed, the role of the oxidising power of roots in soil fertility, 1907, A., ii, 715.

power of sodium nitrate and calcium carbonate to decrease toxicity in conjunction with plants growing in solution cultures, 1908, A., ii, 420.

role of oxidation in soil fertility, 1909, A., ii, 1048.

Schreiner, Oswald, and Elwood C. Shorey, secondary decomposition products of proteins in soils, 1907, A., ii, 716.

isolation and toxic properties of an organic soil constituent, 1908, A., ii, 421.

isolation of picolinecarboxylic acid from soils and its relation to soil fertility, 1908, A., ii, 889.

isolation of dihydroxystearic acid from soils, 1908, A., ii, 1067.

agrostero: a cholesterol substance in soils, 1909, A., i, 152.

the presence of arginine and histidine in soils; pyrimidine derivatives and purine bases in soils, 1911, A., ii, 65.

chemical nature of soil organic matter, 1911, A., ii, 147.

some acid constituents of soil humus, 1911, A., ii, 147.

cholsterols in soils: phytosterol, 1911, A., ii, 327.
Schreiner, Oswald, and J. J. Skinner, ratio of plant nutrients as affected by harmful soil compounds, 1910, A., ii, 740.

Schreiner, Oswald, and Michael Xavier Sullivan, the products of germination affecting soil fertility, 1907, A., ii, 715.

toxic substances arising during plant metabolism, 1908, A., ii, 422.
soil fatigue, 1909, A., ii, 428.
concurrent oxidising and reducing power of roots, 1910, A., ii, 741.

Schreiner, Oswald, Michael Xavier Sullivan, and F. P. Reid, studies in soil oxidation, 1911, A., ii, 146.

Schreiner, Otto. See Johannes D'Ans.

Schreiner, Wilhelm. See Ludwig Wolff.

Schrenk, Alfred. See Karl Auwers.

Schreyer, Max. See the effect of abundant protein food on metabolism, 1906, A., ii, 101.

Schreyer, Max. See also Johannes Frenzel.

Schreyer, F. See Karl Bornemann.

Schroeder, Friedrich. See Theodor Zincke.

Schröpf, August, improved hydrogen sulphide apparatus, 1905, A., ii, 383.

Schrobsdorff, Hans, derivatives of chrysazin and of hystazarin, 1903, A., i, 840.

Schroeder, August, foreign fats and oils, 1906, A., ii, 131.

Schroeder, Ernst. See Richard Anschütz.

Schroeder, Fritz. See Emil Knoevenagel.

Schroeder, G., influence of potassium cyanide on the respiration of Aspergillus niger, with remarks on the mechanism of the action of hydrocyanic acid, 1908, A., ii, 413.

Schroeder, Heinrich (Bonn), enzymes in the spores of Fuligo varians, 1907, A., ii, 123.
the resistibility of wheat and barley to poisons and its importance for sterilisation, 1910, A., ii, 1103.

Schroeder, Heinrich (Hedwigburg), the utilisation of native iron-aluminium phosphates, 1908, A., ii, 500.

Schroeder, Heinrich (Heidelberg). See Julius Wilhelm Brühl.

Schroeder, Iwan, apparatus for lecture demonstration in physical chemistry, 1906, A., ii, 727.

Schroeder, Johann von, the tanning process, 1910, A., i, 129.

Schroeder, Johannes, pyridine as a solvent and ionising medium for inorganic metallic salts, 1905, A., ii, 306.

Schroeder, Johannes, formation of a double compound of mercuric cyanide and pyridine, 1908, A., i, 252.

demonstration of the formation of ammonium amalgam by electrolysis of ammonium chloride, 1908, A., ii, 270.
solubility of potassium chloride in aqueous pyridine at 10°, 1908, A., ii, 277.
behaviour of ethyl ether on the passage of an electric current, 1909, A., ii, 462.
apparatus for the determination of solubilities at the boiling point of the solvent, 1909, A., ii, 646.
simple apparatus for extraction in the cold and for the determination of solubility at room temperature, 1909, A., ii, 647.
estimation of nicotine in concentrated tobacco juice, 1911, A., ii, 163, 552.
quantity of carbon dioxide in the atmosphere at Monte Video, 1911, A., ii, 1086.

Schröder, Johannes, and Hans Dammann, the amounts of hydrogen cyanide produced by different varieties of sorghum, 1912, A., ii, 197.

Schroeder, Johannes, and Hans Steiner, molecular weights of inorganic salts in methyl acetate, 1909, A., ii, 212.

Schroeder, Johannes. See also Alexander Naumann.

Schröder, Karl, influence of copper on the titration of iron by the Zimmermann-Reinhardt method, 1909, A., ii, 186.
volumetric estimation of thiocyanic acid and the causes of the low results, 1909, A., ii, 948.
the part taken by atmospheric oxygen in the oxidation of oxalic acid by the higher oxides of manganese, 1910, A., ii, 899.
the purification and analytical control of potassium ferrocyanide, 1911, A., ii, 1143.

Schroeder, Paul von, phenomena of the setting and swelling of gelatin, 1903, A., ii, 721.

Schroeder, Paul von. See also Richard Abegg.

Schrödter, Max. See Daniel Vorländer.

Schrombogens, Josef. See August Michaelis.

Schröter, Fritz, estimation of hexamethylenetetramine (nortropine) in urine, 1911, A., ii, 343.

composition of the ethereal oil of the
carlina thistle (Carlina acanthis, L.),
1906, A., i, 297.
action of sodium on cyclic ketones;
derivatives of fenochone and of cam-
pheinolone, and their constitution,
1906, A., i, 681.
preparation of γ-, δ-, ε-, etc., glycols
and their derivatives from the corre-
sponding lactones, 1906, A., i, 784.
preparation of a base, C_{10}H_{17}ON, from
pulegone, 1906, A., i, 969.
constituents of essential oils. I. Resolu-
tion of the dicyclic trioccean system in
sabine and tanacetone.
II. A new series of terpenes (cyclo-
pentadienes), 1907, A., i, 145.
constitution of terpinene, origanol,
sabine, dipentene, and their deri-
atives, 1907, A., i, 329.
constituents of essential oils, 1907, A.,
i, 438.
constituents of essential oils. I. Dihy-
droterpinene = carvomenthene.
II. Oil from Pilea. III. Addition of hy-
drogen chloride, etc., to dicyclic
singly unsaturated systems. IV. Deriva-
tives of sabine and con-
stitution of terpinene, 1907, A., i,
714.
constituents of essential oils; the seq-
quiterpenes present in East Indian
sandal-wood oil, 1907, A., i, 751.
constituents of essential oils. I. Separa-
tion of camphor from fenochone
containing camphor. II. Santene,
1908, A., i, 37.
constituents of essential oils; constitu-
tion of umbellulone, 1908, A., i,
92; 1909, A., i, 38.
constituents of essential oils; com-
position of Ayapana oil, 1908, A., i,
279.
constituents of essential oils; santalols,
C_{10}H_{16}O, and their derivatives, 1908,
A., i, 433.
constituents of essential oils; elemicin,
a high-boiling constituent of elemi
oil, and the displacement of alkyloxy-
groups in the benzene nucleus by
hydrogen, 1908, A., i, 557.
constituents of essential oils; elemicin
and isoelemicin, 1908, A., i, 558.
Semmler, Friedrich Wilhelm, constituents of essential oils; establishment of the constitutional formula of elemicin and isoelemicin, 1908, A., i, 664.

constituents of essential oils; elimination of methoxy-groups in the para-position with respect to allyl or propenyl radicles, 1908, A., i, 784.

constituents of essential oils; carvenene, C_{10}H_{16} and "pure" terpinene, 1909, A., i, 110.

constituents of essential oils; constitution of camphene; its oxidation with ozone, 1909, A., i, 170.

constituents of essential oils; inversion of carvenene, C_{10}H_{18} (terpinene ?), into isocarvenene, C_{12}H_{18} (isoterpinene ?), 1909, A., i, 171.

constituents of essential oils; further decomposition of eksantalal; enolisation of aldehydes by conversion into the corresponding unsaturated esters; enol-phenylacetaldehyde-monoacetate, 1909, A., i, 239.

constituents of essential oils; enol-camphenilaldehyde acetate and further derivatives of camphenilaldehyde; production of terpinolene by the inversion of carvenene (terpinene ?), 1909, A., i, 312.

constituents of essential oils; enol-a-heptanual acetate and enol-a-octanal acetate, 1909, A., i, 364.

constituents of essential oils; enol-isovaleraldehyde acetate and enol-citroneill acetate; and the conversion of the latter into isopulegol acetate, 1909, A., i, 594.

constituents of essential oils; carvenene, C_{10}H_{18} and "terpinene," 1909, A., i, 942.

constituents of essential oils; tetrahydroxantale, 1910, A., i, 181.

constituents of essential oils; eksantalactic acid, C_{10}H_{18}O_{2}, eksatalal, C_{12}H_{18}O, and derivatives, 1910, A., i, 495.

constituents of essential oils; constitutions of the a-santalol and of the a-santalene series, and of sesquiterpene alcohols and of sesquiterpenes, 1910, A., i, 573.

Semmler, Friedrich Wilhelm, and Edmund Ascher, constituents of essential oils; carlina oxide, 1909, A., i, 597.

Semmler, Friedrich Wilhelm, and Konrad Bartelt, constitution of the beta-fencholic acid series, 1907, A., i, 11.

Semmler, Friedrich Wilhelm, and Konrad Bartelt, constituents of essential oils, 1907, A., i, 226.

myrtenol, a primary alcohol, C_{10}H_{16}O, from the essential oil of Myrtus communis, 1907, A., i, 429.

constituents of essential oils; teresantalacic acid, its derivatives, and constitution, 1907, A., i, 703.

constituents of essential oils; teresantalacic acid, C_{10}H_{13}O_{2}; a new nor-camphor and its derivatives, 1907, A., i, 1062.

constituents of essential oils; further derivatives of santalene and the formation of a new dicyclic saturated system—dicyclo-2:2:2-octane, 1908, A., i, 38.

constituents of essential oils; derivatives and constitution of santene, 1908, A., i, 194.

constituents of essential oils; elucidation of the constitution of santene, C_{9}H_{14}, 1908, A., i, 195.

constituents of essential oils; derivatives of santene, santene glycol, and the unsaturated ketone, C_{9}H_{14}O, derived from the diketone, C_{8}H_{14}O_{2}, 1908, A., i, 355.

constituents of essential oils; homopiperonal and its derivatives, 1908, A., i, 901.

Semmler, Friedrich Wilhelm, and Kurt Bode, santolal, 1907, A., i, 431.

Semmler, Friedrich Wilhelm, and Alfred Hoffmann, constituents of essential oils; sesquiterpene cedrene, 1907, A.; i, 946.

Semmler, Friedrich Wilhelm, and Colin Ernest McKenzie, buchu-camphor (diosphenol), C_{10}H_{16}O_{2}, 1906, A., i, 373.

Semmler, Friedrich Wilhelm, and Erwin W. Mayer, constituents of essential oils; regeneration of caryophyllene, 1911, A., i, 73.

constituents of essential oils. I. Identity of the aliphatic terpene from oil of hops with myrcene. II. Methyl esters of dicarboxylic acids. III. Preparation of isobornyl formate, 1911, A., i, 783.

constituents of essential oils; the constitution of the active caryophyllenes; transformation of the active caryophyllenes into monocyclic derivatives, 1912, A., i, 120.

constituents of essential oils; a new primary alcohol of the sesquiterpene series, cedrenol, C_{12}H_{24}O, 1912, A., i, 366.
Semmler, Friedrich Wilhelm, and Erwin W. Mayer, constituents of essential oils. I. $\psi$-Cedrol, a physical isomer of cedrol. II. Certain sesquiterpene alcohols. III. Tetrahydrocaryophyllene, 1912, A., i, 479.

Semmler, Friedrich Wilhelm, and Chaim Rimpel, synthesis of $\Delta^2$-menthene and of active $\Delta^2\Delta^3$-menthadiene, 1906, A., i, 682.

Semmler, Friedrich Wilhelm, Felix Rissee, and Fritz Schröter, constituents of essential oils (the composition of essential oil of vetiver), 1912, A., i, 882.

Semmler, Friedrich Wilhelm, and Edouard Schossberger, constituents of essential oils. I. Terpinolene. II. Terpinene, 1910, A., i, 53.

Semmler, Friedrich Wilhelm, and K.E. Spornitz, constituents of essential oils; chemical identity of synthetic and natural cedrene, 1912, A., i, 573.

Semmler, Friedrich Wilhelm, and Bruno Zaar, constituents of essential oils; further degradation of noresksantalic acid, 1910, A., i, 573.

Semper, Leopold, constitution of uracine, 1911, A., i, 577.

absorption spectra of the cinnamic acids, 1910, A., ii, 247.

mono- and di-ethyl esters of diphenylitaconic acid, 1911, A., i, 540.

isomerism and isomorphism of the yellow and the red fluorenones, 1911, A., i, 651.

transformations of allo- and isocinnamic acids in the fused and crystalline states, 1911, A., i, 859.

isomerism and polymorphism, 1911, A., ii, 970.

semicyclic 1:5-diketones of the cyclopentane series, 1912, A., i, 779.

optically active semicyclic 1:5-diketones of the cyclohexane series, 1912, A., i, 780.

Stobbe, Hans, and Erich Ebert, bleaching and polymerisation, 1911, A., ii, 452.

absorption of light of some corresponding ethane, ethylene, and acetyl derivatives, 1911, A., ii, 561.

fluorescence and radioluminescence of some hydrocarbons with ethane, ethylene, and acetylene residues, 1911, A., ii, 562.

Stobbe, Hans, Ferdinand Gademann, Alfred Lenzner, and Robert Rose, butadiene compounds. VII. The colour of the fulgenic acids and fulgides, 1905, A., i, 857.

Stobbe, Hans, and Richard Härtel, light absorption, basicity, constitution, and salts of ketones of the dibenzylidenacetone [distyryl ketone] and dibenzylidenecyclopentanone series, 1910, A., i, 43.

Stobbe, Hans, and Max Heller, Benzhydroquinoline derivatives from semicyclic 1:5-diketones of the cyclohexane series, 1903, A., i, 115.

the colours of indoneacetic acids and their carbazones, 1909, A., i, 102.

Stobbe, Hans, Otto Horn, and Phokion Naoum, phenylitaconic acid, 1909, A., i, 105.

Stobbe, Hans, Willy Keding, and Ferdinand Gollücke, a Bordeaux-red chrysketonecarboxylic acid and its yellow derivatives; a contribution to the theory of colour, 1907, A., i, 765.
Stobbe, Hans, Willy Keding, Phokion Naoum, and Victor von Vigier, a product of the action of light on diphenylfulgide and the polymerisation of phenylpropiolic acid, 1907, A., i, 769.

Stobbe, Hans, Paul Kohlmann, Phokion Naoum, and Kurt Kohlmann, triarylbutadienedicarboxylic acids; (butadiene compounds. V.), 1904, A., i, 672.

Stobbe, Hans, and Albert Küllenberg, butadiene compounds. XII. Yellow nitrotrophenylfulgenic acids and their red fulgides, 1906, A., i, 91, butadiene compounds. XIII. Aminotriphenylfulgenic acid, 1906, A., i, 92.

Stobbe, Hans, Alfred Lenzer, and Emil Wahl, butadiene compounds. IX. Yellow monoarylfulgides, 1906, A., i, 22.

Stobbe, Hans, and Ernst Müller, determination of the molecular weight of ethyl acetoacetate in freezing chloroform, 1907, A., i, 178.

Stobbe, Hans, and Georg Posnjak, the real state of metystrene and the polymerisation of styrene by light and heat, 1910, A., i, 235.

liquid and solid distyrene, 1910, A., i, 235.

polymerisation of cyclopentadiene, 1912, A., i, 842.

Stobbe, Hans, and Robert Rose, configuration of the stereoisomeric phenylmethyltaconic acids; (indoneacetic acids. II.), 1904, A., i, 503.

Stobbe, Hans, and Arthur Rosenburg, dicyclic ketone-alcohol prepared by the addition of menthone to phenyl styryl ketone, 1912, A., i, 785.

Stobbe, Hans, and Siegfried Seydel, light absorption, basicity, constitution, and salts of certain unsaturated cyclic ketones, ketone acids, and ketone esters, 1910, A., i, 45.

Stobbe, Hans, and Victor von Vigier, thermoehromic properties of dibenzylideneacetic anhydride; (butadiene compounds. VI.), 1904, A., i, 672.

formation of stereoisomeric butanedi-carboxylic acids by reduction of butadienedicarboxylic acids; (butadiene compounds. VI.), 1904, A., i, 673.

Stobbe, Hans, and Hans Volland, synthesis of a pyrhyridindene derivative from a semicyclic 1:5-diketone of the pentamethylene series, 1903, A., i, 115.

Stobbe, Hans, and Arthur Werdermann, tautomerism, especially in the semicyclic 1:3-diketone of the pentamethylene series, 1903, A., i, 421.

derivatives of 1:3-diketones containing nitrogen, 1903, A., i, 423.

Stobbe, Hans, and Forsyth James Wilson, action of light on the stereoisomeric piperonylideneacetones and on other unsaturated ketones, 1910, T., 1722; P., 206.

isomerism and polymorphism. I. Ketones of the type of benzylideneoxybenzoïn and their interconversion by heat, light, and other agencies, 1910, A., i, 623.

Stock, Alfred [Edward], action of liquefied ammonia on phosphorus, 1903, A., ii, 421.

solubility of nitrogen in liquid oxygen, 1904, A., ii, 396.

decomposition of antimony hydride, 1905, A., ii, 96.

two modifications of the Töplermercury air pump, 1905, A., ii, 514.

porous materials as substitutes for stopcocks in the manipulation of gases, 1908, A., ii, 99.

Hittorf's phosphorus, 1908, A., ii, 176, 274.

the mercury bath, a too-little known, useful expedient in gas-analytical work, 1909, A., ii, 89.

the sintering-point curve: a simple means of detecting chemical compounds between two components, 1909, A., ii, 543.
Stock, Alfred [Edward], phosphorus suboxide, 1910, A., ii, 121.
allobrophic forms of phosphorus, 1910, A., ii, 258.
ammonium tube furnace, 1912, A., ii, 341.

Stock, Alfred, and Heinrich von Bezold, sulphides of phosphorus. III. Vapour densities of the compounds, $P_4S_3$, $P_4S_7$, and $P_4S_9$, 1908, A., ii, 274.

Stock, Alfred, Heinrich von Bezold, Berla Herscovici, and Max Rudolph, the compounds of sulphur and phosphorus. IV. The existence of phosphorus disulphide, $P_3S_6$, 1909, A., ii, 569.

Stock, Alfred, and Herbert Blumenthal, carbon telluride, $\text{CTe}_2$, 1911, A., ii, 722.

decomposition of antimony hydride, 1908, A., ii, 503.

Stock, Alfred, and Kurt Friederici, the compound "$P_4S_{10}$" as described in the German patent No. 239162, 1912, A., ii, 1166.

Stock, Alfred, and Hans Grüneberg, phosphorus nitride, 1907, A., ii, 541.

Stock, Alfred, and Oscar Guttmann, decomposition of antimony hydride as an example of a heterogeneous catalytic reaction, 1904, A., ii, 246.
stibine and yellow antimony, 1904, A., ii, 267.
decomposition of antimony hydride, 1904, A., ii, 489.

Stock, Alfred, and Berla Herscovici, compounds of sulphur and phosphorus. VI. Tetraphosphorus heptasulphide, $P_5S_7$, 1910, A., ii, 201.
compounds of sulphur and phosphorus. VII. Phosphorus pentasulphide, $P_5S_{10}$ ($P_5S_3$), 1910, A., ii, 499.

the sun as a source of heat for chemical experiments, 1909, A., ii, 720.
volatility of the bromides of radium, barium, strontium, and calcium, 1909, A., ii, 1004.

Stock, Alfred, and Berthold Hoffmann, action of ammonia on phosphorus pentasulphide and the nitride of phosphorus, $P_3N_5$, 1903, A., ii, 207.
working with liquefied gases, 1903, A., ii, 359.

Stock, Alfred, and Walter Holle, preparation of boron nitride and calcium boride, 1908, A., ii, 687.

Stock, Alfred, and Otto Johannsen, action of ammonia on phosphorus; observations on the modifications of phosphorus, 1903, A., ii, 583.

mixtures of liquid oxygen and nitrogen, 1906, A., ii, 844.
analysis of gases rich in one or more constituents, 1906, A., ii, 894.

Stock, Alfred, and Max Rudolph, compounds of sulphur and phosphorus. V. Tetraphosphorus trisulphide, $P_4S_3$, 1910, A., ii, 290.

Stock, Alfred, and Wilhelm Scharfenberg, sulphides of phosphorus. II. Phosphorus pentasulphide, 1908, A., ii, 274.

Stock, Alfred, Hans Schrader, and Erich Stam, red phosphorus, 1912, A., ii, 639.

INDEX OF AUTHORS.

Stoc, Alfred, and Werner Siebert, preparation of yellow arsenic by means of the electric arc, 1905, A., ii, 315.
modifications of antimony, 1906, A., ii, 34.

Stoek, Alfred, and Kurt Thiell, phosphorus pentasulphide, 1905, A., ii, 703.

Stoek, Alfred, and Franz Wrede, heat of formation of phosphorus nitride, 1907, A., ii, 604.
heat of formation of antimony hydride, 1908, A., ii, 257.

Stoc, Josef. See Oscar Piloy.

Stoekem, Lorenz. See also Johann Albert Wilhelm Borchers, and Heinrich Danneel.

Stockhausen, Johannes, chemical composition of the dog's body, 1909, A., ii, 1034.

Stockings, William Ernest. See William Arthur Bone, and Julien Drugman.

Stockman, Ralph, and Francis James Charteris, action of arsenic on the bone marrow of man and animals, 1903, A., ii, 501.
action of lead, mercury, phosphorus, iron, and quinine on the bone marrow of rabbits, 1904, A., ii, 65.

Stockmann, H., the lactone of alpha-methoxyphenyl-3-hydroxy-3-tolylacetetoxydase, 1912, A., ii, 862.

Stockman, Hippolyt. See Hermann Staudinger.

Stockmayer, Hugo. See Carl Hell.

Stoddard, John Tappan, rapid electronanalysis with stationary electrodes, 1909, A., ii, 347.

Stoddard, W. B., products formed by the action of heat on p-sulphamido-benzoic acid, 1912, A., i, 111.

Stoddart, Charles W., estimation of sulphur in coal, 1903, A., ii, 40.

Stoddart, Charles W., and Charles Warren Hill, the stearate separation of the rare earths, 1911, A., ii, 727.

Stoddart, Charles W. See also A. R. Whitson.

Stodel, G. See Victor Henri.

Stoeecker, Max, a constituent of gas purification residues: iron carbonyl-ferrocyanide, 1904 A., i, 655.

Stoeecker, Max, Berthier's method for estimating calorific power and Welter's hypothesis, 1907, A., ii, 504.

Stoeecker, Max, and Friedrich Kraft, oxidation of diphenyl diselenide, 1906, A., i, 568.

Stoeklin, Elroi de, a new artificial peroxydase, 1909, A., i, 196.
new method for detecting traces of alcohols, 1910, A., ii, 162.
oxydase properties of oxyhaemoglobin, 1911, A., ii, 620.

Stoeklin, Elroi de, and Crochetelle, accidental presence of thiocyanates in milk and their origin, 1910, A., ii, 634.

Stoeklin, Elroi de. See also Jules Wolff.

Stoeklin, L., Fiehe's reaction in the analysis of honey, 1912, A., ii, 499.
rapid method for the detection of salicylic acid, 1912, A., ii, 699.

Stoehr, Ottmar. See Karl Bernhard Lehmann.

Stoehr, W., the effect of the new nitrogenous fertilisers on hemp, 1908, A., ii, 421.

Stoehrer. See Wilhelm Will.

Stoehrler, Walter. See Robert Pscherr.

Stoeltzner, Helene, influence of strontium on the growth and composition of bone, 1908, A., ii, 769.

Stoemer, Kurt, action of carbon disulphide and similar substances on soils, 1909, A., ii, 608.

Stoemer, Richard. See Lorenz Hiltner.

Stoemer, Richard [Heinrich Friedrich], phosphorus tribromide as a reducing agent, 1904, A., i, 181.
synthesis of aldehydes and ketones from as-disubstituted ethylene glycols and their ethers; a correction, 1907, A., i, 204.
1-phenyl-5-methylpyrazole, 1907, A., i, 252.
coumarandione, the analogue of isatin in the coumarone series, 1909, A., i, 174; 1912, A., i, 206.
conversion of aromatic acid azoimides into arylcarbimides, 1909, A., i, 785.
conversion of stable stereoisomeric ethylene derivatives into the labile modifications by ultra-violet light, 1910, A., i, 174.

Stoermer, Richard, and Theodor Biesenbach, elimination of carbon dioxide and carbon monoxide from α-phenoycinnamic acids, 1905, A., i, 524.

Stoermer, Richard, Brätügim, Egon Friderici, and Wilhelm Neckel, conversion of stable stereoisomerides into labile modifications by ultra-violet light. II., 1911, A., i, 295.

Stoermer, Richard, Claus Decker, and Karl Hildebrandt, migration of phenyl in the synthesis of phenylated coumarones; phosphen tribromide as a reducing agent. III., 1911, A., i, 664.

Stoermer, Richard, and Egon Friderici, stereoisomeric β-aryl cinnamic acids, 1908, A., i, 179.

Stoermer, Richard, Egon Friderici, and H. Altgelt, hydrolysis of phenolic ethers, 1908, A., i, 190.

Stoermer, Richard, and Carl Friemel, action of phenol on methylcoumaric acid dibromide and the constitution of Werner's "hydroxyphenylcoumaran," 1911, A., i, 632.

interaction of homologous phenols with methylcoumaric acid dibromide. II., 1912, A., i, 45.

Stoermer, Richard, and Otto Gaus, cinnoline syntheses; 4-anisylecinnoline, 1912, A., i, 1025.

Stoermer, Richard, and Friedrich Göhl, synthesis of coumaran and its homologues, 1903, A., i, 848.

Stoermer, Richard, and Paul Heymann, determination of the configuration of the stereoisomeric cinnamic acids, 1912, A., i, 974.

Stoermer, Richard, and Diedrich Johannsen, thionpyrazolones, 1907, A., i, 966.

Stoermer, Richard, and Otto Kippe, synthesis, isomeric changes, and decompositions of phenylated coumarones and coumarans, 1904, A., i, 182.

condensation of benzaldehyde and ethyl phenoxyacetate; Claisen's cinnamic acid synthesis by means of sodium, 1905, A., i, 526, 777.

Stoermer, Richard, and Ottocar Martin- sen, phosphorus tribromide as a reducing agent (conversion of pyrazolones into pyrazoles), 1907, A., i, 446.

Stoermer, Richard, and Ernst Oetker, an alcohol derived from coumarin and its conversion into a coumarone derivative, 1904, A., i, 244.

Stoermer, Richard, and Max Reuter, phenylated coumarones, 1904, A., i, 181.

Stoermer, Richard, and Max Schäffer, some 1-acylcoumarones and the decomposition of 1-acylcoumarone, 1903, A., i, 846.

Stoermer, Richard, and Richard Wehn, condensation of phenoxyacetone with benzaldehyde, 1903, A., i, 40.

Stötter, Hermann, See Martin Onslow Forster, and Wolfgang Weichardt.

Stoffel, A., binary and ternary alloys of tin, lead, bismuth, and cadmium, 1907, A., ii, 357.

formation of iron carbonyl, 1911, A., ii, 986.

Stoffella, G. See Henryk Gollum.

Stohmann, Adolf. See Hans Theodor Bucherer.

Stohr, Edward. See Kurt Brand, and Karl Elbs.

Stoicoj, A. See Max Wunder.

Stokes, (Miss) Eleanor Marguerite. See James Frederick Spencer.

Stokes, Henry Newlin, ferrous and ferric sulphides, 1907, A., ii, 471.

action of various solutions on pyrites and marcasite, 1907, A., ii, 471.

Stokes, Henry Newlin, and John R. Cain, colorimetric estimation of iron with special reference to chemical reagents, 1907, A., ii, 581.

Stokes, Henry Newlin. See also William Francis Hillebrand.

Stoklasa, Julius, carbohydrate combustion in the animal organism, 1905, A., ii, 179.
lactolase, an enzyme causing the formation of lactic acid in plant cells, 1905, A., ii, 192.
transformations of sodium nitrate in the soil of sugar-beet fields, 1905, A., ii, 854.
chemical reactions in the eruption of Vesuvius in April 1906, 1906, A., ii, 685.
the amount and origin of the ammonia in the products of the eruption of Vesuvius in April 1906, 1906, A., ii, 864.
physiological function of potassium in vegetable organs, 1908, A., ii, 417.
the chemical changes involved in the assimilation of free nitrogen by azotobacter and radiobacter, 1908, A., ii, 880.
the accelerating effect of potassium on sugar degradation; alimentary glycosuria, 1909, A., ii, 904.
the glycolytic enzymes of the pancreas, 1909, A., ii, 907.
can sodium nitrate be replaced by calcium nitrate for sugar-beet? 1909, A., ii, 1049.
biochemical circulation of the phosphate ion in soils, 1911, A., ii, 429.
physiological importance of manganese and aluminium in the vegetable cell, 1911, A., ii, 643.
biological absorption in soils, 1912, A., ii, 198.
Stoklasa, Julius, Vladimir Brdlik, and Adolf Ernest, the phosphorus content of chlorophyll, 1909, A., i, 248.
Stoklasa, Julius, Vladimir Brdlik, and J. Just, phosphorus, an essential constituent of chlorophyll, 1908, A., i, 279.
Stoklasa, Julius, and F. Czerny, isolation of the enzyme which affects anaerobic respiration in the cells of the higher plants and animals, 1903, A., ii, 320.
enzymes which induce fermentation isolated from the cells of the higher animals, 1904, A., i, 275.
Stoklasa, Julius, F. Czerny, Johann Jelinek, Eugen Simáček, and Eugen Vítek, alcoholic fermentation in animal tissues, 1904, A., ii, 272.
Stoklasa, Julius, F. Ducháček, and J. Pitra, the influence of bacteria on the decomposition of bone, 1903, A., ii, 169.
Stoklasa, Julius, and Adolf Ernest, origin, amount, and importance of carbon dioxide in soils, 1905, A., ii, 607.
chemical nature of root secretions, 1909, A., ii, 256.
Stoklasa, Julius, Adolf Ernest, Franz Straňák, and Eugen Vítek, the chemical changes involved in the assimilation of free nitrogen by azotobacter and radiobacter, 1908, A., ii, 975.
Stoklasa, Julius, Johann Jelinek, and Adolf Ernest, loss of nitrogen in soil manured with sodium nitrate, 1906, A., ii, 303.
influence of bacteria on the changes of nitric acid in soils, 1907, A., ii, 642.
Stoklasa, Julius, Johann Jelinek, and Eugen Vítek, anaerobic metabolism of higher plants and its relation to alcoholic fermentation, 1903, A., ii, 388.
intramolecular respiration of the sugar beet, 1903, A., ii, 746.
enzymes in the sugar-beet, 1904, A., ii, 365.
Stoklasa, Julius, Johann Šebor, and Wenzel Zdobnický, the photochemical synthesis of carbohydrates under the action of ultra-violet rays, 1912, A., i, 606.
Stoklasa, Julius, Adolf E. J. Trnka, and Eugen Vítek, chemical processes in the assimilation of elementary nitrogen by azotobacter and radiobacter, 1906, A., ii, 382.

Stoklasa, Julius, and Wenzel Zdobnický, photochemical synthesis of carbohydrates from carbon dioxide and hydrogen in the absence of chlorophyll, 1911, A., i, 178.
photochemical synthesis of carbohydrates in absence of chlorophyll, 1911, A., i, 789.
Stoland, O. O., the relative toxicity of dog's normal and hypertrophied thyroids to animals susceptible to thyroid feeding, 1912, A., ii, 467.
Stolberg, Carl, separation of calcium and magnesium, 1904, A., i, 591.

Stoll, Arthur. See Richard Willstätter.

Stoll, Carl. See Roland Scholl.

Stoll, Ludwig. See Erich Beschke.

Stolle, Ferdinand, caramel. V. Decomposition products of caramel, 1904, A., i, 228.

Stolle, Fr. See Francis Marre.

Stollé, Robert, action of action of iodine on hydrazines, 1903, A., i, 119.

action of hydrazine hydrate on ethylene bromide, 1903, A., i, 305.

condensation of acetone with ethyl succinate, 1903, A., i, 317.

formation of heterocyclic compounds from hydrazine derivatives, 1903, A., i, 721 ; 1904, A., i, 102, 453.

volumetric estimation of hydrazine, 1903, A., ii, 100.

formation of heterocyclic compounds from hydrazine derivatives. III. Dihydrotetrazines, 1904, A., i, 200.

formation of heterocyclic compounds from hydrazine derivatives. IV. Osotetrazines, 1904, A., i, 200.

triaminoguanidine, 1904, A., i, 980.

formation of heterocyclic compounds from hydrazine derivatives. XVIII. Action of ammonia on tetrabromo-benzylideneazine, 1905, A., i, 249.

condensation of ethyl acetoacetate with phenylmethylpyrazolone and the products formed by the action of hydrazine and of phenylhydrazine on dehydroacetic acid, 1905, A., i, 838.

condensation of ethyl acetoacetate with phenylmethylpyrazolone, 1906, A., i, 48.

condensation of aldehydes with s-dihydrotetrazines, 1906, A., i, 315.

conversion of hydrazine derivatives into heterocyclic compounds. XIX. Diacetyldihydrazide dichlorides, 1906, A., i, 453.

conversion of hydrazine derivatives into heterocyclic compounds. XXIII. Constitution of s-dihydrotetrazines, 1907, A., i, 359.

condensation of formaldehyde with hydrazine hydrate, 1907, A., i, 406.

conversion of hydrazine derivatives into heterocyclic compounds. XXIV. N-Amitriazole (s-dihydrotetrazine), 1907, A., i, 654.

action of magnesium on ethyl bromoacetate, 1908, A., i, 310.

formation of carbodiphenylimide from phenylcarbimide, 1908, A., i, 415.

Stollé, Robert, action of nitrous esters on hydrazine, phenyldihydrazine, and benzylhydrazine in alkaline solution, 1908, A., i, 917.

conversion of hydrazine derivatives into heterocyclic compounds. XXV. N-amino-osotriazoles, 1909, A., i, 123.

derivatives of osotetrazines and oso-triazoles, 1909, A., i, 337.

action of thionyl chloride on benzilic acid, 1910, A., i, 737.

fission of chloroform and carbon dioxide from trichloroacetic acid, 1910, A., ii, 1119.

action of hydrazine hydrate on sodium, 1911, A., ii, 201.

preparation of ethyl oxalhydrazinate, 1911, A., i, 357.

acetaldehyde-hydrazine, 1911, A., i, 421.

conversion of hydrazine derivatives into heterocyclic compounds. XXVI. Action of chlorine on benzaldazine and benzoylbenzylidenehydrazine, 1912, A., i, 504.

p-dimethylaminobenzenediazonium chloride, 1912, A., i, 920.

Stollé, Robert, and Adolf Bambach, conversion of hydrazine derivatives into heterocyclic compounds. XXII. Diaquhydrazide dichlorides of substituted benzoic acids and of a-naphthoic acid, 1906, A., i, 709.

Stollé, Robert, and Alfred Benrath, action of iodine and halogenated substances on the metallic derivatives of dibenzoylhyaizide, 1904, A., i, 935.

Stollé, Robert, and Percy Elliot Bowles, thiocarbohydrazide, 1908, A., i, 474.

Stollé, Robert, and Friedrich Hermann Dellschaff, formation of heterocyclic compounds from hydrazine derivates. XIII. Dipentadecylfurodiazole and dipentadecylthiodiazole, 1904, A., i, 697.

Stollé, Robert, and Hans Foerster, formation of heterocyclic compounds from hydrazine derivatives. VII. Conversion of s-di-m-chlorobenzoylhydrazide into diazole derivatives, 1904, A., i, 627.

Stollé, Robert, and Leo Gutmann, formation of heterocyclic compounds from hydrazine derivatives. XI. Conversion of isobutyric acid into heterocyclic compounds, 1904, A., i, 696.

formation of heterocyclic compounds from hydrazine derivatives. XIV. Selenodiazole, 1904, A., i, 697.
Stolle, Robert, and Hermann Hille, formation of heterocyclic compounds from hydrazine derivatives. IX. Conversion of the hydrazines of pro- pionic and isovaleric acids into heterocyclic compounds, 1904, A., i, 695.

Stolle, Robert, and Kurt Hoffmann, hydrazinecarboxylic acid, 1905, A., i, 28.

Stolle, Robert, and Julius Holzapfel, Karl Otto Leverkus, and J. Mampel, preparations and reactions of azo-acyl compounds, 1912, A., i, 225.

Stolle, Robert, and Akop Johannissen, formation of heterocyclic compounds from hydrazine derivatives. VIII. Conversion of the 2-dibromobenzoyl hydrazines into derivatives of fur- diazole [oxadiazole] and thiadiazole, 1904, A., i, 694.

Stolle, Robert, and Walter Kind, formation of heterocyclic compounds from hydrazine derivatives. XVI. Diazoles and bisdiazoles, 1905, A., i, 96.

Stolle, Robert, and Julius Laux, new method of preparation of azo-com- pounds, 1911, A., i, 508.

Stolle, Robert, and Walter Möring, condensation of aldehydes with p-diketohexamethylene, 1904, A., i, 875.

Stolle, Robert, and Eduard Münch, formation of heterocyclic compounds from hydrazine derivatives. XV. The metallic derivatives of the condensation products of acylhydrazines with aldehydes and ketones and their behaviour towards acid chlorides and iodine, 1905, A., i, 94.

Stolle, Robert, Eduard Münch, and Walter Kind, formation of hetero- cyclic compounds from hydrazine derivatives. XVII. Diphenoxylos- tetrazine and Diphenoxyotriazole, 1905, A., i, 97.

Stolle, Robert, and Christian Schätzlein, formation of heterocyclic compounds from hydrazine derivatives. XII. Conversion of 2-dilauryldiazine into diazole derivatives, 1904, A., i, 697.

Stolle, Robert, and Fr. Schmidt, action of alkalis on bisdiphenylacetylhydrazide chloride, 1912, A., i, 980.

preparation of azo-compounds by re- moval of halogen in the 1:6- and 1:10-positions, 1912, A., i, 1035.

Stolle, Robert, and Henry Potter Stevens, formation of heterocyclic compounds from hydrazine derivatives. VI. Tolyl and benzyl derivatives of fur- diazole [1:2:4-oxadiazole] and 1:3:4- thiadiazole, 1904, A., i, 626.

Stolle, Robert, and Carl Thomas, conversion of hydrazine derivatives into heterocyclic compounds. XX. Di- benzoylhydrazide dichloride, 1906, A., i, 461.

INDEX OF AUTHORS.

TORREY, Henry Augustus, and William
Hamnett Hunter, action of potassium
iodide on bromoanil and chloro-
anil, 1905, A., i, 217.
red and white silver salts of 2:4:6-
tribromophenol, 1907, A., i, 1030 ;
1911, A., i, 283.
action of iodides on bromoanil ;
ioanoanil and some of its deriv-
atives, 1912, A., i, 475.

TORREY, Henry Augustus, and Herman
Brunswick Kipper, hydrazones of
aromatic hydroxy-ketones; alkali-
soluble phenols, 1907, A., i, 325 ;
1908, A., i, 460.

TORREY, Henry Augustus, and Warren
MacPherson, some azo-dyes from p-
aminoacetophenone, 1909, A., i,
445.

TORREY, Henry Augustus, and Charles
Walter Porter, some derivatives of
p-aminobenzhydrol, 1911, A., i,
340.

TORREY, Henry Augustus, and H. R.
Rafsky, 1-benzoylphenyl-3-methyl-5-
pyrazolone, 1911, A., i, 84.

TORREY, Henry Augustus, and J. B.
Sumner, some properties of piper-
onylon, 1911, A., i, 66.

TORREY, Henry Augustus, and Joaquin
Enrique Zanetti, ethyl pyromucyl-
acetate [furufurylacetate], 1907, A.,
i, 146.
ethyl pyromucylacetate [furufuryl-
acetate]. II. 3-Furyl-5-pyrazolone,
1908, A., i, 840.
furylacetic ester and the furylpyrazol-
one, 1910, A., i, 892.

Torricelli, Andrea. See Mario Betti.

Tortelli, Massimo, the thermometer ;
an apparatus for the detection of
falsifications in olive oil and other
vegetable and animal oils, 1904, A., ii,
598.

Tortelli, Massimo, and Valentino Fortini,
identification of colza oil : its detection
in olive oil and in other food oils,
1911, A., ii, 549.

Tortelli, Massimo, and Evaristo Piazza,
detection and estimation of " sac-
charin " in foods containing fats,
starch, and proteins, 1910, A., ii,
908.

Toschi, Baldassarre. See Luigi Mas-
carelli.

Totani, Ginzaburo, presence of adenine
in bamboo shoots, 1909, A., ii, 925.
occurrence of choline in testicles of
oxen, 1910, A., ii, 879.
behaviour of phenylacetic acid in
fowls, 1910, A., ii, 880.

TOTANI, Ginzaburo, basic components of
bamboo shoots, 1911, A., ii, 222.

TOTANI, Ginzaburo, and Zin-nosuke
Hoshiai, methylpyridionium picrate,
1910, A., i, 696.
behaviour of pyridine in the organisms
of goats and pigs, 1910, A., ii, 881.

TOTANI, Ginzaburo, and K. Katsu
yama, the occurrence of arginine in the bull's
testis, 1910, A., ii, 325.

TETH, Eduard, modification of the
platinum vessel of the Berthelot-
Mahler bomb, 1908, A., ii, 664.

TETH, Julius, apparatus for determining
the differences shown by tobaccos
when burnt [smoked], 1905, A., ii,
216.
estimation of carbon monoxide in
tobacco smoke, 1907, A., ii, 197.
estimation of non-volatile organic
acids in tobacco, 1907, A., ii, 513 : 
1908, A., ii, 238.
estimation of volatile organic acids in
tobacco, 1908, A., ii, 330.
estimation of the relative amounts
of the organic acids occurring in
tobacco before and after fermenta-
tion, 1909, A., ii, 446.
free nicotine in tobacco smoke, 1909,
A., ii, 839.
thiocyanates in tobacco smoke, 1910,
A., ii, 165.
cyanoen compounds in tobacco smoke,
1910, A., ii, 443 ; 1911, A., ii, 143,
1127.
estimation of nicotine in concentrated
*oabacco juice, 1911, A., ii, 345.
the methods employed for the esti-
mation of nicotine in tobacco and
*abacco extracts, 1912, A., ii, 1010.

TETH, Julius, and J. Krampera,
comparative studies on the nicotine
estimations in tobacco extracts, 1911,
A., ii, 943.

Tottingham, William E. See Edwin
Bret Hart.

Totze, M., localisation of morphine in
the animal organism, 1904, A., ii, 220.

Touplain, F. See Fred. Bordes.

Tourpaïan, M. See Adrien Jaquierd.

Tousley, Nelson Ellbridge, and Moses
Gomberg, certain tri-p-tolylmethane
derivatives, 1905, A., i, 43.

Toussaint, E. See E. Guerry.

Tower, Olin Freeman, constitution of
certain organic salts of nickel and
cobalt as they exist in aqueous
solution, 1903, A., ii, 134 ; 1905,
A., i, 410.
transport number of sulphuric acid,
1904, A., ii, 802.
INDEX OF AUTHORS.

solubility of nitric oxide and of air in sulphuric acid, 1906, A., ii, 743.
determination of vapour pressures of solutions with the Morley gauge, 1908, A., ii, 811.
prefraction of the iron group and the composition of certain ferric formates, 1910, A., ii, 900.

Tower, Ralph Winfred. See Frederic Poole Gorham.

Towne, Elizabeth W., effects of certain stimuli on Paramocceum, 1904, A., ii, 756.

Townes, Caroline, and Carl Voegtlin, creatine and creatinine metabolism in dogs during feeding and inanition, with special reference to the function of the liver, 1912, A., ii, 270.

Townes, Caroline. See also Carl Voegtlin.

Townsend, John Sealy Edward, the charges on ions in gases and some effects that influence the motion of negative ions, 1911, A., ii, 355.
charges on ions in gases, 1911, A., ii, 686.
the charges on ions, 1912, A., ii, 412.
theory of ionisation by collision, 1912, A., ii, 516.

Townsend, John Sealy Edward, and H. E. Hurst, genesis of ions by the motion of positive ions and a theory of the sparking potential, 1905, A., ii, 7.

Toyonaga, Masato, distribution of calcium in animal organisms, 1903, A., ii, 164.
amount of calcium in various animal organs, 1904, A., ii, 751; 1905, A., ii, 385.
behaviour of sodium fluoride towards blood, 1905, A., ii, 332.
can small amounts of copper induce chronic poisoning? 1906, A., ii, 879.

Toyosumi, H., the action of cells of different organs on bacterial extracts, 1909, A., ii, 912.

Trachoniotowsky, P. See Leo Pissarjewsky.

Traetta-Mosca, Filippo, use of silver salts in sterilising water, 1909, A., ii, 256.
fermentation of tyrosine, 1910, A., ii, 531.

Traetta-Mosca, Filippo, and F. Apolloni, probable function of cholesterol in the production of uric acid in the animal organism, 1911, A., ii, 53.

Traetta-Mosca, Filippo, and Golda Mizzenmacher, importance of α-hydroxy-isobutyric acid in the formation of uric acid from cholesterol by means of calf's liver, 1911, A., ii, 53.

Traetta-Mosca, Filippo. See also Emanuele Paternò.

Trannoy, René. See Camille Matignon.

Traphagen, Frank Weiss, and Edmund Burke, occurrence of salicylic acid in fruits, 1903, A., ii, 388.

Trapp, Hans, method of analysis without the use of hydrogen sulphide, 1912, A., ii, 685.

Trappe, Paul. See Ludwig Wolff.

Traquair, John. See Charles Frederick Cross.

Traube, Hermann, artificial production of minerals by sublimation, 1903, A., ii, 553.

Traube, Isidor, modern theories of solution; the osmotic theory and the theory of electrolytic dissociation, 1908, A., ii, 63.
physical properties of the elements from the standpoint of van der Waals' equation of condition, 1903, A., ii, 355.
critical density, 1903, A., ii, 637.
theory of the critical state; difference between gasogenic and liquidogenic substances, 1904, A., ii, 110, 237.
volume of atoms and molecules, 1904, A., ii, 384.
properties of substances regarded as functions of the space occupied by atoms and molecules; systematic classification of the elements, 1904, A., ii, 643.
a theory of solutions, 1904, A., ii, 707.
theories on osmosis, solubility, and narcosis, 1905, A., ii, 13.
valency, molecular refractions, and volumes; refraction steres. I., 1907, A., ii, 145.
volume, valency, and refraction; the refraction and the volume stere. II., 1907, A., ii, 205.
associated substances. III., 1907, A., ii, 207.
behaviour of certain substances at their critical temperatures, 1907, A., ii, 227.
osmotic pressure, 1908, A., ii, 565.
the action of lipoid-soluble substances on red blood-corpuscles, 1908, A., ii, 708.
cohesion pressure (haftdruck); the theory of solutions, 1909, A., ii, 216.
Traube, Isidor, parthenogenesis, 1909, A., ii, 325.
cohesive and electrical forces; contact electricity, 1909, A., ii, 467.
von der Waals' equation of condition and the solid state, 1909, A., ii, 550.
diminution of the cohesion pressures and of the solubility of salts by non-electrolytes, 1909, A., ii, 647.
square root of the atomic weights, 1909, A., ii, 874.
calculated and coagulation of colloidal systems; theory of the action of poisons, drugs, and dyes, 1912, A., ii, 740.
the viscositrometer; method for estimation of surface tension, viscosity, and adsorption, 1912, A., ii, 832.
the action of bases and basic salts on alkaloid salts, 1912, A., ii, 858.
the influence of sodium carbonate on the toxicity of basic dyes, 1912, A., ii, 858.

Traube, Wilhelm, β-y-diaminoacidic acid, 1903, A., i, 76.
synthesis of xanthine bases from cyanocetic acid; synthesis of hypoxanthine and adine, 1904, A., i, 632.
γδ-dihydroxypropylmalonic acid, 1905, A., i, 13.
preparation of 5:5-dialkylbarbituric acids, 1906, A., i, 894.
preparation of diurethane derivatives of dialkylmalonic acids, 1907, A., i, 396.
[carbalkyloxy-5:5-dialkylbarbituric acids], 1907, A., i, 557.
the reduction of ethyl oxalate, 1908, A., i, 75.
preparation of basic compounds from methyl ethyl ketone, 1908, A., i, 362, 1010.
action of ammonia on methyl ethyl ketone, 1909, A., i, 12.

Traube, Wilhelm, evolution of hydrogen occurring when glyoxylic acid is warmed with barium hydroxide, 1909, A., i, 761.
action of ammonia on the homologues of acetone, 1909, A., i, 773.
autoxidation of aliphatic amino- and polyhydroxy-derivatives, 1910, A., i, 294; 1911, A., i, 940.
acyl derivatives of guanidine, 1911, A., i, 115.
oxidation of amino-acids by alloxan, isatin, and p-benzoquinone, 1911, A., i, 960.
the behaviour of certain hydroxides towards solutions of alkylenediamines, 1912, A., i, 9; ii, 257.

Traube, Wilhelm, and Arthur Blitz, production of nitrates and nitrates by the electrolytic oxidation of ammonia in the presence of cupric hydroxide. II., 1904, A., ii, 727; 1906, A., ii, 159.

Traube, Wilhelm, Max Braumann, Felix Heinemann, C. Hoeppner, and W. Sander, behaviour of cyanogen towards methylene compounds, 1904, A., i, 708.

Traube, Wilhelm, and Alfred Engelhard, alkylolation of commercial cyanamide salts, 1911, A., i, 955.

Traube, Wilhelm, and Ludwig Herrmann, 2-phenylhypoxanthine and 2-phenyladine, 1904, A., i, 633.

Traube, Wilhelm, and Waller Nithack, action of aldehydes on o-diamines of the pyrimidine series, 1906, A., i, 214.

action of oxygen on aliphatic amines in presence of copper, 1906, A., i, 143.

Traube, Wilhelm, and Friedrich Winter, 3-methylhypoxanthine, 1906, A., i, 390.

three lecture experiments on the preparation of iodochlorides and iodoxy- and iodonium compounds, 1908, A., i, 408.

preparation of acids and amides by the action of ammonium sulphide on aliphatic aromatic ketones, 1909, A., i, 716.

Willgerodt, Conrad, and Bruno Albert, acetylated phenanthrenes and some of their derivatives, 1911, A., i, 882.

Willgerodt, Conrad, and Willy Bergdolt, derivatives of $p$-iodoethylenbenzene containing multivalent iodine, 1903, A., i, 745.

Willgerodt, Conrad, and Mathias Böllert, derivatives of 1:3-dichloro-4-iodobenzene with a multivalent iodine atom, 1910, A., i, 827.

$i$-iodobenzaldehyde, $p$-iodobenzophenone, and derivatives of the latter containing multivalent iodine, 1905, A., i, 901.

Willgerodt, Conrad, and Louis Brandt, iodoso-, iodoxy-, and iodiumium-compounds of 4-iodo-1-methyl-3-ethylbenzene, 1904, A., i, 657.

Willgerodt, Conrad, and Alfred Desaga, derivatives of $m$-di-iodobenzene with multivalent iodine, 1904, A., i, 483.

Willgerodt, Conrad, and Paul Frischmuth, derivatives of iodoquinolines with multivalent iodine, 1905, A., i, 547.

Willgerodt, Conrad, and Rudolf Gartner, derivatives of 2-iodo-$p$-toluidine and 2-iodo-4-nitrobenzoic acid containing uni- and ter-valent iodine, 1908, A., i, 876.

Willgerodt, Conrad, and Wilhelm Hambrecht, preparation of acids and amides from phenyl alkyl ketones by means of yellow ammonium sulphide, 1910, A., i, 117.

Willgerodt, Conrad, and Karl Heusner, derivatives of $p$-iododiphenyldiiodinium chloride and of iodoaceto-$o$-toluidide containing multivalent iodine; preparation of chloroacylanines containing iodine, 1907, A., i, 1026.

Willgerodt, Conrad, and Gustave Hilgenberg, derivatives of $4$-$A$'-di-iododiphenyl with multivalent iodine and the iodination of diphenyl, 1909, A., i, 908.

Willgerodt, Conrad, and Max Jahn, 6-iodo-1-methyl-3-ethylbenzene and its derivatives containing multivalent iodine, 1912, A., i, 21.

Willgerodt, Conrad, and Max Klinger, iodomethoxy-ethers, iodo-sulphones, iodosulphonic esters, and their derivatives with multivalent iodine, 1912, A., i, 255.

Willgerodt, Conrad, and Paul Lewino, derivatives of $4'$-iodo-2:5'-dimethylanilazo-benzene and of $m$-bromiodobenzene with multivalent iodine, 1904, A., i, 635.

Willgerodt, Conrad, and Francesco Maffezoli, anthraquinone-2:3-dicarbonylic anhydride, 1910, A., i, 678.
INDEX OF AUTHORS.

Willgerodt, Conrad, and Franz Hilbert Merkel, preparation of acids and amides from phenyl alkyl ketones by means of yellow ammonium sulphide, 1900, A., i, 716.

Willgerodt, Conrad, and Robert Meyer, 5-iodo-\$\beta\$-cumeue and its derivatives, 1912, A., i, 22.

Willgerodt, Conrad, and Walter Nageli, derivatives of \$p\$-iodoacetonilide containing multivalent iodine, and \$p\$-aminodiphenyliodium compounds, 1907, A., i, 1025.

Willgerodt, Conrad, and Max Plocksties, iodosulphones and their derivatives with multivalent iodine, 1912, A., ii, 256.

Willgerodt, Conrad, and Reinhold Rieke, derivatives of the iodobenzaldehydes containing uni- and ter-valent iodine, 1905, A., ii, 442.

Willgerodt, Conrad, and Rudolph Schloss, \$o\$- and \$m\$-iodo-\$p\$-tolyl methyl ether and derivatives with multivalent iodine, 1911, A., i, 715.

Willgerodt, Conrad, and Friedrich Schmierer, iodoso-, iodoxy-, and iodonium compounds from \$s\$-iodoxybenzene, 1905, A., i, 425.

Willgerodt, Conrad, and Paul Seeler, derivatives of \$p\$-iodopropylbenzene containing multivalent iodine, 1903, A., i, 746.

Willgerodt, Conrad, and Max Simonis, ortho-substituted iodo-compounds with uni- and multi-valent iodine, 1906, A., i, 155.

Willgerodt, Conrad, and George McPhail Smith, derivatives of \$p\$-iodoazobenzene and \$m\$-chloroiodobenzene with multivalent iodine, 1904, A., i, 485.

Willgerodt, Conrad, and Alexis Ucke, \$p\$-iodobenzaldehyde and derivatives with uni- and multi-valent iodine, 1912, A., i, 774.

Willgerodt, Conrad, and Theodor Umbach, derivatives of \$m\$-iodotoluene containing multivalent iodine, 1903, A., i, 748.

Willgerodt, Conrad, and Gustav Wie- gand, derivatives of aromatic \$p\$-monoiodophenyl ethers with multivalent iodine, 1909, A., ii, 912.

Willgerodt, Conrad, and E. Hjalmar Wikander, derivatives of \$m\$-iodonitrobenezene, \$m\$-iodoaniline, and \$m\$-ido- acetonilide containing multivalent iodine, 1907, A., i, 1024.

Willgerodt, Conrad, and Karl Wilecke, limits of activity of chloromonoiodo-benzenes with regard to the formation of compounds with multivalent iodine, 1910, A., i, 828.
